

1. Questions

In the following questions, three sentences are given each indicating a missing word. Choose the most appropriate word from the options given below which fits all the blanks correctly, changing its form as grammatically and contextually required.

I). The technical committee was set up to _____ the structural integrity of the bridge after the flash floods.

II). The taxation department will thoroughly _____ the financial statements of the startup for any discrepancies.

III). The invigilator walked down the aisles to _____ the candidate verification documents and hall tickets.

- a. overlook
- b. analyze
- c. observe
- d. scrutinize
- e. audit

2. Questions

I). The lead actor's powerful performance did _____ a standing ovation from the notoriously critical opening-night audience.

II). Investigative journalists often uncover confidential memos that _____ sharp criticism from corporate governance panels.

III). Complex tax codes frequently _____ confusion among small business owners who cannot afford dedicated accounting teams.

- a. elicit
- b. cause
- c. provoke
- d. generate
- e. extract

@RankZen Banker

3. Questions

I). The filtration system works by _____ impurities from water, making it safe for drinking and daily use.

II). To prevent burnout, clinical psychologists advise working professionals to practice _____ their personal lives from their high-stress careers.

III). Teachers are _____ students into groups based on performance levels for more effective

classroom learning activities.

- a. disconnecting
- b. detaching
- c. isolating
- d. dividing
- e. separating

4. Questions

I). The nurse kept a _____ hand while administering the injection to avoid causing unnecessary pain to the patient.

II). The economy showed _____ growth over the past five years, reflecting improved industrial and service performance.

III). He spoke in a calm and _____ voice during the interview, despite facing difficult and unexpected questions.

- a. steady
- b. strong
- c. heavy
- d. force
- e. power

5. Questions

I). The historical drama series was highly praised for its visually stunning and historically _____ costumes.

II). The automated accounting software ensures that all tax computations are perfectly _____ and compliant with current laws.

III). _____ translation of legal documents is essential to prevent misunderstandings in international business agreements and contracts.

- a. correct
- b. right
- c. accurate
- d. detailed
- e. present

@RankZen Banker

6. Questions

In each of the following questions, a sentence divided into four parts. One of these parts may

contain an error. Choose the incorrect part as your answer. If the given sentence is correct, mark option (e) as your answer.

Local homestays in high-altitude Himalayan villages (A)/ offer international visitors an authentic (B)/ taste of traditional hospitality while (C)/ boost the sustainable rural economy significantly. (D)

- a. A
- b. B
- c. C
- d. D
- e. No error

7. Questions

Public health campaigns focusing on prevention (A)/ lifestyle modifications have proven (B)/ to be incredibly effective at reducing (C)/ the long-term burden of chronic diseases. (D)

- a. A
- b. B
- c. C
- d. D
- e. No error

8. Questions

Verifying your account credentials through (A)/ two-factor authentication adds an (B)/ essential layer of security (C)/ against sophisticatedly online phishing attempts. (D)

- a. A
- b. B
- c. C
- d. D
- e. No error

@RankZen Banker

9. Questions

The discovery of liquid water oceans (A)/ beneath the icy crusts of distant moons (B)/ has been fundamentally shifted our (C)/ search for extraterrestrial life forms. (D)

- a. A
- b. B
- c. C

- d. D
- e. No error

10. Questions

Developing affordable, portable diagnostic devices (A)/ is crucial for improving healthcare delivery (B)/ in underserved rural areas where (C)/ formal medical infrastructure is severely lacking. (D)

- a. A
- b. B
- c. C
- d. D
- e. No error

11. Questions

In each of the questions given below, a sentence is given with four highlighted words. These words may or may not be correctly placed in the sentence. Identify the words that are incorrectly placed and need to be interchanged with other highlighted words to make the sentence correct and meaningful. If the given sentence is already correct, mark option (e) as your answer.

Behavioral (A) **individuals** studies how psychological factors (B) **influence** financial decisions made by (C) **economics** in everyday market (D) **transactions** globally.

- a. C-D
- b. B-D
- c. A-C
- d. A-B
- e. No interchange required

12. Questions

Ocean plastic recycling technologies are (A) **evolving** rapidly to (B) **components** waste materials into (C) **usable** industrial products and construction (D) **convert**.

@RankZen Banker

- a. A-D
- b. B-D
- c. C-D
- d. A-B
- e. No interchange required

13. Questions

Savings schemes (A) **offered** by banks (B) **encourage** individuals to develop disciplined (C) **financial** habits for future (D) **security** and stability.

- a. A-B
- b. B-D
- c. C-D
- d. A-C
- e. No interchange required

14. Questions

Virtual (A) **unavailable** classrooms allow students from (B) **remote** villages to experience (C) **interactive** learning environments previously (D) **reality** in traditional schools.

- a. A-D
- b. C-D
- c. A-B
- d. A-C
- e. No interchange required

15. Questions

Urban rooftop farming (A) **initiatives** are gradually (B) **sustainable** city landscapes by providing (C) **changing** food sources and improving air quality (D) **significantly**.

- a. A-B
- b. C-D
- c. A-D
- d. B-C
- e. No interchange required

16. Questions

@RankZen Banker

In the following questions two columns are given containing three Sentences/phrases each. In first column, sentences/phrases are A, B and C and in the second column the sentences/phrases are D, E and F. A sentence/phrase from the first column may or may not connect with another sentence/phrase from the second column to make a grammatically and contextually correct sentence. Each question has five options, four of which display the sequence(s) in which the sentences/phrases can be joined to form a grammatically and contextually correct sentence. If none the options given forms a correct sentence after combination, mark option (E), i.e. “None of these” your answer.

Column I	Column II
A). Banking regulations tighten periodically,	D). so urban commuting becomes faster and more efficient daily.
B). Cloud computing services scale rapidly,	E). yet financial innovation continues to expanding rapidly.
C). Metro networks expand quickly,	F). and businesses store data more securely across platforms.

- a. Only A-E
- b. Only B-D
- c. Both B-F & C-D
- d. A-D, B-F & C-E
- e. None of these

17. Questions

Column I	Column II
A). Social awareness campaigns spread widely,	D). so disease outbreaks become less frequent in communities.
B). Community welfare programs grow steadily,	E). and public participation in civic issues improves gradually.
C). Vaccination drives increase immunity levels,	F). while volunteers contribute actively to social development work.

- a. Both A-D & C-E
- b. Only A-D
- c. Only B-E
- d. A-E, B-F & C-D
- e. None of these

18. Questions

Column I	Column II
A). Whenever emergency warnings appeared,	D). consumers remains cautious about discretionary spending.
B). Schools introduced coding classes	E). so that students could developed practical digital skills.
C). Even though inflation slowed,	F). residents followed evacuation procedures without unnecessary delays.

- a. Only C-D
- b. Only A-F
- c. Both B-E & C-D
- d. A-D, B-E & C-F
- e. None of these

19. Questions

Column I	Column II
A). Unless revision is consistent,	D). mental health awareness programs gain importance.
B). Because plastic waste accumulates rapidly,	E). marine ecosystems suffer severe long-term damage.
C). Since stress levels remain high,	F). exam performance may decline despite classroom attendance.

- a. Both B-F & C-D
- b. Both A-F & C-E
- c. A-F, B-E & C-D
- d. A-D, B-F & C-E
- e. None of these

20. Questions

Column I	Column II
A). Human decision-making processes involves complex emotional	D). local development projects achieve faster completion rates.
B). When communities cooperate effectively,	E). for conservative investors in banking systems.
C). Fixed deposits offer stable returns	F). and cognitive interactions constantly.

- a. Only A-D
- b. Only C-E
- c. Both A-F & B-D
- d. Both B-D & C-E
- e. None of these

21. Questions

Read the following passage and answer the following questions.

Museums have long served as the custodians of human civilisation, safeguarding objects, artworks, and documents that might otherwise be lost to the passage of time. By collecting and conserving artefacts from different eras, they create a tangible link between the present generation and its predecessors. This connection is especially significant in regions where rapid modernisation threatens to erase centuries of cultural identity. A well-maintained museum does not merely display the past; it actively interprets and communicates it to a diverse audience.

The process of preservation within a museum involves far more than simply placing objects behind glass. Conservators employ advanced techniques such as climate control, chemical stabilisation, and digital documentation to prevent the **deterioration** of fragile items. Many institutions have also embraced three-dimensional scanning and virtual reality to create detailed replicas that can be studied without risking damage to the originals. These technological interventions ensure that even the most vulnerable pieces remain accessible to researchers, students, and the general public for generations to come.

Beyond their role as **repositories** of physical objects, museums contribute substantially to education and community engagement. Guided tours, interactive exhibitions, and outreach programmes bring historical narratives to life in ways that textbooks alone cannot achieve. Schools frequently partner with museums to supplement their curricula, offering students first-hand encounters with primary sources that deepen their understanding of history, science, and the arts. This collaborative approach transforms museums from passive storehouses into dynamic centres of learning and dialogue.

Nevertheless, museums face considerable challenges in fulfilling their mandate in the contemporary world. Funding constraints, debates over the repatriation of culturally sensitive artefacts, and the need to remain relevant to younger, digitally oriented audiences all demand constant adaptation. Institutions that succeed

in balancing the imperatives of conservation with those of public accessibility tend to earn lasting trust within their communities. The enduring value of a museum lies not only in what it preserves but in how effectively it shares that knowledge with the world.

According to the passage, which technique is used to prevent the deterioration of fragile museum items?

- a. Public handling sessions supervised by trained staff
- b. Replacing original artefacts with mass-produced duplicates
- c. Storing artefacts in underground vaults away from visitors
- d. Chemical stabilisation and climate control
- e. Transferring ownership of artefacts to private collectors

22. Questions

How do museums contribute to education, according to the passage?

- a. By granting students access to classified government archives
- b. By distributing free textbooks to schools in partnership programmes
- c. By offering guided tours, interactive exhibitions, and outreach programmes
- d. By training teachers in specialised historical research methods
- e. By replacing science laboratories with historical artefact collections

23. Questions

The word "repositories" in the passage most closely means:

- a. Exhibition halls designed for live performances
- b. Places where things are stored or kept for future use
- c. Government agencies that oversee cultural policies
- d. Online platforms for sharing digital content
- e. Research laboratories conducting scientific experiments

@RankZen Banker

24. Questions

What does the passage suggest about museums that balance conservation and public accessibility?

- a. They tend to earn lasting trust within their communities
- b. They are more likely to receive international heritage awards
- c. They attract larger government subsidies than other institutions
- d. They are able to avoid the repatriation of artefacts entirely
- e. They eventually become independent of any public funding

25. Questions

Choose the word most nearly Opposite in meaning to "deterioration" as used in the passage.

- a. Decline
- b. Fragmentation
- c. Backing
- d. Improvement
- e. Accumulation

26. Questions

According to the passage, what ultimately determines the enduring value of a museum?

- a. The size and rarity of its artefact collection
- b. The number of countries it has partnerships with
- c. Its ability to preserve artefacts and effectively share that knowledge with the world
- d. The frequency with which it updates its exhibitions and galleries
- e. Its success in securing artefacts before they are claimed through repatriation

27. Questions

What does the passage imply about the role of technology in museums?

- a. Technology has made the physical preservation of artefacts unnecessary
- b. Technology is used primarily to entertain visitors rather than serve academic purposes
- c. Technology has caused museums to shift their focus away from original artefacts
- d. Only wealthy institutions can afford to adopt technological preservation methods
- e. Technology supports both the preservation and wider accessibility of artefacts

28. Questions

Choose the word closest in meaning to "CONSERVATION" as used in the passage.

- a. Restoration
- b. Preservation
- c. Renovation
- d. Exhibition
- e. Documentation

29. Questions

In each of the following questions, a word has been given and used in three statements. You are supposed to identify which of the statements(s) use(s) the word correctly and mark that as your answer.

Alliance

- I). Our company entered a strategic **alliance** with a tech firm to develop new software.
- II). She decided to **alliance** her broken car by taking it to a local mechanic.
- III). The environmental groups built a broad **alliance** to campaign against the destructive new pipeline.
- a. Both I & III
 - b. Both II & III
 - c. Only II
 - d. Only I
 - e. All I, II & III

30. Questions

Auction

- I). She poured a cold glass of fresh apple **auction** to refresh herself after running.
- II). The heavy rain started to **auction** down just as we left the office building.
- III). The historic estate was put up for **auction** after the family failed to pay taxes.
- a. Both I & III
 - b. Only I
 - c. Both I & II
 - d. All I, II & III
 - e. Only III

31. Questions

Hurdle

@RankZen Banker

- I). Clearing the strict document verification process is the final **hurdle** before getting the job.
- II). High interest rates remain a major **hurdle** for young couples trying to buy homes.
- III). The atmospheric entry is always the most dangerous **hurdle** for any returning spacecraft.
- a. Both I & II
 - b. All I, II & III
 - c. Only I
 - d. Both I & III

e. Both II & III

32. Questions

Crisis

I). Efficient leadership is absolutely essential for guiding a major corporation through an unexpected public **crisis**.

II). You should **crisis** the document carefully to look for any hidden grammatical spelling errors.

III). She forgot to pack her favorite leather **crisis** for the weekend trip to the hills.

- a. Only II
- b. Only III
- c. All I, II & III
- d. Only I
- e. Both II & III

Explanations:

1. Questions

Answer: D

Option (d) fits all three perfectly:

I). ... to scrutinize the structural integrity... (thorough examination)

II). ... will thoroughly scrutinize the financial statements... (close, detailed check)

III). ... to scrutinize the candidate verification documents... (careful verification)

Why not the others?

- Overlook (a) means ignore, which is opposite in meaning.
- Analyze (b) is too formal for the invigilator checking hall tickets.
- Observe (c) is too passive.
- Audit (e) is specific to financial accounts and doesn't suit a bridge or exam documents.

2. Questions

Answer: A

Option (a) fits all three sentences perfectly:

I). ... did elicit a standing ovation... (draw out / evoke a positive response)

II). ... that elicit sharp criticism... (draw out / provoke a reaction)

III). ... frequently elicit confusion... (give rise to / cause to emerge)

Why not the others?

- Provoke (c) works for II and III but sounds unnatural for a *positive* standing ovation.
- Cause (b) and generate (d) are too generic and less precise.
- Extract (e) doesn't collocate naturally with ovation or confusion.

3. Questions

Answer: E

Option (e) fits all three sentences perfectly:

I). The filtration system works by separating impurities from water, making it safe for drinking and daily use. (standard technical process)

II). ... practice separating their personal lives from their high-stress careers. (common phrasing for boundaries)

III). Teachers are separating students into groups based on performance levels... (organizing by dividing into distinct groups)

Why not the others?

- Dividing (d) works best for III but sounds less natural for the filtration process in I and work-life boundaries in II.
- Isolating (c) has a negative tone and doesn't fit the neutral grouping in III as well.
- Disconnecting (a) and detaching (b) feel mechanical or awkward in the educational and psychological contexts.

4. Questions

Answer: A

Option (a) fits all three sentences perfectly:

I). The nurse kept a steady hand while administering the injection... (idiomatic expression for a stable, controlled hand)

II). The economy showed steady growth over the past five years... (standard economic phrasing for consistent progress)

III). He spoke in a calm and steady voice during the interview... (indicating composure and even tone)

Why not the others?

- Strong (b) could loosely fit III ("strong voice") but doesn't work well for I ("strong hand" has a different meaning) or II.
- Heavy (c), force (d), and power (e) create unnatural or incorrect collocations in most or all of the sentences.

5. Questions

Answer: C

Option (c) fits all three sentences perfectly:

I). ... historically accurate costumes. (faithfully representing the historical period)

@RankZen Banker

II). ... perfectly accurate and compliant with current laws. (precise and error-free)

III). Accurate translation of legal documents is essential... (precise and reliable rendering)

Why not the others?

- Correct (a) and right (b) are similar but less commonly used than "accurate" in professional, historical, and legal precision contexts.
- Detailed (d) emphasizes thoroughness but not necessarily correctness/precision.
- Present (e) does not function well as an adjective in these contexts.

6. Questions

Answer: D

The verb form "boost" breaks the parallel structure and grammatical flow established by the conjunction "while".

When using "while" to connect a simultaneous action or consequence in this context, it needs to be followed by a gerund (V+ing) or a full clause (while they boost...). Since there is no subject pronoun following "while", we must use the gerund form "boosting" to make the modifier correct.

Correct sentence: Local homestays in high-altitude Himalayan villages offer international visitors an authentic taste of traditional hospitality while **boosting** the sustainable rural economy significantly.

7. Questions

Answer: A

The noun "prevention" cannot directly modify another noun phrase like "lifestyle modifications" in this manner. It breaks the grammatical connection.

To correct it, we must change the noun to its adjective form, "preventive", so it can properly modify the noun phrase.

Correct sentence: Public health campaigns focusing on **preventive** lifestyle modifications have proven to be incredibly effective at reducing the long-term burden of chronic diseases.

8. Questions

Answer: D

The adverb "sophisticatedly" is used incorrectly here. It is positioned to modify the compound noun phrase "online phishing attempts." An adverb cannot directly modify a noun. Instead, we need the adjective form "sophisticated" to properly describe the nature of the phishing attempts.

Correct sentence: Verifying your account credentials through two-factor authentication adds an essential layer of security against **sophisticated** online phishing attempts.

9. Questions

Answer: C

The phrase "has been fundamentally shifted" incorrectly uses the passive voice construction (has been + past participle).

The subject of the sentence, "The discovery of liquid water oceans", is the agent doing the action—it is the

discovery itself that changed our search. Therefore, the sentence requires the active voice in the present perfect tense ("has fundamentally shifted").

Correct sentence: The discovery of liquid water oceans beneath the icy crusts of distant moons **has fundamentally shifted** our search for extraterrestrial life forms.

10. Questions

Answer: E

Singular Subject & Verb: The main subject is the action of "Developing" (a singular gerund), which correctly pairs with the singular verb "is".

Correct Modifier: The word "where" is used correctly to describe a location ("rural areas").

Perfect Agreement: The singular noun "infrastructure" properly matches with "is".

11. Questions

Answer: C

The sentence opens with the phrase "Behavioral individuals", which doesn't make sense as the subject that "studies" market factors.

Later in the sentence, we see "made by economics". Decisions are made by people (individuals), not by an academic field (economics).

If we swap A and C:

A becomes economics, giving us the correct opening subject: "Behavioral economics studies..."

C becomes individuals, giving us the correct logical agent: "...decisions made by individuals..."

Correct sentence: Behavioral **economics** studies how psychological factors **influence** financial decisions made by **individuals** in everyday market **transactions** globally.

12. Questions

Answer: B

The sentence begins correctly with "Ocean plastic recycling technologies are evolving rapidly...", which is grammatically and contextually appropriate.

However, the phrase "to components waste materials" is incorrect because components cannot function as a verb in this structure. The correct verb should be convert, which appears at (D).

Later, "construction convert" is incorrect because convert is needed earlier in the sentence, not at the end.

If we swap B and D:

B becomes convert, giving the correct structure: "to convert waste materials..."

D becomes components, correctly placed at the end: "...construction components."

Correct sentence: Ocean plastic recycling technologies are **evolving** rapidly to **convert** waste materials into **usable** industrial products and construction **components**.

13. Questions

Answer: E

A = offered → correctly used to describe savings schemes.

B = encourage → correctly functions as the main verb of the sentence.

C = financial → correctly modifies “habits.”

D = security → correctly forms the phrase “future security and stability.”

Each word is already in its correct position, and the sentence is grammatically and logically sound without any interchange.

14. Questions

Answer: A

The sentence begins with the phrase “Virtual unavailable classrooms”, which is incorrect because unavailable does not correctly modify “Virtual classrooms.” The intended meaning requires a valid educational concept, virtual reality classrooms.

Later in the sentence, “previously reality in traditional schools”, which is also incorrect because reality should be paired with “virtual,” not with “previously.”

If we swap A and D:

A becomes reality, giving the correct phrase: “Virtual reality classrooms...”

D becomes unavailable, giving the correct structure: “...previously unavailable in traditional schools.”

Correct sentence: Virtual **reality** classrooms allow students from **remote** villages to experience **interactive** learning environments previously **unavailable** in traditional schools.

15. Questions

Answer: D

The sentence begins with the phrase “Urban rooftop farming initiatives are gradually sustainable city landscapes”, which is incorrect because sustainable does not function correctly as a verb in this structure. The sentence requires a verb like changing to describe the transformation of city landscapes.

Later, we see “providing (C) changing food sources”, which is also incorrect because changing should describe the city landscapes, not the food sources.

If we swap B and C:

B becomes changing, giving the correct phrase: “...are gradually changing city landscapes...”

C becomes sustainable, giving the correct phrase: “...providing sustainable food sources...”

Correct sentence: Urban rooftop farming **initiatives** are gradually **changing** city landscapes by providing **sustainable** food sources and improving air quality **significantly**.

16. Questions

Answer: C

A + E

@RankZen Banker

"Banking regulations tighten periodically, yet financial innovation continues to expanding rapidly."

Incorrect – grammatical error ("continues to expanding" should be "continue to expand/expanding").

B + F

"Cloud computing services scale rapidly, and businesses store data more securely across platforms."

Correct – grammatically and contextually sound.

C + D

"Metro networks expand quickly, so urban commuting becomes faster and more efficient daily."

Correct – logical and grammatically correct.

17. Questions

Answer: D

A + E

"Social awareness campaigns spread widely, and public participation in civic issues improves gradually."

Correct – Grammatically and contextually sound, as campaigns directly drive public participation.

B + F

"Community welfare programs grow steadily, while volunteers contribute actively to social development work."

Correct – Logical and grammatically correct, linking community programs with volunteer contribution.

C + D

"Vaccination drives increase immunity levels, so disease outbreaks become less frequent in communities."

Correct – Correct cause-and-effect relationship and grammatically perfect.

18. Questions

Answer: B

A + F

"Whenever emergency warnings appeared, residents followed evacuation procedures without unnecessary delays."

Correct – Grammatically and contextually sound, maintaining consistent past tense ("appeared" and "followed").

B + E

"Schools introduced coding classes so that students could developed practical digital skills."

Incorrect – Grammatical error (the modal verb "could" must be followed by the base verb "develop", not the past tense "developed").

C + D

@RankZen Banker

"Even though inflation slowed, consumers remains cautious about discretionary spending."

Incorrect – Grammatical error (plural subject "consumers" requires the plural verb "remain", not the singular "remains").

19. Questions

Answer: C

A + F

"Unless revision is consistent, exam performance may decline despite classroom attendance."

Correct – Grammatically and contextually sound, establishing a logical conditional relationship between lack of revision and declining performance.

B + E

"Because plastic waste accumulates rapidly, marine ecosystems suffer severe long-term damage."

Correct – Grammatically correct with a clear, logical cause-and-effect relationship.

C + D

"Since stress levels remain high, mental health awareness programs gain importance."

Correct – Contextually logical and grammatically perfect, showing why the awareness programs are becoming more important.

20. Questions

Answer: D

A + F

"Human decision-making processes involves complex emotional and cognitive interactions constantly."

Incorrect – Grammatical error (plural subject "processes" requires the plural verb "involve", not the singular "involves").

B + D

"When communities cooperate effectively, local development projects achieve faster completion rates."

Correct – Grammatically correct and contextually logical.

C + E

"Fixed deposits offer stable returns for conservative investors in banking systems."

Correct – Grammatically sound and contextually meaningful.

21. Questions

Answer: D

The passage states that conservators use advanced preservation methods such as climate control and chemical stabilisation to protect fragile items from deterioration. This directly supports option (d).

Why others are wrong:

@RankZen Banker

- (a). The passage does not mention public handling sessions; instead, it focuses on controlled preservation techniques.
- (b). It explicitly says museums preserve original artefacts, not replace them with duplicates as a standard method.
- (c). While protection is important, the passage does not describe storing artefacts in underground vaults or isolating them from visitors.
- (e). The passage emphasizes preservation within museums, not transferring ownership to private collectors.

22. Questions

Answer: C

Museums contribute to education by providing engaging and interactive learning experiences that help students understand history and culture beyond textbooks. The passage clearly states that guided tours, interactive exhibitions, and outreach programmes bring historical narratives to life and support school curricula. This directly supports option (c).

Why others are wrong:

- (a). The passage does not mention access to classified government archives being provided to students.
- (b). There is no reference to museums distributing free textbooks to schools through partnership programmes.
- (d). The passage does not state that museums train teachers in specialised historical research methods; it focuses on student learning experiences instead.
- (e). The passage does not suggest replacing science laboratories with museum collections; instead, museums function as supplementary educational resources.

23. Questions

Answer: B

The passage describes museums as “repositories of physical objects,” meaning they are places where artefacts and items are preserved and stored for future generations. This directly supports option (b).

Why others are wrong:

- (a). The passage does not refer to performance spaces; museums are not described as exhibition halls for live shows.
- (c). There is no mention of government agencies or administrative bodies in this context.
- (d). The passage does not refer to online platforms; “repositories” here is used in a physical preservation sense.
- (e). Museums are not described as scientific laboratories conducting experiments; their role is preservation and education.

24. Questions

Answer: A

@RankZen Banker

Museums that balance conservation with public accessibility are described as being more effective in maintaining their role in society. The passage clearly states that institutions which successfully balance conservation with accessibility tend to earn lasting trust within their communities. This directly supports option (a).

Why others are wrong:

- (b). The passage does not mention international heritage awards as a result of this balance.
- (c). There is no reference to government subsidies increasing based on this factor.
- (d). The passage does not suggest that such museums can avoid repatriation issues entirely; it lists repatriation as a general challenge.
- (e). The passage does not state that museums become independent of public funding; funding constraints are mentioned as an ongoing challenge.

25. Questions

Answer: D

The passage uses “deterioration” to mean the gradual decline or damage of fragile museum items over time. The word most nearly opposite in meaning is “improvement,” which refers to a positive change or enhancement rather than decay. This directly supports option (d).

Why others are wrong:

- (a). “Decline” is similar in meaning to deterioration, not opposite.
- (b). “Fragmentation” refers to breaking into parts, which aligns with deterioration rather than opposing it.
- (c). “Backing” means support or endorsement, which is unrelated to the condition of objects.
- (e). “Accumulation” refers to gathering or increasing, which does not express the opposite of decay.

26. Questions

Answer: C

The passage clearly states that the enduring value of a museum lies not only in what it preserves but in how effectively it shares that knowledge with the world. This directly supports option (c).

Why others are wrong:

- (a). The passage does not state that the size or rarity of collections determines a museum’s value.
- (b). There is no mention of international partnerships as a measure of enduring value.
- (d). While updating exhibitions may help relevance, the passage does not identify it as the key determinant of value.
- (e). The passage mentions repatriation as a challenge, not as a factor defining a museum’s worth.

27. Questions

Answer: E

The passage clearly states that museums use technologies such as climate control, chemical stabilisation,

digital documentation, three-dimensional scanning, and virtual reality to prevent deterioration and make artefacts accessible for study without damaging the originals. This directly supports option (e).

Why others are wrong:

- (a). The passage does not suggest that technology replaces or makes physical preservation unnecessary; it actually supports preservation.
- (b). There is no claim that technology is mainly for entertainment; it is used for preservation and education.
- (c). The passage does not say museums shift away from original artefacts; instead, it emphasizes protecting and studying them.
- (d). The passage does not mention cost barriers or limit technological use to wealthy institutions.

28. Questions

Answer: B

The passage uses “conservation” in the context of protecting and maintaining artefacts so that they do not deteriorate over time. The word most nearly closest in meaning is “preservation,” which refers to the act of keeping something in its original condition and preventing damage. This directly supports option (b).

Why others are wrong:

- (a). “Restoration” refers to repairing something that has already been damaged, not preventing damage in the first place.
- (c). “Renovation” usually applies to buildings and means improving or updating them, not preserving artefacts.
- (d). “Exhibition” refers to the display of items, not their protection or maintenance.
- (e). “Documentation” means recording information, which is only one part of museum work but not the meaning of conservation.

29. Questions

Answer: A

The word “alliance” is a noun meaning a partnership or association formed for mutual benefit.

Let’s check each sentence:

I). Our company entered a strategic alliance with a tech firm to develop new software.

Correct — used properly as a business partnership.

II). She decided to alliance her broken car by taking it to a local mechanic.

Incorrect — “alliance” cannot be used as a verb; the sentence is grammatically wrong.

III). The environmental groups built a broad alliance to campaign against the destructive new pipeline.

Correct — properly used to mean a cooperative group.

30. Questions

@RankZen Banker

Answer: E

The word “auction” is a noun meaning a public sale where items are sold to the highest bidder.

Let’s check each sentence:

I). She poured a cold glass of fresh apple auction to refresh herself after running.

Incorrect — “auction” is not a type of drink; context is wrong.

II). The heavy rain started to auction down just as we left the office building.

Incorrect — the correct word is “pour” or “come down,” not “auction.”

III). The historic estate was put up for auction after the family failed to pay taxes.

Correct — properly used as a public sale.

31. Questions

Answer: B

The word “hurdle” means an obstacle or difficulty that must be overcome.

Let’s check each sentence:

I). Clearing the strict document verification process is the final hurdle before getting the job.

Correct — used as an obstacle in a process.

II). High interest rates remain a major hurdle for young couples trying to buy homes.

Correct — used properly as a financial difficulty.

III). The atmospheric entry is always the most dangerous hurdle for any returning spacecraft.

Correct — used appropriately to describe a critical challenge.

32. Questions

Answer: D

The word “crisis” means a time of intense difficulty, danger, or serious trouble.

Let’s check each sentence:

I). Efficient leadership is absolutely essential for guiding a major corporation through an unexpected public crisis.

Correct — “crisis” is properly used to mean a difficult situation.

II). You should crisis the document carefully to look for any hidden grammatical spelling errors.

Incorrect — “crisis” is a noun, not a verb. The correct word would be “scrutinize” or “check.”

III). She forgot to pack her favorite leather crisis for the weekend trip to the hills.

Incorrect — “crisis” is not an object or item like luggage.
