

1. Questions

In the following questions, sentence (F) is fixed as the last sentence. The remaining five sentences (A) to (E) are jumbled. Rearrange them to form a meaningful and coherent passage.

- (A). India currently has over 400 registered space start-ups, and its space economy is valued at 8 billion, which is 2–3% of the global share.
- (B). India's space programme has grown from a scientific initiative into a strategic tool for economic growth and global cooperation.
- (C). Missions like Chandrayaan-3 and Aditya-L1 have proven India's technological maturity in deep-space exploration.
- (D). However, India still faces challenges in scaling laboratory designs into mass commercial production lines.
- (E). To boost private participation, the government now permits 100% FDI in component manufacturing and up to 74% in satellite operations.
- (F). With next-generation reusable rockets and a national space station in the pipeline, India aims to capture 8% of the global space market by 2030.

Which of the following is the **FIRST** sentence after rearrangement?

- a. B
- b. C
- c. D
- d. E
- e. A

@RankZen Banker

2. Questions

Which of the following is the **SECOND** sentence after rearrangement?

- a. B
- b. C
- c. D
- d. E
- e. A

3. Questions

Which of the following is the **THIRD** sentence after rearrangement?

- a. B
- b. C

- c. D
- d. E
- e. A

4. Questions

Which of the following is the **FOURTH** sentence after rearrangement?

- a. B
- b. C
- c. D
- d. E
- e. A

5. Questions

Which of the following is the **FIFTH** sentence after rearrangement?

- a. B
- b. C
- c. D
- d. E
- e. A

@RankZen Banker

6. Questions

In the following questions, there are two sentences given below with two or three words highlighted in each sentence and have been interchanged inappropriately. You have to choose the proper arrangement of bold words from the given options to make the given sentences meaningful.

I). Many organisations are adopting **upskilling** (A) to eliminate repetitive tasks, allowing employees to concentrate on **adaptability** (B) and strategic decision-making.

II). Regular **automation** (C) programmes and stronger **innovation** (D) among employees have become essential for remaining competitive in a rapidly evolving digital workplace.

- a. A-C
- b. B-D
- c. A-D
- d. A-C and B-D
- e. No Correction required

7. Questions

I). To reduce carbon emissions, several countries are accelerating the **regulations (A)** towards renewable energy while encouraging greater private **conservation (B)** in clean technologies.

II). Stricter **transition (C)** on industrial pollution and continuous **investment (D)** efforts are essential for protecting ecosystems and achieving long-term environmental sustainability.

- a. A-C
- b. B-D
- c. A-D
- d. A-C and B-D
- e. No Correction required

8. Questions

I). The government has expanded **vaccination (A)** coverage through nationwide campaigns while strengthening **surveillance (B)** systems to detect disease outbreaks at an early stage.

II). Although the weather forecast **inconvenience (C)** heavy rainfall, the outdoor event concluded successfully without causing significant **predicted (D)** to participants.

- a. A-C
- b. C-D
- c. B-C
- d. A-D and B-C
- e. No Correction required

@RankZen Banker

9. Questions

I). The successful launch of advanced **satellites (A)** has strengthened the country's communication network while expanding **research (B)** capabilities for both civilian and strategic applications.

II). Continuous **navigation (C)** in space science and greater international **collaboration (D)** have accelerated technological breakthroughs and improved the efficiency of future missions.

- a. A-C
- b. B-D
- c. B-C
- d. A-D and B-C
- e. No Correction required

10. Questions

I). Banks are investing heavily in advanced **encryption (A)** technologies to protect customer information and prevent **breaches (B)** that could undermine public confidence in digital transactions.

II). Regular authentication (C) procedures and timely compliance (D) audits have become essential for ensuring secure online banking services and meeting regulatory requirements.

- a. A-D
- b. B-C
- c. A-C
- d. A-C and B-D
- e. No Correction required

11. Questions

In each of the following questions, a sentence is given with four words printed in bold, labelled (A), (B), (C) and (D). One or more of these words may either be misspelt or inappropriate in the context of the sentence. Identify the word(s) that are either misspelt or contextually inappropriate. If all the bold words are correctly spelt and appropriate in the context of the sentence, mark (E) All Correct as your answer.

The (A) **Government** has announced free (B) **accomodation** and (C) **subsidised** food for those who wish to (D) **aquire** housing under the scheme.

- a. A and C
- b. B and D
- c. A and D
- d. B and C
- e. All are Correct

@RankZen Banker

12. Questions

The mishap (A) **occured** because of gross (B) **negligence** on the part of the workers who (C) **accidently** left the safety (D) **valve** open overnight.

- a. A and C
- b. B and D
- c. A and B
- d. C and D
- e. All are Correct

13. Questions

The scheme ensures that (A) **Farmers** in remote areas also (B) **benifit** from improved (C) **irrigation** infrastructure and (D) **recieve** adequate compensation for crop loss.

- a. A and C

- b. C and D
- c. A and D
- d. B and D
- e. All are Correct

14. Questions

The investment failed to (A) **fetch** the (B) **expected** returns, and the founder publicly (C) **denounced** his (D) **allegiance** to the board.

- a. only C
- b. B and D
- c. A and B
- d. C and D
- e. All are Correct

15. Questions

The (A) **candidates** who (B) **cleared** the written exam were (C) **summoned** for the (D) **verbal** round of the selection process.

- a. A and B
- b. C and D
- c. A and D
- d. B and C
- e. All are Correct

@RankZen Banker

16. Questions

In each of the following questions, four sentences, labeled A, B, C, and D, are given. One or more of these sentences may be grammatically correct. Identify the grammatically correct sentence(s) and mark the appropriate answer from the options given below. If all the sentences contain errors, choose option (e) "All Error."

- A). If the regulatory authority would have intervened on time, the cooperative bank could have avoided liquidation.
- B). Had the management taken proactive measures, the employee strike could have been averted.
- C). Should you require any further clarification regarding the portfolio, please do not hesitate to contact us.
- D). Were I a board member of the firm, I will definitely vote against the proposed merger.
- a. Only A
 - b. Only B

- c. Only C
- d. Both B and C
- e. All Error

17. Questions

- A). The job profile requires not only collecting market data but also to analyze client investment portfolios.
- B). Having lived in a metropolitan city for a decade, he is used to travel by crowded public transport.
- C). The research team spent months analyzing the trend, documenting the anomalies, and to present the findings.
- D). Finding a permanent solution to the recurring liquidity crunch is preferred over applying temporary fixes.
- a. Both A and C
 - b. Only B
 - c. Only C
 - d. Only D
 - e. All Error

18. Questions

@RankZen Banker

- A). The monetary policy committee met yesterday to discuss a more wiser approach to curb inflation.
- B). Although the candidate performed exceptional well in the interview, his previous experience was insufficient.
- C). He is intelligent enough to comprehend the intricate balance sheets of manufacturing conglomerates.
- D). The newly introduced software is superior and cheaper than the older version used by the accounting team.
- a. Only A
 - b. Only B
 - c. Only C
 - d. Both C and D
 - e. All Error

19. Questions

- A). By the time the auditor arrives next Tuesday, the finance team will finish compiling all expenditures.
- B). Since the implementation of the new tax reforms, corporate compliance rates increased significantly.
- C). The branch manager ordered the ledger to be updated before the regional head had arrived.

D). I am working in this auditing firm for the past five years and have never faced any issues.

- a. Only A
- b. Only B
- c. Only C
- d. Only D
- e. All Error

20. Questions

A). Whomever is selected for the senior analyst position will have to relocate to the Mumbai headquarters.

B). Not only did the firm face severe liquidity shortages, but it also lost its primary institutional investor.

C). Let you and I handle the verification of these transaction receipts before submitting them.

D). No sooner had the monetary policy committee announced the repo rate cut when the stock market index surged.

- a. Only A
- b. Only B
- c. Only C
- d. Only D
- e. All Error

@RankZen Banker

21. Questions

Read the following passage carefully and answer the questions that follow:

There was a time when delay was not unusual enough to be noticed. A train running late did not become a conversation. A letter arriving after several days did not feel like inefficiency. A decision taking weeks was not interpreted as hesitation. It was simply how things moved. Life, in that sense, had a natural lag built into it. Nothing arrived fully formed. Everything required a passage. That rhythm has quietly disappeared. Today, delay is treated as failure. A message unanswered within minutes raises questions. Complaints can be raised just because a delivery did not reach on time. Even a brief pause in a system, raises brows and creates frowns. Speed has stopped being a feature. It has become an expectation. This is where the shift has happened - not in technology alone, but in behaviour. Time is no longer experienced as duration. It is experienced as a response. The moment something is initiated, the expectation is completion. Anything in between feels like friction. Workplaces are a clear example. Though a quick output is confused with efficiency, in reality, they may not be the same. Speed, at times, may mask poor thinking, just as easily as it can signal competence. Even in personal communication a same pattern exists. Silence is no longer neutral. It is interpreted.

A delayed response is read as avoidance; absence is assumed to be intentional. The result is a constant state of overreading and under waiting. What is often missed is that many essential processes were never designed for acceleration. Learning does not compress neatly. Neither does recovery. Neither does trust.

These are **cumulative** processes built through repetition, distance and time. When forced into urgency, they do not improve. They weaken. The larger cultural change is not just that things are faster. It is that waiting has become uncomfortable. That discomfort is relatively new. Earlier systems had built-in pauses. Information arrived late. Decisions were revisited overtime. Even boredom had structure - it was a gap between inputs, not a condition to be eliminated. That gap mattered. It allowed thinking without interruption. It allowed ideas to settle instead of reacting immediately to the next stimulus. That space is now almost gone. Every pause is filled. Every silence is corrected. Every delay is monitored. What remains is continuous activity without equivalent depth. That is where the imbalance sits. This is not a discussion against technological progress; The gains are undeniable. Healthcare is faster.

Communication is instant. Information is accessible. Logistics are efficient in ways previously unimaginable. The problem is not speed itself. The problem is the extension of speed into every category of life. The issue lies elsewhere. Not everything is meant to be immediate. Some systems are not broken because they are slow. Perhaps things are getting restored in real time and that perhaps may take time. What is being **eroded** is not efficiency. It is tolerance. The ability to remain steady when outcomes are not immediate is weakening. And that has implications beyond convenience. It affects judgment, attention, and even the way problems are understood. A fast world is not automatically a right one. The question, then, is not whether speed will continue to define the age. It will. The more relevant question is whether patience can still coexist alongside it - not as nostalgia, but as a necessity. Because, at some point, the line must be drawn. Speed belongs to systems. Patience belongs to people. Confusing the two is where the problem lies.

According to the passage, how was delay viewed in earlier times compared to today?

- a. Delay was considered a serious problem even in earlier times and was always reported to authorities
- b. Delay was a normal part of life and was not interpreted as failure or inefficiency
- c. Delay was celebrated as a sign of careful and thoughtful decision-making
- d. Delay was acceptable only in government systems but not in personal communication
- e. Delay was viewed negatively even earlier but people had no means to address it

22. Questions

The author states that 'speed may mask poor thinking.' What does this suggest about the relationship between speed and quality?

- a. Fast workers always produce poor quality work and should be slowed down by managers
- b. Quick output can sometimes hide the absence of careful thinking and should not be automatically mistaken for competence
- c. Speed and quality are always inversely related - the faster the work, the worse the result
- d. Employees who work slowly are always more competent than those who work quickly
- e. Speed is only valued in workplaces and has no effect on personal decision-making

23. Questions

According to the passage, which of the following processes CANNOT be accelerated without

weakening?

- a. Logistics and supply chain management
- b. Healthcare diagnostics and treatment delivery
- c. Learning, recovery, and trust
- d. Information access and communication
- e. Financial transactions and banking operations

24. Questions

What role did 'boredom' play in earlier times, according to the passage?

- a. It was a sign of laziness and was discouraged by teachers and employers
- b. It motivated people to work harder and produce faster results
- c. It was a temporary condition caused by slow technology that disappeared with modernisation
- d. It was a structured gap between inputs that allowed thinking without interruption and ideas to settle
- e. It was linked to poor mental health and was treated as a problem to be solved

25. Questions

What does the author identify as the real thing being eroded in today's fast-paced world?

- a. Efficiency, because speed reduces the quality of work produced
- b. Technology, because faster systems are more prone to breakdown and error
- c. Tolerance - the ability to remain steady when outcomes are not immediate
- d. Communication skills, because people no longer write or speak at length
- e. Creativity, because constant activity leaves no time for original thinking

26. Questions

Choose the word most similar in meaning to 'CUMULATIVE' as used in the passage?

- a. Sudden and dramatic
- b. Built up gradually through repeated additions over time
- c. Easily reversed and temporary
- d. Dependent on a single key event
- e. Spontaneous and unplanned

27. Questions

Choose the word most similar in meaning to 'ERODED' as used in the passage?

- a. Strengthened
- b. Measured
- c. Gradually worn away or weakened
- d. Suddenly destroyed
- e. Carefully preserved

28. Questions

In each of the following sentences there are two blank spaces. Below each sentence five pairs of words are given. Find out which pair of words can be filled up in the blanks in the sentence in the same sequence to make the sentence grammatically and meaningfully correct.

Following India's stunning victory in the ICC Men's T20 World Cup final on June 29, 2026, cricket fans across the nation _____ to the streets in jubilation, while social media platforms were completely _____ with congratulatory messages for Team India.

- a. retreated, depleted
- b. thronged, inundated
- c. migrated, deprived
- d. rushed, scattered
- e. strolled, restricted

@RankZen Banker

29. Questions

To enhance transparency and prevent tax evasion, the Income Tax Department has _____ stricter disclosure rules for taxpayers holding overseas assets, warning that any failure to declare such holdings will lead to severe _____.

- a. rescinded, exemptions
- b. formulated, rewards
- c. mandated, penalties
- d. delayed, investigations
- e. relaxed, prosecutions

30. Questions

The Reserve Bank of India (RBI) has urged commercial banks to _____ their cyber security frameworks immediately to counter the _____ rise in sophisticated AI-driven phishing attacks targeting retail accounts.

- a. weaken, gradual
- b. dismantle, persistent

- c. fortify, unprecedented
- d. overhaul, negligent
- e. neglect, alarming

31. Questions

A sudden technical glitch in a major global cloud service provider on June 25, 2026, temporarily _____ online banking services for millions of users worldwide, highlighting how heavily modern financial infrastructure _____ on digital continuity.

- a. disrupted, relies
- b. facilitated, hinges
- c. enhanced, depends
- d. suspended, focuses
- e. improved, expands

32. Questions

With the southwest monsoon finally _____ covering the entire Indian subcontinent ahead of its normal schedule, agricultural experts anticipate a highly _____ sowing season for Kharif crops this year.

- a. partially, volatile
- b. successfully, productive
- c. barely, profitable
- d. smoothly, disastrous
- e. efficiently, sluggish

@RankZen Banker

Explanations:

1. Questions

Answer: A

The paragraph traces the evolution of India's space programme from its scientific origins to its present achievements, economic potential, policy reforms, existing challenges, and future ambitions.

Sentence B is the introductory statement. It broadly introduces India's space programme and its transformation into a strategic and economic asset. **Sentence C** follows by providing evidence of this transformation through successful missions such as Chandrayaan-3 and Aditya-L1. **Sentence A** then highlights the current status of India's space ecosystem by mentioning the number of start-ups and the size of the space economy. **Sentence E** naturally follows, explaining the government's policy initiatives to strengthen this growing ecosystem by encouraging private participation through higher FDI limits.

Sentence D begins with "**However**," introducing a contrast by pointing out that despite these achievements and reforms, India still faces manufacturing and commercialization challenges. **Sentence F** concludes the paragraph on a forward-looking note, outlining India's future plans and its ambition to capture a larger share of the global space market.

Therefore, the correct sequence is: B – C – A – E – D – F.

Sentence B introduces the subject without depending on any other sentence. All other sentences discuss specific facts, missions, policies, or challenges that logically follow this general introduction. Hence, **B is the first sentence.**

2. Questions

Answer: B

The paragraph traces the evolution of India's space programme from its scientific origins to its present achievements, economic potential, policy reforms, existing challenges, and future ambitions.

Sentence B is the introductory statement. It broadly introduces India's space programme and its transformation into a strategic and economic asset. **Sentence C** follows by providing evidence of this transformation through successful missions such as Chandrayaan-3 and Aditya-L1. **Sentence A** then highlights the current status of India's space ecosystem by mentioning the number of start-ups and the size of the space economy. **Sentence E** naturally follows, explaining the government's policy initiatives to strengthen this growing ecosystem by encouraging private participation through higher FDI limits.

Sentence D begins with "**However**," introducing a contrast by pointing out that despite these achievements and reforms, India still faces manufacturing and commercialization challenges. **Sentence F** concludes the paragraph on a forward-looking note, outlining India's future plans and its ambition to capture a larger share of the global space market.

Therefore, the correct sequence is: B – C – A – E – D – F.

Sentence (C) follows B because it provides **specific examples** - Chandrayaan-3 and Aditya-L1 - to support the claim of technological maturity made in B. It answers the implicit question raised by B: "How has India proven its growth?" Hence, **C is the second sentence.**

3. Questions

Answer: E

The paragraph traces the evolution of India's space programme from its scientific origins to its present achievements, economic potential, policy reforms, existing challenges, and future ambitions.

Sentence B is the introductory statement. It broadly introduces India's space programme and its transformation into a strategic and economic asset. **Sentence C** follows by providing evidence of this transformation through successful missions such as Chandrayaan-3 and Aditya-L1. **Sentence A** then highlights the current status of India's space ecosystem by mentioning the number of start-ups and the size of the space economy. **Sentence E** naturally follows, explaining the government's policy initiatives to strengthen this growing ecosystem by encouraging private participation through higher FDI limits.

Sentence D begins with "**However**," introducing a contrast by pointing out that despite these achievements and reforms, India still faces manufacturing and commercialization challenges. **Sentence F** concludes the paragraph on a forward-looking note, outlining India's future plans and its ambition to capture a larger share of the global space market.

Therefore, the correct sequence is: B – C – A – E – D – F.

Sentence (A) comes third as it transitions the passage from **technology to economy**, stating that India has 400+ space start-ups and a 8 billion space economy. Hence, **A is the third sentence.**

4. Questions

Answer: D

The paragraph traces the evolution of India's space programme from its scientific origins to its present achievements, economic potential, policy reforms, existing challenges, and future ambitions.

Sentence B is the introductory statement. It broadly introduces India's space programme and its transformation into a strategic and economic asset. **Sentence C** follows by providing evidence of this transformation through successful missions such as Chandrayaan-3 and Aditya-L1. **Sentence A** then highlights the current status of India's space ecosystem by mentioning the number of start-ups and the size of the space economy. **Sentence E** naturally follows, explaining the government's policy initiatives to strengthen this growing ecosystem by encouraging private participation through higher FDI limits. **Sentence D** begins with "**However**," introducing a contrast by pointing out that despite these achievements and reforms, India still faces manufacturing and commercialization challenges. **Sentence F** concludes the paragraph on a forward-looking note, outlining India's future plans and its ambition to capture a larger share of the global space market.

Therefore, the correct sequence is: B – C – A – E – D – F.

Sentence (E) follows A because it presents the **government's policy response** to boost the growing space economy - allowing 100% FDI in manufacturing and 74% in satellite operations. Hence, **E is the fourth sentence.**

5. Questions

Answer: C

The paragraph traces the evolution of India's space programme from its scientific origins to its present achievements, economic potential, policy reforms, existing challenges, and future ambitions.

Sentence B is the introductory statement. It broadly introduces India's space programme and its transformation into a strategic and economic asset. **Sentence C** follows by providing evidence of this transformation through successful missions such as Chandrayaan-3 and Aditya-L1. **Sentence A** then highlights the current status of India's space ecosystem by mentioning the number of start-ups and the size of the space economy. **Sentence E** naturally follows, explaining the government's policy initiatives to strengthen this growing ecosystem by encouraging private participation through higher FDI limits. **Sentence D** begins with "**However**," introducing a contrast by pointing out that despite these achievements and reforms, India still faces manufacturing and commercialization challenges. **Sentence F** concludes the paragraph on a forward-looking note, outlining India's future plans and its ambition to capture a larger share of the global space market.

Therefore, the correct sequence is: B – C – A – E – D – F.

Sentence (D) comes fifth because it introduces a **contrast or challenge** using the word "However" - a classic adversative connector signalling a shift from positives to problems. It can only appear after all the achievements and policies (B, C, A, E) have been discussed. Placing D just before the fixed last sentence F

creates a perfect **challenge-to-resolution** structure, where F responds to D by highlighting future plans like reusable rockets and the 8% market target. Hence, **D is the fifth sentence.**

6. Questions

Answer: D

In the given sentences, '**upskilling**' and '**automation**' at their current positions fail to impart valid meaning to the sentence, as well as '**adaptability**' and '**innovation**' at their current positions fail to impart valid meaning to the sentence, but interchanging them will make the given sentences both grammatically and contextually correct.

Automation is adopted to eliminate repetitive tasks.

Employees can then focus on **innovation** and strategic decision-making.

Upskilling programmes are conducted to improve employees' skills.

Adaptability is a quality employees need to remain competitive in a rapidly changing workplace.

The correct sentences after re arrangement are:

I). Many organisations are adopting **automation** to eliminate repetitive tasks, allowing employees to concentrate on **innovation** and strategic decision-making.

II). Regular **upskilling** programmes and stronger **adaptability** among employees have become essential for remaining competitive in a rapidly evolving digital workplace.

So, the correct answer is: d) A-C and B-D.

@RankZen Banker

7. Questions

Answer: D

In the given sentences, '**regulations**' and '**transition**' at their current positions fail to impart valid meaning to the sentence, as well as '**conservation**' and '**investment**' at their current positions fail to impart valid meaning to the sentence, but interchanging them will make the given sentences both grammatically and contextually correct.

Transition towards renewable energy is the correct and natural expression.

Private **investment** in clean technologies is a common economic and environmental collocation.

Regulations on industrial pollution is the appropriate phrase, not *transition on industrial pollution*.

Conservation efforts is the standard expression for activities aimed at protecting the environment.

The correct sentences after re arrangement are:

I). To reduce carbon emissions, several countries are accelerating the **transition** towards renewable energy while encouraging greater private **investment** in clean technologies.

II). Stricter **regulations** on industrial pollution and continuous **conservation** efforts are essential for protecting ecosystems and achieving long-term environmental sustainability.

So, the correct answer is: d) A-C and B-D.

8. Questions

Answer: B

In Sentence II, "forecast inconvenience heavy rainfall" is incorrect because a forecast **predicts** weather; it does not **inconvenience** it. Similarly, "causing significant predicted to participants" is incorrect because **predicted** cannot function as a noun. Interchanging **C (inconvenience)** and **D (predicted)** gives the correct sentence.

The correct sentences after re arrangement are:

I). The government has expanded **vaccination** coverage through nationwide campaigns while strengthening **surveillance** systems to detect disease outbreaks at an early stage.

II). Although the weather forecast **predicted** heavy rainfall, the outdoor event concluded successfully without causing significant **inconvenience** to participants.

So, the correct answer is: b) C-D

9. Questions

Answer: C

In the given sentences, 'research' and 'navigation' at their current positions fail to impart valid meaning to the sentence, but interchanging them will make the given sentences both grammatically and contextually correct.

Navigation capabilities is the correct collocation with *satellites*, as satellites enhance navigation systems such as GPS.

Research in space science is the natural and meaningful expression, as continuous research drives innovation and technological progress.

Satellites and **collaboration** are already correctly placed.

The correct sentences after re arrangement are:

I). The successful launch of advanced **satellites** has strengthened the country's communication network while expanding **navigation** capabilities for both civilian and strategic applications.

II). Continuous **research** in space science and greater international **collaboration** have accelerated technological breakthroughs and improved the efficiency of future missions.

So, the correct answer is: c) B-C

10. Questions

Answer: E

Both sentences are already meaningful and contextually correct.

Encryption technologies is the correct collocation.

Prevent **breaches** (especially data/security breaches) is also correct.

Authentication procedures verify the identity of users.

Compliance audits assess whether an organization follows regulatory and legal requirements.

Since all highlighted words are correctly placed, **no swapping is required**.

The sentences are:

- I). Banks are investing heavily in advanced **encryption** technologies to protect customer information and prevent **breaches** that could undermine public confidence in digital transactions.
- II). Regular **authentication** procedures and timely **compliance** audits have become essential for ensuring secure online banking services and meeting regulatory requirements.

So, the correct answer is: (e) No Correction required

11. Questions

Answer: B

Errors in: (B) 'accomodation' - 'accommodation' and (D) 'aquire' - 'acquire'

(A) 'Government' is correctly spelt and contextually fitting.

(B) 'accomodation' is misspelt. Correct form: 'accommodation'. Double 'c' and double 'm' required: ac-com-mo-da-tion.

(C) 'Subsidised' is correctly spelt (British/Indian English) and appropriate here.

(D) 'aquire' is misspelt. Correct form: 'acquire'. The silent 'c' before 'q' is mandatory: ac-quire.

12. Questions

Answer: A

Errors in: (A) 'occured' - 'occurred' and (C) 'accidently' - 'accidentally' @RankZen Banker

(A) 'occured' is misspelt. Correct form: 'occurred'. The final consonant 'r' must be doubled before '-ed': oc-curred.

(B) 'Negligence' is correctly spelt and appropriate - it means failure to take proper care.

(C) 'accidently' is misspelt. Correct form: 'accidentally'.

The correct form retains '-al-': ac-ci-den-tal-ly.

(D) 'Valve' is correctly spelt and fits the industrial/technical context.

13. Questions

Answer: D

Errors in: (B) 'benifit' - 'benefit' and (D) 'recieve' - 'receive'

(A) 'Farmers' is correctly spelt and appropriate as the subject of an agricultural scheme.

(B) 'benifit' is misspelt. Correct form: 'benefit'. 'Benefit' follows 'e-before-i' rule: ben-e-fit, not ben-i-fit.

(C) 'Irrigation' is correctly spelt and relevant to the context of farming infrastructure.

(D) 'recieve' is misspelt. Correct form: 'receive'. Apply the 'i before e except after c' rule: re-ceive.

14. Questions

Answer: A

Error: (C) 'renounced'

(A) '**Fetch**' is correctly used. Besides meaning "to bring or retrieve," **fetch** also means **to obtain, yield, or bring in**, especially in financial contexts. Expressions like "**fetch good returns**," "**fetch expected returns**," and "**fetch high profits**" are standard and contextually appropriate.

(B) '**Expected**' is correctly spelt and contextually appropriate. The phrase "**expected returns**" is a common financial expression referring to the anticipated profit from an investment.

(C) '**Denounced**' is contextually inappropriate. **Denounce** means to publicly condemn or criticize. Here, the intended meaning is that the founder **gave up or abandoned his loyalty** to the board. The correct word is '**renounced**', which means to formally give up or abandon.

(D) '**Allegiance**' is correctly spelt and appropriate. It means **loyalty or commitment** to a person, organisation, or cause.

15. Questions**Answer: E**

(A) '**Candidates**' is correctly spelt and appropriately used to refer to applicants participating in the selection process.

(B) '**Cleared**' is correctly used and contextually appropriate. It is a standard expression meaning **passed** the written examination.

(C) '**Summoned**' is contextually appropriate. Although **summoned** often implies a formal or official order to appear, it is also commonly used in recruitment and government examination contexts to mean **officially called** for the next stage of the selection process.

(D) '**Verbal round**' is contextually appropriate. While **oral round** is the traditional term for a spoken assessment, **verbal round** is also widely used in recruitment and interview processes to refer to an assessment of spoken communication and interview performance.

Correct Answer: (E) All are Correct.

16. Questions**Answer: D**

Sentence A (Incorrect): In a third conditional sentence (past unfulfilled action), the "if-clause" takes a past perfect tense (had + V₃), never "would have".

Correct: "If the regulatory authority had intervened..."

Sentence B (Correct): This is a correct third conditional sentence using inversion (Had + subject + V₃) instead of "If". The main clause correctly uses could have + V₃.

Sentence C (Correct): This is an inversion of a first conditional sentence (Should you require instead of If you require). It is entirely formal and grammatically flawless.

Sentence D (Incorrect): This is a second conditional (hypothetical present/future). The "were" subclause must be followed by "would" in the main clause, not "will". Correct: "...I would definitely vote..."

17. Questions

Answer: D

Sentence A (Incorrect): Correlative conjunctions like "not only... but also" must maintain strict parallelism. "Collecting" (gerund) is paired with "to analyze" (infinitive). Both should be gerunds.

Correct: "...but also analyzing client..."

Sentence B (Incorrect): The phrase "is used to" (meaning accustomed to) takes a gerund (V_1 + ing), not a base verb. The "to" here is a preposition, not part of an infinitive.

Correct: "...he is used to traveling by..."

Sentence C (Incorrect): Parallel structure is broken in the list of activities. "Analyzing" and "documenting" are gerunds, but "to present" breaks the pattern.

Correct: "...and presenting the findings."

Sentence D (Correct): This sentence maintains flawless parallelism using gerund phrases on both sides of the comparison (Finding a solution is preferred over applying fixes).

18. Questions**Answer: C**

Sentence A (Incorrect): Double comparatives are grammatically wrong. "Wiser" is already a comparative adjective; adding "more" makes it redundant.

Correct: "...discuss a wiser approach..."

Sentence B (Incorrect): An adverb is required to modify the adjective "well". "Exceptional" is an adjective; it must be "exceptionally".

Correct: "...performed exceptionally well..."

Sentence C (Correct): The adverb "enough" is correctly placed after the adjective it modifies ("intelligent") and is properly followed by an infinitive ("to comprehend").

Sentence D (Incorrect): Omission of necessary prepositions. "Superior" requires the preposition "to", while "cheaper" requires "than". You cannot make "than" work for both.

Correct: "...is superior to and cheaper than the older version..."

19. Questions**Answer: E**

Sentence A (Incorrect): The phrase "By the time" combined with a future reference ("next Tuesday") requires the future perfect tense to show an action completed before a point in the future.

Correct: "...the finance team will have finished compiling..."

Sentence B (Incorrect): When "since" introduces a specific starting point in the past for an action continuing up to the present, the main clause must use the present perfect tense.

Correct: "...compliance rates have increased significantly."

Sentence C (Incorrect): Two past actions are mentioned. The sequence is: first, the regional head arrived; second, the manager ordered. The earlier action uses simple past here because "before" clarifies the

timeline, but mixing "had arrived" at the end distorts the chronology.

Correct: "...before the regional head arrived."

Sentence D (Incorrect): For an action that started in the past and is still continuing in the present, accompanied by a time duration ("for the past five years"), the present perfect continuous tense must be used, not present continuous.

Correct: "I have been working in this auditing firm..."

20. Questions

Answer: B

Sentence A (Incorrect): The pronoun is acting as the subject of the verb phrase "is selected". Therefore, the subjective pronoun "Whoever" must be used instead of the objective "Whomever".

Correct: "Whoever is selected..."

Sentence B (Correct): This sentence correctly applies the rule of inversion after the negative introductory phrase "Not only" (Not only + auxiliary verb "did" + subject "the firm" + base verb "face"). The correlative pair "but... also" is perfectly positioned.

Sentence C (Incorrect): "Let" is a transitive verb that requires objective case pronouns. "I" is subjective; it must be replaced by "me".

Correct: "Let you and me handle..."

Sentence D (Incorrect): The comparative adverb "No sooner" must be paired with the conjunction "than", not "when".

Correct: "No sooner had the monetary policy committee announced the repo rate cut than the stock market index surged."

21. Questions

Answer: B

a). Incorrect. The passage says the opposite - delay 'was not unusual enough to be noticed' and 'did not become a conversation.' It was not treated as a problem requiring reporting.

b). Correct. The passage directly states: 'A train running late did not become a conversation. A letter arriving after several days did not feel like inefficiency. A decision taking weeks was not interpreted as hesitation. It was simply how things moved.' Delay was a natural and accepted part of life.

c). Incorrect. Delay was not actively celebrated - it was simply accepted as normal. The passage does not say people praised slowness; they simply did not notice or react to it negatively.

d). Incorrect. The passage makes no such distinction between government systems and personal communication in the context of historical attitudes toward delay.

e). Incorrect. The passage does not suggest that delay was viewed negatively earlier. The entire first paragraph establishes that delay was unremarkable and uncontested in older times.

22. Questions

Answer: B

- a). Incorrect. The passage does not say fast workers always produce poor work. It says speed 'may mask' poor thinking - a possibility, not a certainty. The word 'at times' signals a nuanced position.
- b). Correct. The passage states: 'Speed, at times, may mask poor thinking, just as easily as it can signal competence.' This means quick output is not a reliable indicator of quality - it can conceal shallow thinking as easily as it can reflect genuine efficiency.
- c). Incorrect. The passage does not claim speed and quality are always inversely related. It says speed can signal competence too - the relationship is not absolute or one-directional.
- d). Incorrect. The passage does not rank slow workers as always more competent. It simply warns against automatically equating speed with competence - no such reverse ranking is implied.
- e). Incorrect. The passage discusses the same pattern in personal communication - silence being misread as avoidance - showing that speed expectations extend well beyond workplaces.

23. Questions

Answer: C

- a). Incorrect. Logistics is actually cited in the passage as one of the genuine benefits of speed: 'Logistics are efficient in ways previously unimaginable.' It is not listed as a process weakened by acceleration.
- b). Incorrect. Healthcare is mentioned as a positive gain: 'Healthcare is faster.' The passage does not suggest that faster healthcare weakens outcomes.
- c). Correct. The passage explicitly states: 'Learning does not compress neatly. Neither does recovery. Neither does trust. These are cumulative processes built through repetition, distance and time. When forced into urgency, they do not improve. They weaken.'
- d). Incorrect. Instant communication and accessible information are listed as undeniable gains of technological speed - not processes weakened by it.
- e). Incorrect. Financial transactions are not discussed in the passage in the context of processes that weaken under acceleration.

24. Questions

Answer: D

- a). Incorrect. The passage does not describe boredom as laziness or as something discouraged. It presents boredom positively - as a meaningful gap that served a cognitive function.
- b). Incorrect. The passage does not connect boredom to increased work motivation or faster output. Its value was cognitive - allowing ideas to settle and thinking to occur undisturbed.
- c). Incorrect. The passage does not say boredom was caused by slow technology. It describes boredom as a purposeful pause - a feature of earlier life, not a defect of slow systems.
- d). Correct. The passage states: 'Even boredom had structure - it was a gap between inputs, not a condition to be eliminated. That gap mattered. It allowed thinking without interruption. It allowed ideas to settle instead of reacting immediately to the next stimulus.'

e). Incorrect. Mental health is not discussed in the passage. Boredom is presented as a constructive and structured pause, not as a psychological problem.

25. Questions

Answer: C

a). Incorrect. The passage explicitly states: 'What is being eroded is not efficiency.' Efficiency is what the author rules out - not what is being lost.

b). Incorrect. Technology breakdown or error is not mentioned in the passage. The erosion described is human and behavioural, not technical.

c). Correct. The passage directly states: 'What is being eroded is not efficiency. It is tolerance. The ability to remain steady when outcomes are not immediate is weakening. And that has implications beyond convenience. It affects judgment, attention, and even the way problems are understood.'

d). Incorrect. Communication skills or the decline of writing and speaking at length are not discussed in the passage. The concern is about patience and tolerance, not verbal or written expression.

e). Incorrect. While the passage mentions that continuous activity lacks depth, creativity is not specifically identified as what is being eroded. The author's explicit answer is tolerance.

26. Questions

Answer: B

a). Sudden and dramatic Incorrect. 'Sudden and dramatic' is the direct opposite of 'cumulative', which describes something that builds up slowly and progressively over time - not something that happens all at once.

b). Built up gradually through repeated additions over time Correct. 'Cumulative' means increasing or growing by successive additions. In the passage, learning, recovery, and trust are described as cumulative - they are built gradually through repetition and time, not achieved instantly. Forcing them into urgency weakens rather than strengthens them.

c). Easily reversed and temporary Incorrect. 'Easily reversed and temporary' implies fragility and impermanence - the opposite of cumulative processes, which build up steadily and are harder to undo.

d). Dependent on a single key event Incorrect. 'Cumulative' implies the opposite - many small, repeated contributions rather than one defining moment. The passage emphasises 'repetition, distance and time' as the ingredients, not a single event.

e). Spontaneous and unplanned Incorrect. 'Spontaneous' means arising without planning or effort - the opposite of the gradual, deliberate building implied by 'cumulative.'

27. Questions

Answer: C

a). Strengthened Incorrect. 'Strengthened' is the direct antonym of 'eroded'. The passage uses 'eroded' to describe something being diminished, not built up.

b). Measured Incorrect. 'Measured' means assessed or evaluated - entirely unrelated to the meaning of 'eroded', which refers to slow degradation or loss.

- c). Gradually worn away or weakened Correct. 'Eroded' comes from erosion - the slow wearing away of something by persistent force. In the passage, tolerance is not being suddenly destroyed but is slowly weakening as speed becomes the dominant cultural standard. 'Gradually worn away or weakened' captures this precisely.
- d). Suddenly destroyed Incorrect. 'Suddenly destroyed' implies a sharp, immediate end - but 'eroded' specifically conveys a slow, gradual process of wearing away, not a sudden collapse. The passage reinforces this with the word 'weakening', not 'disappearing.'
- e). Carefully preserved Incorrect. 'Carefully preserved' is the opposite of eroded. The passage argues that tolerance is being lost, not protected or maintained.

28. Questions

Answer: B

(b) thronged, inundated

"Thronged" means to flock or gather in great numbers, which perfectly fits the scenario of excited fans filling the streets after a World Cup win.

"Inundated" means overwhelmed or flooded. Social media being "inundated with messages" is an extremely common and accurate idiomatic expression.

(a) retreated, depleted: Incorrect

"Retreated" implies backing away or hiding, which contradicts a celebratory mood. "Depleted" means used up or emptied, which makes no sense for social media messages.

(c) migrated, deprived: Incorrect

"Migrated" implies a permanent or long-term shift of location, not a temporary celebration. "Deprived" means lacking something, which is the opposite of being full of messages.

(d) rushed, scattered: Incorrect

While "rushed" is contextually okay for the first blank, "scattered" means thrown around or dispersed, which does not collocate well with "with congratulatory messages" (it should be "scattered across social media", not "platforms were scattered with messages").

(e) strolled, restricted: Incorrect

"Strolled" implies a slow, casual walk, which does not match the energetic joy of a victory. "Restricted" implies limitations, which is inaccurate for a massive wave of online messages.

29. Questions

Answer: C

(c) mandated, penalties is the Correct Answer

"Mandated" means made mandatory or officially required. The tax department makes rules mandatory to enforce compliance.

A failure to declare hidden overseas assets legally results in punishments or "penalties" (fines/jail time).

(a) rescinded, exemptions: Incorrect

"Rescinded" means revoked or cancelled. The department wouldn't cancel rules to prevent evasion.
"Exemptions" means freedom from an obligation, which contradicts the idea of preventing evasion.

(b) formulated, rewards: Incorrect

While "formulated" fits the first blank, the department will not give "rewards" to tax evaders who fail to declare assets.

(d) delayed, investigations: Incorrect

"Delayed" means postponed. Delaying rules would not help prevent tax evasion.

An investigation itself is a process, not the final punitive consequence (like fines or jail) implied by the warning.

(e) relaxed, prosecutions: Incorrect

"Relaxed" means making rules less strict, which is the opposite of trying to catch tax evaders.

"Prosecutions" means legal/court proceedings, which can be severe. However, because the first blank makes absolutely no sense contextually, the option falls apart.

30. Questions

Answer: C

(c) fortify, unprecedented is the Correct Answer

@RankZen Banker

"Fortify" means to strengthen or reinforce. The RBI would logically tell banks to strengthen their cyber security to block attacks.

"Unprecedented" means never done or known before. It perfectly describes a massive, cutting-edge surge in new AI-driven phishing methods.

(a) weaken, gradual: Incorrect

The RBI would never ask banks to "weaken" security, making this completely illogical.

"Gradual" means slow or step-by-step. The sentence highlights an urgent threat ("urged... immediately"), which contradicts the idea of a slow, easy-to-manage rise in cyberattacks.

(b) dismantle, persistent: Incorrect

"Dismantle" means to take apart or destroy. A central bank would never ask commercial banks to tear down their cybersecurity. "persistent" (continuous), this entire option fails because of the first word (dismantle). The RBI would never ask banks to tear down their cybersecurity.

(d) overhaul, negligent: Incorrect

While "overhaul" (completely revise/rebuild) could fit the first blank, "negligent" means careless. Phishing attacks can be sophisticated or dangerous, but an attack itself is not described as "negligent".

(e) neglect, alarming: Incorrect

"Neglect" means to ignore or fail to care for. The RBI would not advise banks to ignore security.

"Alarming" (worrying or disturbing) perfectly describes the dangerous rise in AI attacks. However, the

option is completely wrong because of the first word (neglect). The RBI would never tell banks to ignore their security frameworks.

31. Questions

Answer: A

(a) disrupted, relies is the Correct Answer

A technical glitch breaks or interrupts services, so "disrupted" fits perfectly.

"Relies on" is the correct grammatical idiom meaning to depend on something for success or operation.

(b) facilitated, hinges: Incorrect

"Facilitated" means to make an action or process easy or easier. A technical glitch creates a problem; it does not make online banking easier for millions of users.

"Hinges on" is a perfectly valid idiom meaning to depend entirely on something. However, the option is ruled out by the first word.

(c) enhanced, depends: Incorrect

"Enhanced" means intensified, increased, or further improved. A global cloud outage ruins service delivery; it does not improve banking services.

Modern infrastructure "depends on" digital continuity. But just like option (b), the first word is completely wrong contextually.

(d) suspended, focuses: Incorrect

"Suspended" means temporarily prevented from continuing. An outage can temporarily suspend online banking services.

"Focuses on" means to center attention or effort on something. Physical, inanimate objects like "financial infrastructure" cannot actively "focus" on a concept like digital continuity; they rely on it or depend on it to function.

(e) improved, expands: Incorrect

A technical glitch cannot "improve" services, making this choice incorrect.

"Expands on" means to add more details to a story or statement. Infrastructure does not elaborate or add details to digital continuity, making this choice completely illogical.

32. Questions

Answer: B

(b) successfully, productive is the Correct Answer

Covering the whole country ahead of schedule means the monsoon moved smoothly and "successfully."

Good, timely rain leads to a highly fertile, efficient, and "productive" sowing season for farmers.

(a) partially, volatile: Incorrect

The phrase "covering the entire subcontinent" contradicts the word "partially" (which means only in parts).

@RankZen Banker

"Volatile" means unpredictable or unstable. An early, full monsoon brings stability and certainty to farming, not volatility.

(c) barely, profitable: Incorrect

"Barely" means hardly or scarcely. If it covered the entire subcontinent ahead of schedule, it cannot be described as "barely" doing so. Contextually weak. While a good season can be profitable, the first blank completely eliminates this option.

(d) smoothly, disastrous: Incorrect

If the monsoon arrived early and smoothly, the resulting sowing season would be positive, not a "disastrous" (ruined) one.

(e) efficiently, sluggish: Incorrect

"Sluggish" means slow-moving or inactive. A timely monsoon accelerates agricultural activity; it does not make it sluggish.

@RankZen Banker
