

1. Questions

In the following questions, five sentences are provided. Choose the sentence that contains error.

- A). Hardly had the rescue team arrived when the fire spread further.
- B). The river is as clean as it was last winter.
- C). Each of the rescued birds were released only after a thorough medical examination.
- D). Travel experts advise maintaining consistent sleep habits even during vacations to avoid post-travel fatigue.
- E). Given the prolonged drought, officials introduced stricter groundwater regulations.

- a. A
- b. B
- c. C
- d. D
- e. E

2. Questions

- A). Economists suggest that a moderate fiscal deficit can support growth if funds are used effectively.
- B). No sooner did the rain stop then children returned to the playground.
- C). The road is wide enough to handle heavy traffic.
- D). Hemant insisted on paying the entire bill despite the fact that it was not his responsibility at all.
- E). Work-life balance is essential for maintaining both physical and emotional health.

- a. A
- b. B
- c. C
- d. D
- e. E

@RankZen Banker

3. Questions

- A). Had the warning reached earlier, the villagers would evacuate safely.
- B). Water management is becoming increasingly important as urban demand continues to rise.
- C). Fiscal discipline is important to ensure that public finances remain sustainable over time.
- D). The crops would have survived if irrigation had arrived earlier.
- E). Maintaining a healthy lifestyle requires a balanced diet, regular exercise, and adequate rest.

- a. A
- b. B
- c. C
- d. D
- e. E

4. Questions

- A).** The scientist insisted that every sample be examined twice before publication.
- B).** Unless industrial emissions decline, glaciers will continue to retreat at an alarming pace.
- C).** Not only did the campaign reduce litter, but it also inspired volunteers.
- D).** Experts caution that short-term economic gains must not come at the cost of long-term environmental stability.
- E).** All are correct

- a. A
- b. B
- c. C
- d. D
- e. E

5. Questions

- A).** The expedition was too exhausting for the youngest volunteer so complete without assistance.
- B).** The museum, which houses rare coins, reopened yesterday.
- C).** Either the guide or the tourists are carrying the first-aid kit.
- D).** Each of the seedlings was watered regularly.
- E).** A balanced approach is needed to manage the fiscal deficit without slowing economic growth.

- a. A
- b. B
- c. C
- d. D
- e. E

6. Questions

In the given sentences, certain words are in bold and numbered from 1 to 4, which are the possible

pairs to be arranged. Choose the pair(s) of words that need(s) to be arranged to make the sentence grammatically correct and meaningful.

Scientists studying animal behaviour [1] **discover** to [2] **continue** complex [3] **forms** of communication among various [4] **species**.

- a. 4231
- b. 1243
- c. 2134
- d. 3421
- e. No arrangement required

7. Questions

Many travellers now prefer slower [1] **traditions** that allow them to [2] **live** local [3] **journeys** and everyday [4] **experience**.

- a. 4321
- b. 1243
- c. 2341
- d. 3412
- e. No arrangement required

8. Questions

[1] **challenges** in medical research continue to [2] **improve** the [3] **quality** of life for people facing chronic health [4] **Advances**.

- a. 4231
- b. 1243
- c. 2341
- d. 3421
- e. No arrangement required

@RankZen Banker

9. Questions

Philosophical [1] **debates** surrounding [2] **diversity** often reveal the [3] **morality** of human perspectives across [4] **cultures**.

- a. 4213
- b. 1324
- c. 2341

- d. 3421
- e. No arrangement required

10. Questions

Curiosity and imagination have remained [1] **essential** forces [2] **behind** humanity's [3] **artistic** and [4] **intellectual** achievements.

- a. 4231
- b. 1243
- c. 2341
- d. 3421
- e. No arrangement required

11. Questions

Below, a passage is given with five blanks labelled (A-E). Below the passage, five options are given for each blank. Choose the word that fits each blank appropriately in the context of the passage, and mark the corresponding answer.

If you are using your smartphone to (A) _____, your system just got a crucial update. Scientists have released a new model tracking the position of the magnetic north pole, revealing that the pole is now closer to Siberia than it was five years ago and is continuing to drift toward Russia.

Unlike the geographic North Pole, which marks a fixed location, the magnetic north pole's position is (B) _____ by Earth's magnetic field, which is in constant motion. Over the past few decades, magnetic north's movement has been (C) _____ — it dramatically sped up, then in a more recent twist rapidly slowed — though scientists can't explain the underlying cause behind the magnetic field's (D) _____ behavior. Global positioning systems, including those used by planes and ships, find magnetic north using the World Magnetic Model, as it was (E) _____ in 1990.

Which word comes in the blank labelled A?

- a. extend
- b. clean
- c. obsolete
- d. navigate
- e. pretend

@RankZen Banker

12. Questions

Which word comes in the blank labelled B?

- a. determined
- b. declared

- c. refined
- d. asserted
- e. claimed

13. Questions

Which word comes in the blank labelled C?

- a. urged
- b. encouraged
- c. moderated
- d. resolved
- e. unprecedented

14. Questions

Which word comes in the blank labelled D?

- a. profligate
- b. unusual
- c. rigid
- d. constant
- e. ordinary

15. Questions

Which word comes in the blank labelled E?

- a. concealed
- b. declined
- c. assigned
- d. opened
- e. introduced

@RankZen Banker

16. Questions

In the following questions, the sentence is split into five parts and named A, B, C, D and E. These five parts are not given in their proper order. Rearrange the parts of the sentence to make a grammatically correct and contextually meaningful statement.

- A).** within educational institutions,
- B).** alongside technical competence

- C). increasing attention is being
- D). critical thinking skills
- E). devoted to developing
 - a. BCDAE
 - b. CBDEA
 - c. ACEDB
 - d. BACED
 - e. No arrangement required

17. Questions

- A). improvements in digital
- B). new opportunities for
- C). in several emerging economies,
- D). connectivity have created
- E). entrepreneurship and innovation
 - a. CADBE
 - b. CBAED
 - c. ABEDC
 - d. BEADC
 - e. No arrangement required

18. Questions

- A). as many junior players are
- B). the world stage now, I feel India is
- C). superpower in the coming years
- D). all set to be a sports
- E). performing exceptionally well on
 - a. BCDAE
 - b. DCBEA
 - c. EABDC
 - d. AEBDC
 - e. No arrangement required

@RankZen Banker

19. Questions

- A). debate among archaeologists
 - B). carvings whose purpose
 - C). continues to inspire
 - D). along the edge of the
 - E). canyon stood ancient
- a. BCADE
 - b. DEBCA
 - c. EBCDA
 - d. ACBDE
 - e. No arrangement required

20. Questions

- A). theatre has historically
 - B). served as a powerful
 - C). medium for questioning
 - D). authority and reflecting
 - E). societal transformations
- a. BCDEA
 - b. DBCEA
 - c. EADBC
 - d. EDABC
 - e. No arrangement required

21. Questions

In the following question, a passage has been given and followed by several questions. You are required to answer the questions based on the information provided in the passage.

On the bright side, vaccine coverage globally, between 1980 and 2023, doubled for six diseases including measles, polio and tuberculosis. Also, at 75% globally, there has been a sharp fall in the number of zero-dose children — those who have not received the first dose of the diphtheria, tetanus, and pertussis (DTP) vaccine — during the same time period. The number of zero-dose children is a crucial performance marker and an indicator of vaccination coverage inequities. Despite increased immunization coverage over the decades, in 2023, at 1.44 million, India, according to The Lancet, still had the second largest number of zero-dose children, and is among the eight countries with over 50% of the nearly 16 million zero-dose children globally. Most of the zero-dose children globally are in countries that are conflict-affected or with

limited resources for vaccination programmes — India has neither of the two problems. However, about 23 million babies were born in 2023 in India, the highest in the world; in 2024, China, which has the second highest number of newborns globally, reported just 9.5 million newborns. Though the number of zero-dose children is **staggering**, when seen in the context of the number of newborns in 2023, the percentage of zero-dose children in India is 6.2%. A study in 2021 found that India had sharply reduced the percentage of zero-dose children, from 33.4% in 1992 to 10.1% in 2016. Before the COVID-19 pandemic, the number of zero-dose children was 1.4 million in 2019 but this **swelled** to 2.7 million in 2021 and then dropped to 1.1 million in 2022 before increasing to 1.44 million in 2023.

As in the 2021 study, a large percentage of zero-dose children are in Uttar Pradesh, Bihar, Maharashtra, Rajasthan, Madhya Pradesh, and Gujarat. There is also a relatively high proportion of them in Meghalaya, Nagaland, Mizoram and Arunachal Pradesh. Over the years, the difference in zero-dose children based on gender, caste, and rural-urban status has reduced substantially. However, prevalence remains high among the poor, mothers with low education, Scheduled Tribes and Muslims. Focus is needed to immunize children in hard-to-reach tribal areas, urban slums where there is a huge migrant population, and in reducing vaccine hesitancy among Muslim households with newborn children. India has much work to do to meet WHO's Immunization Agenda 2030 (IA2030) — halving zero-dose children relative to 2019. With the number of zero-dose children in 2023 (1.44 million) only about nearly reaching the 2019 level of 1.4 million, India needs greater and sustained efforts to halve this number in the next five years.

What does the author imply by comparing India's zero-dose children to its total number of newborns in 2023?

- a. The absolute number is high, but the percentage is relatively low.
- b. The problem is more severe than it appears.
- c. India's vaccination program is worse than China's.
- d. The number is negligible and not worth focusing on.
- e. None of the above

22. Questions

According to the passage, why is the number of zero-dose children a critical performance marker?

- a. It helps track only measles and polio immunization.
- b. It reflects inequities in vaccination coverage.
- c. It estimates global birth rates.
- d. It tracks conflict-affected regions only.
- e. All of the above

@RankZen Banker

23. Questions

Which of the following groups is NOT explicitly mentioned as having a high prevalence of zero-dose children?

- a. Scheduled Tribes

- b. Wealthy urban residents
- c. Mothers with low education
- d. Muslims
- e. Both C & D

24. Questions

In 2023, India had the second-highest number of zero-dose children. What is the main reason this is concerning, according to the passage?

- a. India has the highest number of newborns yet still has a high number of zero-dose children.
- b. India is conflict-ridden like other zero-dose countries.
- c. India's population is more vaccine-hesitant than any other.
- d. India imports all its vaccines from China.
- e. None of the above

25. Questions

Based on the passage, what can be inferred about India's progress in reducing zero-dose children between 1992 and 2016?

- a. There was no significant change in percentage.
- b. India doubled the percentage of zero-dose children.
- c. India reduced the percentage by more than two-thirds.
- d. India increased zero-dose children due to poor funding.
- e. None of these

26. Questions

What does the term "zero-dose children" refer to, as used in the passage?

- a. Children who received vaccines but failed to build immunity
- b. Children who missed their polio shots only
- c. Children who dropped out after the first vaccine dose
- d. Children who have not received even the first dose of DTP vaccine
- e. None of the above

@RankZen Banker

27. Questions

What is the central suggestion of the passage regarding India's future vaccination efforts?

- a. India should stop focusing on immunization and prioritize education.

- b. India must privatize all vaccine distribution systems.
- c. India needs greater, sustained efforts to meet IA2030 goals.
- d. India should adopt conflict-zone strategies to improve coverage.
- e. None of the above

28. Questions

Which of the following is the synonym of the word "staggering" as used in the passage?

- a. purifying
- b. mitigating
- c. emancipating
- d. Both A and C
- e. astonishing

29. Questions

Which of the following is/are the antonym(s) of the word "swelled" as used in the passage?

- a. contracted
- b. distended
- c. dilated
- d. Both B and C
- e. All A, B and C

30. Questions

Given below a sentence with two words highlighted. You must find the pair of correct synonyms for the highlighted words as your answer. If none of the options are correct, choose option E as your answer.

Despite his age, the mountaineer maintained a **vigorous** training schedule that **impressed** even younger athletes.

@RankZen Banker

- a. weak, dazzled
- b. feeble, overwhelmed
- c. fiery, disappointed
- d. energetic, inspired
- e. None of these

31. Questions

The investigation **uncovered** blatant **nepotism** within the institution's recruitment process.

- a. revealed, partiality
- b. unearthed, meritocracy
- c. concealed, bias
- d. exhibited, equality
- e. None of these

32. Questions

Her **incisive** observations **dismantled** several fallacious assumptions within minutes.

- a. sharp, assembled
- b. rapidly, destroyed
- c. acute, demolished
- d. vague, flattened
- e. None of these

Explanations:

1. Questions

Answer: C

Sentence C: “Were released” is incorrect here. It should be “was released.” After each of the..., the verb should be singular.

Corrected sentence:

Each of the rescued birds was released only after a thorough medical examination.

2. Questions

Answer: B

Sentence B: The correct correlative pair is “No sooner ... than,” not “then.”

Corrected sentence:

No sooner did the rain stop than children returned to the playground.

3. Questions

Answer: A

Sentence A: In a third conditional sentence, the structure should be Had + subject + past participle, and the result clause should use would have + past participle. Thus, it should be “...the villagers would have evacuated safely.”

Corrected sentence:

Had the warning reached earlier, the villagers would have evacuated safely.

4. Questions

Answer: E

All sentences are grammatically and contextually correct.

5. Questions

Answer: A

Sentence A: "...so complete..." should be "...to complete..." The correct structure is too + adjective + to + verb.

Corrected sentence:

The expedition was too exhausting for the youngest volunteer to complete without assistance.

6. Questions

Answer: C

The correct arrangement is 2134.

Corrected sentence:

Scientists studying animal behaviour **continue** to **discover** complex **forms** of communication among various **species**.

7. Questions

Answer: D

The correct arrangement is 3412.

Corrected sentence:

Many travellers now prefer slower **journeys** that allow them to **experience** local **traditions** and everyday **life**.

8. Questions

Answer: A

The correct arrangement is 4231.

Corrected sentence:

Advances in medical research continue to **improve** the **quality** of life for people facing chronic health **challenges**.

9. Questions

Answer: B

The correct arrangement is 1324.

@RankZen Banker

Corrected sentence:

Philosophical **debates** surrounding **morality** often reveal the **diversity** of human perspectives across **cultures**.

10. Questions**Answer: E**

Curiosity and imagination have remained **essential** forces **behind** humanity's **artistic** and **intellectual** achievements.

11. Questions**Answer: D**

The sentence discusses using a smartphone and mentions an update related to the magnetic north pole. This implies that the smartphone is used for activities like finding directions or positioning, which align with the meaning of "navigate"—to plan and direct the course of a journey. Therefore, "navigate" fits contextually.

- **Extend:** To make something longer or larger in space or time.
- **Clean:** To remove dirt or impurities.
- **Obsolete:** No longer in use; outdated.
- **Navigate:** To determine the direction or position of travel, especially with the help of instruments.
- **Pretend:** To act as if something is true when it is not.

12. Questions**Answer: A**

The correct word here is "determined," meaning "decided or controlled by something." The magnetic north pole's location is controlled by the Earth's magnetic field, making "determined" the most contextually appropriate choice.

- **Determined:** Decided or controlled by something; influenced by a factor.
- **Declared:** Announced formally or officially.
- **Refined:** Improved to make something pure, accurate, or effective.
- **Asserted:** Stated firmly or with confidence.
- **Claimed:** Declared as true or as one's own, often without proof.

13. Questions**Answer: E**

@RankZen Banker

The word "unprecedented" (meaning never seen or done before) perfectly fits the context, as the behavior of the magnetic field is described as highly unusual and unexplained.

- **Urged:** Strongly recommended or encouraged someone to do something.
- **Encouraged:** Gave support, confidence, or hope to someone.
- **Moderated:** Made less extreme.
- **Resolved:** Solved or settled an issue or problem.
- **Unprecedented:** Never done or known before; exceptional or unique.

14. Questions

Answer: B

The sentence refers to the behavior of the magnetic field as being difficult to explain. This implies that the behavior is "unusual," meaning out of the ordinary or unexpected. It aligns with the idea of an unexplained and atypical phenomenon.

- **Profligate:** Recklessly wasteful or extravagant.
- **Unusual:** out of the ordinary.
- **Rigid:** Stiff, inflexible, or unchanging.
- **Constant:** Remaining the same over time; unchanging.
- **Ordinary:** Common or usual.

15. Questions

Answer: E

The sentence refers to the **World Magnetic Model** and mentions the year **1990**, indicating the time when the model was first **introduced** for use. Therefore, the most appropriate word is "**introduced**," meaning officially presented or brought into use.

- **Concealed:** Hidden or kept out of sight.
- **Declined:** Reduced or became smaller in quantity, importance, or value.
- **Assigned:** Given a specific task, responsibility, or designation.
- **Opened:** Made accessible or available.
- **Introduced:** Officially presented or brought into use for the first time.

16. Questions

Answer: C

The final arrangement is: ACEDB.

Corrected sentence:

Within educational institutions, increasing attention is being devoted to developing critical thinking skills alongside technical competence.

17. Questions

Answer: A

The final arrangement is: CADBE.

Corrected sentence:

@RankZen Banker

In several emerging economies, improvements in digital connectivity have created new opportunities for entrepreneurship and innovation.

18. Questions

Answer: D

The final arrangement is: AEBDC.

Corrected sentence:

As many junior players are performing exceptionally well on the world stage now, I feel India is all set to

be a sports superpower in the coming years.

19. Questions

Answer: B

The final arrangement is: DEBCA.

Corrected sentence:

Along the edge of the canyon stood ancient carvings whose purpose continues to inspire debate among archaeologists.

20. Questions

Answer: E

Theatre has historically served as a powerful medium for questioning authority and reflecting societal transformations.

21. Questions

Answer: A

The author says the number seems staggering, but when seen in the context of 23 million births, it's only 6.2%- a relatively low percentage.

- **Option B** is misleading; the author balances both views.
- **Option C** is not a fair comparison as China's total births are different.
- **Option D** is wrong. The issue is still significant.

22. Questions

Answer: B

The passage clearly states that the number of zero-dose children is a crucial performance marker and an indicator of vaccination coverage inequities.

- **Option A:** It limits focus to two diseases.
- **Option C** is unrelated to vaccination equity.
- **Option D** only partially covers the idea.

23. Questions

Answer: B

@RankZen Banker

The passage highlights high prevalence among Scheduled Tribes, Muslims, and low-education mothers, but not among wealthy urban residents.

- **Option A, Option C, and Option D** are directly mentioned as vulnerable groups.
- **Option B** is not mentioned and likely faces fewer access issues.

24. Questions

Answer: A

The passage highlights that:

- India has a very high number of newborns (23 million), the highest globally.
- Yet it still has 1.44 million zero-dose children, one of the highest in the world.
- Importantly, most countries with high zero-dose numbers are conflict-affected or resource-limited, but India is neither.

Let's look at the options:

- A). India has the highest number of newborns yet still has a high number of zero-dose children. Matches passage reasoning
- B). Incorrect — passage explicitly says India is not conflict-ridden
- C). Not stated anywhere
- D). Not mentioned
- E). Incorrect because A is correct

25. Questions

Answer: C

From 33.4% in 1992 to 10.1% in 2016 is a reduction of more than two-thirds.

- **Option A** is wrong; the drop was significant.
- **Option B** is the opposite of the truth.
- **Option D** is not discussed as a cause during that period.

26. Questions

Answer: D

The passage clearly defines zero-dose children as those who have not received the first dose of the diphtheria, tetanus, and pertussis (DTP) vaccine.

- **Option A:** It refers to vaccine failure, not absence.
- **Option B:** Polio is not the specific benchmark.
- **Option C:** It refers to drop-outs, not zero-start.

27. Questions

Answer: C

The last lines emphasize India's need for sustained efforts to halve zero-dose children by 2030, aligned with WHO's IA2030 goal.

@RankZen Banker

- **Option A** is irrelevant to the main idea.
- **Option B** is not suggested or discussed.
- **Option D** is not applicable as India is not a conflict zone.

28. Questions

Answer: E

“Staggering” means shocking, astonishing, or surprising. Thus, Option E is the correct answer.

- **Purifying:** cleaning
- **Mitigating:** reducing severity

- **Emancipating:** freeing

29. Questions

Answer: A

“Swelled” means increased or expanded, so the antonym is contracted.

- **Contracted:** shrank, became smaller
- **Distended:** swollen, expanded
- **Dilated:** widened, expanded

30. Questions

Answer: D

Vigorous means energetic, strong and impressed means inspired, affected positively.

- **Dazzled:** amazed
- **Feeble:** weak, not strong
- **Overwhelmed:** greatly affected or overpowered
- **Fiery:** passionate, intense
- **Disappointed:** unhappy
- **Inspired:** motivated, encouraged

31. Questions

Answer: A

Uncovered means revealed, discovered and nepotism means favoritism toward relatives.

- **Revealed:** shown, uncovered
- **Partiality:** favoritism, bias
- **Unearthed:** discovered
- **Meritocracy:** system based on ability
- **Concealed:** hidden
- **Exhibited:** displayed
- **Equality:** fairness, sameness in status

32. Questions

Answer: C

Incisive means sharp, keen, penetrating and dismantled means demolished, broke down.

- **Assembled:** put together
- **Demolished:** destroyed
- **Acute:** sharp, keen
- **Destroyed:** ruined
- **Vague:** unclear
- **Flattened:** made level

@RankZen Banker
