21. Questions

In the following question, a passage has been given and followed by several questions. You are required to answer the questions based on the information provided in the passage.

India has made _____ progress in transforming its energy landscape over the past decade. From achieving near-universal household electrification and expanding access to clean cooking fuel to becoming one of the world's fastest-growing renewable energy markets, it has demonstrated a strong commitment to ensuring energy access while advancing sustainable development. As India looks ahead to the goals of energy self-reliance by 2047 and net-zero emissions by 2070, the next phase of the energy transition will require an increasingly integrated approach to planning and governance. A policy brief released by the Indian National Science Academy (INSA) in May 2026 highlights the importance of a unified national energy framework that can help align diverse energy resources, technologies and institutions towards common national objectives. The need for such an approach is evident from the scale and complexity of India's energy system. [P1] While domestic energy production [1] **expand** to [2] **continues**, there is a [3] **dependence** on imports for a significant share of oil and natural gas [4] **requirements**. At the same time, energy demand is expected to grow steadily as economic development, industrialisation and urbanisation continue. Managing these multiple priorities, energy security, affordability, sustainability and economic growth, requires coordinated planning across sectors and fuels.

[P2] Foundations through initiatives [1]/ India has already established strong [2]/ and ambitious renewable energy programmes, [3]/ the Pradhan Mantri Ujjwala Yojana, [4]/ such as the Saubhagya Scheme [5]. Renewable energy installed capacity has grown from approximately 40 GW in 2015 to approximately 260 GW by 2025, reflecting a determination to diversify the energy mix. As the energy ecosystem becomes more diverse, however, greater coordination among generation, transmission, storage, distribution and emerging technologies will become increasingly important. The INSA policy brief proposes a framework built around four mutually reinforcing pillars: adequacy, access, affordability and appropriate sustainability.

First, adequacy focuses on ensuring reliable and diversified energy supplies through a balanced portfolio of conventional and emerging energy sources, supported by modern infrastructure, energy storage and digital

technologies. The objective is to strengthen energy resilience while reducing long-term vulnerabilities. Second, access emphasises reliable and equitable energy services for all citizens. Building on the country's achievements in electrification and clean cooking access, the framework **advocates** strengthening last-mile delivery, improving service quality and expanding decentralised energy solutions where appropriate. Third, affordability recognises that a successful energy transition must remain economically viable for households, businesses and industries. The framework highlights the role of innovative financing mechanisms, efficient markets and consumer-focused safeguards in supporting an inclusive transition. The fourth pillar, appropriate sustainability, underscores the importance of pursuing sustainability in a manner that is aligned with India's developmental priorities and resource endowments. Rather than adopting a one-size-fits-all approach, the framework advocates solutions that reflect India's unique social, economic and environmental context. This includes support for local communities, workforce development and region-specific transition pathways.

Which of the following is the synonym of the word "advocates" as used in the passage?

- a. elucidates
- b. supports
- c. Both A and B
- d. stomps
- e. thrills

22. Questions

Which of the following statements is/are CORRECT according to the passage?

- I). The INSA framework proposes four interconnected pillars for India's future energy planning.
 - II). The pillar of affordability focuses only on reducing electricity prices for households.
 - III). Appropriate sustainability encourages solutions suited to India's own developmental needs.
- a. Both I and II
 - b. Both II and III
 - c. Both I and III
 - d. Only III
 - e. All I, II and III

23. Questions

Which of the following questions can be answered directly from the passage?

- 1). Which four pillars form the basis of the proposed INSA energy framework?
 - 2). What percentage of India's future electricity will come from solar energy in 2047?
 - 3). What will be India's annual expenditure on clean energy after 2040?
- a. All 1, 2 and 3

- b. Only 3
- c. Both 2 and 3
- d. Only 1
- e. Both 1 and 2

24. Questions

Which of the following best explains why the passage describes the four proposed pillars as "mutually reinforcing"?

- a. Success in one area can support progress in the remaining areas of the energy framework.
- b. Each pillar functions independently and does not influence the others.
- c. The pillars are intended only for renewable energy projects.
- d. Every pillar focuses solely on reducing energy imports.
- e. None of these

25. Questions

Which of the following can be inferred from the passage?

- a. India's future energy transition depends only on increasing renewable power generation.
- b. Effective energy planning requires attention to infrastructure as well as governance.
- c. Conventional energy sources will disappear within the next two decades.
- d. Economic development can continue without increasing energy consumption.
- e. Imported fuels are expected to become India's only major energy source.

26. Questions

Which of the following statements is/are INCORRECT according to the passage?

I). The passage suggests that India's future energy planning should integrate multiple sectors and institutions.

II). Appropriate sustainability requires solutions that reflect India's own social and economic realities.

III). The framework recommends applying identical transition strategies across all regions of India.

- a. All I, II and III
- b. Both I and II
- c. Only I
- d. Only II
- e. Only III

27. Questions

The sentence marked as P1 has four highlighted words. These words may/may not be placed in their correct order. Swap the words among them and place them in the correct order to form a grammatically and contextually meaningful sentence.

"Advocates" means supports, recommends or argues in favour of a particular idea or course of action.

- **Elucidate:** to make clear.
- **Stomp:** to walk or step heavily and noisily
- **Thrill:** to excite.

22. Questions

Answer: C

Statement I: The framework is built around four mutually reinforcing pillars.

Statement II: Affordability includes households, businesses, industries, financing mechanisms and consumer safeguards, not merely electricity prices.

Statement III: The passage explicitly supports sustainability suited to India's own social, economic and environmental circumstances.

23. Questions

Answer: D

The passage explicitly lists the four pillars: adequacy, access, affordability and appropriate sustainability.

- **Option 2:** No projected percentage for 2047 is provided.
- **Option 3:** Future expenditure estimates are not discussed.

24. Questions

Answer: A

The framework presents adequacy, access, affordability and sustainability as interconnected objectives that together strengthen India's energy system.

B). Each pillar functions independently and does not influence the others.

Opposite of "mutually reinforcing."

C). The pillars are intended only for renewable energy projects.

The framework covers the entire energy ecosystem, not only renewable energy.

D). Every pillar focuses solely on reducing energy imports.

Import dependence is only one aspect of energy security.

@RankZen Banker

25. Questions

Answer: B

The passage repeatedly stresses coordination among infrastructure, institutions, technologies and policies, indicating that governance and infrastructure must progress together.

- **Option A:** The passage discusses renewable energy but also highlights storage, transmission, affordability and conventional energy.
- **Option C:** No timeline for eliminating conventional energy is suggested.
- **Option D:** The passage links economic growth with rising energy demand.
- **Option E:** The passage promotes diversification and domestic energy expansion, not greater

dependence on imports.

26. Questions

Answer: E

Statement I is correct because the passage advocates a unified national energy framework.

Statement II is correct since the fourth pillar stresses context-specific solutions.

Statement III is incorrect because the passage rejects a one-size-fits-all approach.

27. Questions

Answer: C

The correct order is 2134.

Corrected sentence:

While domestic energy production continues to expand, there is a dependence on imports for a significant share of oil and natural gas requirements.

28. Questions
