

1. Questions

Study the following information carefully and answer the questions below

A certain number of people are sitting in a linear row and all are facing north.

Only six people sit between A and B. C sits third to the left of B. D sits seventh to the right of C. The number of people who sit between D and E is **three more than** the number of people who sit between D and A. D sits sixth from the right end of the row. K is an immediate neighbour of E. Only five people sit between K and N. Z sits to the immediate left of K but no one sits to the left of Z.

How many persons are sitting in the row as per the final arrangement?

- a. 20
- b. 22
- c. 24
- d. 26
- e. 28

2. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

- a. An odd number of persons are sitting between B and N
- b. More than ten persons sit between N and D
- c. D sits seventh to the right of C
- d. Both a) and b)
- e. Both a) and c)

@RankZenBanker

3. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

- a. Z
- b. K
- c. E
- d. C
- e. B

4. Questions

As many persons sit between N and __ as sit between Z and __ respectively.

- a. A, B

- b. K, D
- c. More than one option is correct
- d. C, E
- e. B, E

5. Questions

Which among the following persons sits exactly between A and C as per the final arrangement?

- a. Z
- b. E
- c. D
- d. K
- e. N

6. Questions

Study the following information carefully and answer the questions below

Seven slots – D, E, H, R, T, W and Y are scheduled for meetings on seven different days of the week, starting from Monday to Sunday. Only one slot is scheduled on each day.

H is scheduled three days before Y. R is scheduled two days before H. The number of slots scheduled between R and E is **two more than** the number of slots scheduled before T. T is not scheduled on Wednesday or Sunday. D is not scheduled on Saturday and Sunday. E is not scheduled on Sunday and Monday. W is not scheduled on Sunday.

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

- a. D is scheduled on Monday
- b. W is scheduled immediately after Y
- c. H is scheduled on Thursday
- d. E is scheduled before R
- e. Only one slot is scheduled between E and R

7. Questions

How many slots are scheduled between R and E as per the final arrangement?

- a. As many slots scheduled after E
- b. As many slots scheduled between D and E
- c. As many slots scheduled between T and Y
- d. As many slots scheduled before T

e. None of these

8. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

- a. Wednesday- D
- b. Monday- T
- c. Saturday- W
- d. Friday- E
- e. Sunday- R

9. Questions

The number of slots before H is one more than the number of slots after ____.

- a. E
- b. D
- c. W
- d. R
- e. T

@RankZenBanker

10. Questions

On which of the following days, Y is scheduled as per the final arrangement?

- a. Tuesday
- b. Thursday
- c. Wednesday
- d. Sunday
- e. Monday

11. Questions

Study the following information carefully and answer the questions below

Eight people – A, B, C, D, E, H, T and Y went for vacation one after another. It is assumed that no other people went for vacation other than the given people.

Only one person went between B and C, who went immediately before D. B went one of the days after A. At least three people went between A and E, who went immediately before H. As many people went before C as after D. The number of people who went between H and T is **one less than** the number of people who went between Y and D. T was not the first person to travel.

How many people went for vacation after the one who went immediately after H?

- a. Three
- b. Two
- c. One
- d. More than three
- e. No one

12. Questions

If all the persons are arranged in alphabetical order from first to last, then who among the following persons remains at the same position?

- a. Y
- b. H
- c. B
- d. C
- e. T

13. Questions

@RankZenBanker

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

- a. Only three people went for vacation after C
- b. Only one person went for vacation between T and E
- c. Y went for vacation immediately before B
- d. No one went for vacation between A and C
- e. No one went for vacation after B

14. Questions

The number of persons who went for a vacation between H and Y is the same as the number of persons who went for the vacation before ____.

- a. C
- b. H
- c. The one who went for a vacation three days before E
- d. The one who went for a vacation four days before D
- e. More than one option is correct

15. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

- a. D-H
- b. C-E
- c. B-C
- d. D-E
- e. A-Y

16. Questions

Study the following information carefully and answer the questions below

Eight persons, viz., A, B, C, D, E, F, G and H are sitting around a rectangular table in such a way that four of them are sitting at each corner and facing the centre, while four of them are sitting in the middle each side and facing outside (**opposite to the centre**).

A sits third to the left of B. Only one person sits between A and C. D sits second to the right of C. E sits adjacent to C but does not sit opposite to B. F faces the one who sits to the immediate left of G. The number of persons who sit between C and F (when counted from the right of C) is **two more than** the number of persons who sit between A and F (when counted from the left of A). H does not sit at any corner of the table.

Who among the following persons sits second to the right of H @RankZenBanker

- a. The one who sits to the immediate left of G
- b. The one who sits to the immediate left of F
- c. D
- d. C
- e. E

17. Questions

Who among the following persons sits in the middle of the table?

I). The one who sits second to the left of A

II). B

III). The one who sits second to the right of E

IV). D

- a. Only I and IV
- b. Only I and III
- c. Only III and IV

- d. Only II and III
- e. Only I and II

18. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

- a. F
- b. D
- c. G
- d. A
- e. C

19. Questions

Which of the following pairs of persons are immediate neighbours?

- a. HF
- b. HG
- c. EG
- d. FD
- e. FC

@RankZenBanker

20. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

- a. E sits second to the right of G
- b. Only one person sits between D and F when counted from the right of D
- c. A sits opposite to D
- d. No one sits between H and E
- e. More than one option is correct

21. Questions

Study the following information carefully and answer the given questions.

Six boxes - D, F, H, W, X and Y are arranged on a shelf according to their weight from left to right (in ascending order).

Box D is lighter than only box X and box Y. Box H is heavier than box F and lighter than box W. The weight of box X is 52 kg, and the weight of box W is 46 kg. The weight of box Y is 55 kg.

If the sum of the weight of W and F is 21kg more than Y, then what can be the possible weight of

H?

- a. 47 kg
- b. 32 kg
- c. 50 kg
- d. 48 kg
- e. None of these

22. Questions

Which of the following statement(s) is/are TRUE as per the final arrangement?

- a. D is the third heaviest box
- b. H is heavier than only F
- c. If the weight of D is 50 kg, then the sum of W and D is 96 kg
- d. F is the lightest box
- e. All the statements are true

23. Questions

As many boxes are heavier than D as lighter than ____

@RankZenBanker

- a. X
- b. D
- c. W
- d. Y
- e. H

24. Questions

Study the following information carefully and answer the given questions

Seven delivery trucks - A, B, C, D, E, F and G - carry different numbers of cargo boxes but not necessarily in the same order.

C carries more boxes than both B and F. E carries more boxes than C but does not carry the highest number of boxes. G carries more boxes than B but does not carry more boxes than C. D carries less boxes than F. B carries 60 boxes which is 20 more boxes than F carries.

Which among the following trucks carries the second-highest number of boxes as per the final arrangement?

- a. A
- b. B

- c. C
- d. D
- e. E

25. Questions

If the sum of the number of boxes carried by A and B is 185 and the sum of the number of boxes carried by F and G is 105, then what will be the difference between the number of boxes carried by A and G?

- a. 45
- b. 55
- c. 50
- d. 60
- e. 40

26. Questions

Study the following information carefully and answer the given question.

Point D is 6m to the west of Point E. Point F is 4m to the east of Point E. Point G is 4m to the east of Point F. Point B is 6m to the south of Point F. Point A is 8m to the west of Point B. Point E is 8m to the north of Point C.

What is the shortest distance between A and F as per the final arrangement?

- a. 10 m
- b. 12 m
- c. 15 m
- d. 20 m
- e. 25 m

27. Questions

What is the direction B with respect to D as per the final arrangement?

- a. East
- b. West
- c. South-east
- d. North-west
- e. South

28. Questions

If point Q is the midpoint of the points D and E, then in which direction is point G with respect to point Q?

- a. North
- b. South
- c. West
- d. East
- e. North-east

29. Questions

Study the following information carefully and answer the given questions

Ananya starts walking from her office to a cafe. She walks 4m towards South and then takes a right turn and walks 8m. She then turns left and walks 6m, followed by another left turn where she walks 11m. From there, she takes a right turn and walks 2m. Finally, she takes one last right turn and walks 8m to reach the cafe.

In which direction is Ananya's Office with respect to his Cafe?

- a. Northeast
- b. Southwest
- c. Northwest
- d. Southeast
- e. None of these

@RankZenBanker

30. Questions

What is the shortest distance between Ananya's office and the cafe?

- a. 10m
- b. 11m
- c. 12m
- d. 13m
- e. None of these

31. Questions

Study the following statements and then decide which of the given conclusions logically follow from the given statements, disregarding the commonly known fact

Statements:

Some Ice is Snow

No Snow is Rain

All Rain is Cloud

Conclusions:

I). Some Ice is not Rain

II). Some Snow is Cloud

- a. Only conclusion I follows
- b. Only conclusion II follows
- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows
- e. Both conclusions I and II follow

32. Questions

Statements:

No Dirt is Mud

Only a few Soil is Mud

All Clay is Soil

Conclusions:

I). Some Dirt can be Clay

II). All Clay is not Mud

- a. Only conclusion II follows
- b. Both conclusions I and II follow
- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows
- e. Only conclusion I follows

33. Questions

Statements:

Some Sun is not Moon

Mostly Moon are stars

No Star is Planet

Conclusions:

I). Some Planet is Sun

@RankZenBanker

II). No sun is Planet

- a. Only conclusion I follows
- b. Both conclusions I and II follow
- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows
- e. Only conclusion II follows

34. Questions

Statements:

Only a few plates are spoons

All Spoons are cups

No Pan is Spoon

Conclusions:

I). Mostly Cup is not Pan

II). Some Pan is Plate

- a. Only conclusions I follows
- b. Both conclusion I and II follow
- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows
- e. Only conclusion II follows

@RankZenBanker

35. Questions

Statements:

Mostly chairs are tables

Only a few tables are Bed

Few beds are sofas

Conclusions:

I). Some Sofas are not tables

II). All tables being Beds is a possibility

- a. Only conclusion I follow
- b. Both conclusions I and II follow
- c. Either conclusion I or II follows

- d. Neither conclusion I nor II follows
- e. Only conclusion II follows

36. Questions

Study the following information carefully and answer the given questions

H 4 K O 8 M 3 Z 5 1 P D R A 7 6 I V 9 2 X O 4 7 G E T 9

How many numbers are there in the given series which are immediately preceded by a consonant?

- a. One
- b. Two
- c. Three
- d. Four
- e. Five

37. Questions

Which of the following elements is 6th to the right of the 14th element from the left end in the given series?

- a. 2
- b. H
- c. 8
- d. M
- e. E

@RankZenBanker

38. Questions

If all the vowels in the series are dropped, then which element will be exactly in the middle of the newly formed series?

- a. R
- b. A
- c. V
- d. P
- e. D

39. Questions

Which of the following elements is 4th to the right of the element which is 3rd to the left of the 15th element from the right end?

- a. A
- b. P
- c. 7
- d. 6
- e. R

40. Questions

How many numbers are there in the given series which are immediately preceded by a consonant and immediately followed by either a consonant or a vowel?

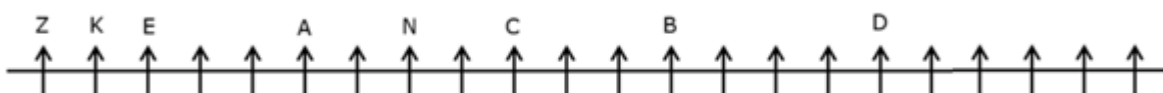

- a. Three
- b. Two
- c. Five
- d. Four
- e. Six

Explanations:

@RankZenBanker

1. Questions

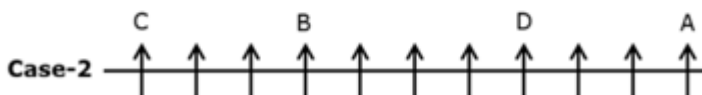

Final Arrangement:

We have,

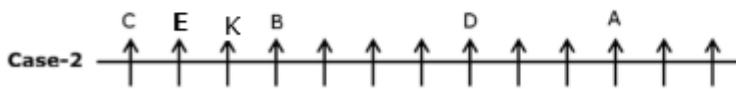

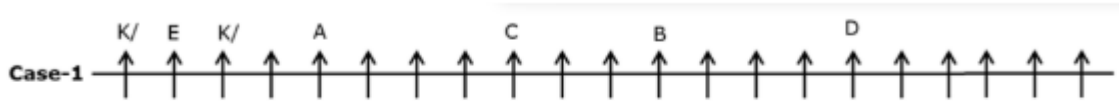

- Only six people sit between A and B.
- C sits third to the left of B.
- D sits seventh to the right of C.

From the above condition, we have two possibilities:

Again, we have

- The number of people who sit between D and E is **three more than** the number of people who sit between D and A.
- D sits sixth from the right end of the row.
- K is an immediate neighbour of E.

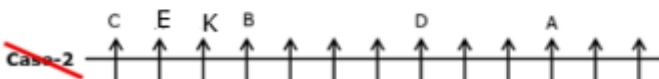

Again, we have

- Only five people sit between K and N.
- Z sits to the immediate left of K but no one sits to the left of Z.

From the above conditions, Case-2 gets eliminated because Z sits to the immediate left of K, which is not satisfied.

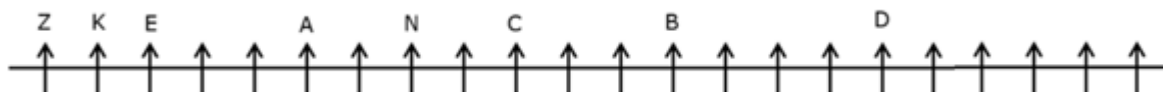

Hence, case-1 shows the final arrangement.

Answer: B

2. Questions

Final Arrangement:

We have,

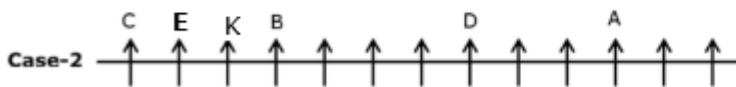

- Only six people sit between A and B.
- C sits third to the left of B.
- D sits seventh to the right of C.

From the above condition, we have two possibilities:

Again, we have

- The number of people who sit between D and E is **three more than** the number of people who sit between D and A.
- D sits sixth from the right end of the row.
- K is an immediate neighbour of E.

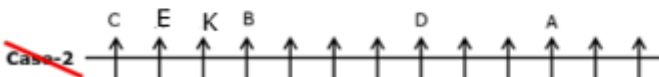

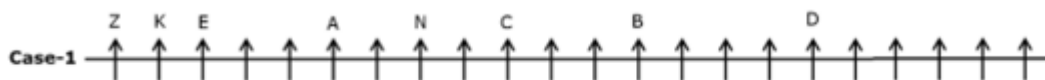

Again, we have

@RankZenBanker

- Only five people sit between K and N.
- Z sits to the immediate left of K but no one sits to the left of Z.

From the above conditions, Case-2 gets eliminated because Z sits to the immediate left of K, which is not satisfied.

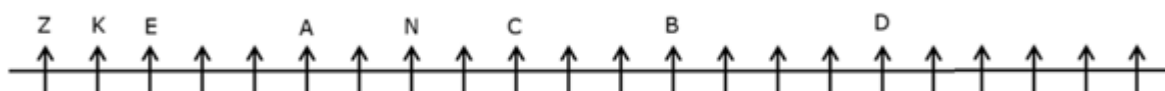

Hence, case-1 shows the final arrangement.

Answer: C

3. Questions

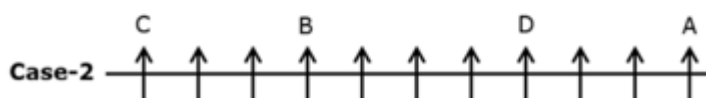

Final Arrangement:

We have,

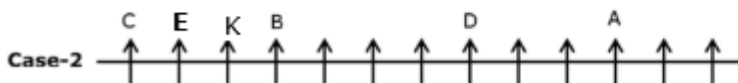

- Only six people sit between A and B.
- C sits third to the left of B.
- D sits seventh to the right of C.

From the above condition, we have two possibilities:

Again, we have

- The number of people who sit between D and E is **three more than** the number of people who sit between D and A.
- D sits sixth from the right end of the row.
- K is an immediate neighbour of E.

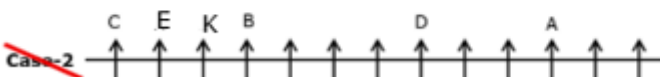

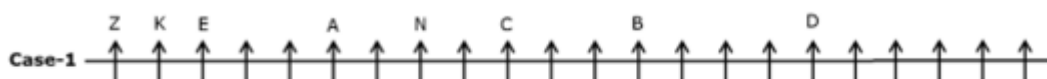

Again, we have

- Only five people sit between K and N.
- Z sits to the immediate left of K but no one sits to the left of Z.

From the above conditions, Case-2 gets eliminated because Z sits to the immediate left of K, which is not satisfied.

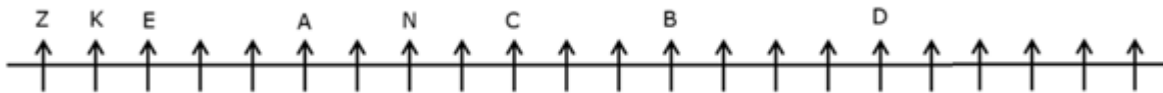

Hence, case-1 shows the final arrangement.

Answer: A (In all the other options, people are sitting in the middle of the row except option A)

4. Questions

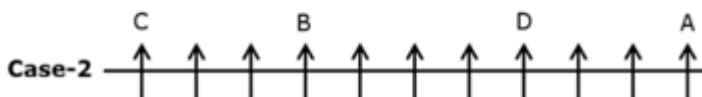

Final Arrangement:

We have,

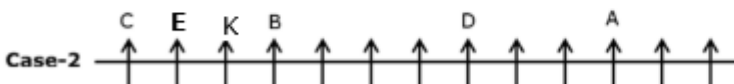

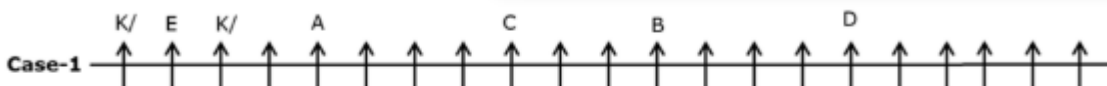

- Only six people sit between A and B.
- C sits third to the left of B.
- D sits seventh to the right of C.

From the above condition, we have two possibilities:

Again, we have

- The number of people who sit between D and E is **three more than** the number of people who sit between D and A.
- D sits sixth from the right end of the row.
- K is an immediate neighbour of E.

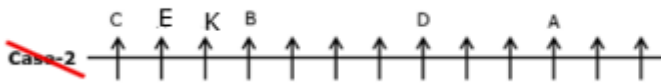

Again, we have

- Only five people sit between K and N.
- Z sits to the immediate left of K but no one sits to the left of Z.

From the above conditions, Case-2 gets eliminated because Z sits to the immediate left of K, which is not satisfied.

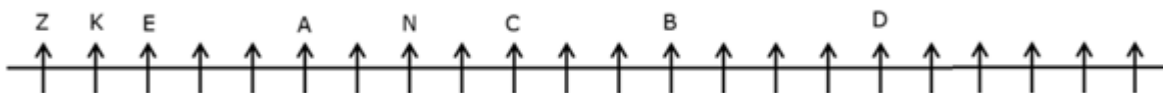

Hence, case-1 shows the final arrangement.

Answer: D

5. Questions

Final Arrangement:

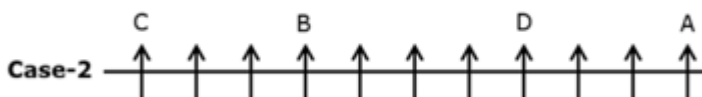

We have,

- Only six people sit between A and B.
- C sits third to the left of B.
- D sits seventh to the right of C.

From the above condition, we have two possibilities:

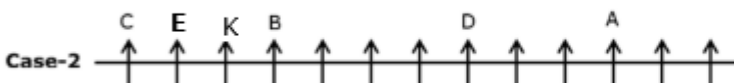

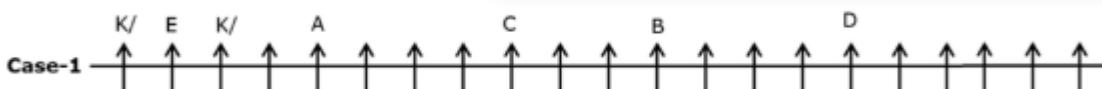

@RankZenBanker

Again, we have

- The number of people who sit between D and E is **three more than** the number of people who sit between D and A.
- D sits sixth from the right end of the row.
- K is an immediate neighbour of E.

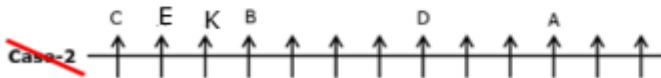

Again, we have

- Only five people sit between K and N.
- Z sits to the immediate left of K but no one sits to the left of Z.

From the above conditions, Case-2 gets eliminated because Z sits to the immediate left of K, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: E

6. Questions

Final Arrangement:

Days	Persons
Monday	T
Tuesday	R
Wednesday	D
Thursday	H
Friday	E
Saturday	W
Sunday	Y

@RankZenBanker

We have,

- H is scheduled three days before Y.
- R is scheduled two days before H.

From the above conditions, we have two possibilities:

	Case-1	Case-2
Days	Persons	Persons
Monday	R	
Tuesday		R
Wednesday	H	
Thursday		H
Friday		
Saturday	Y	
Sunday		Y

Again, we have

- The number of slots scheduled between R and E is **two more than** the number of slots scheduled before T.
- T is not scheduled on Wednesday or Sunday.
- D is not scheduled on Saturday and Sunday.

@RankZenBanker

From the above conditions, we have one more case from case 1.

	Case-1	Case-1A	Case-2
Days	Persons	Persons	Persons
Monday	R	R	T
Tuesday	D/	T	R
Wednesday	H	H	D
Thursday	T	D	H
Friday	D/	E	E
Saturday	Y	Y	
Sunday	E		Y

Again, we have

- E is not scheduled on Sunday and Monday.
- W is not scheduled on Sunday.

From the above conditions, Case-1 gets eliminated because E is not scheduled on Sunday and Monday, which is not satisfied. And also, Case-1A gets eliminated because W is not scheduled on Monday, Tuesday, or Sunday, which is not satisfied

Hence, case-2 shows the final arrangement.

	Case-1	Case-1A	Case-2
Days	Persons	Persons	Persons
Monday	R	R	T
Tuesday	D/	T	R
Wednesday	H	H	D
Thursday	T	D	H
Friday	D/	E	E
Saturday	Y	Y	W
Sunday	E	W	Y

@RankZenBanker

Answer: C

7. Questions

Final Arrangement:

Days	Persons
Monday	T
Tuesday	R
Wednesday	D
Thursday	H
Friday	E
Saturday	W
Sunday	Y

We have,

- H is scheduled three days before Y.
- R is scheduled two days before H.

From the above conditions, we have two possibilities:

	Case-1	Case-2
Days	Persons	Persons
Monday	R	
Tuesday		R
Wednesday	H	
Thursday		H
Friday		
Saturday	Y	
Sunday		Y

@RankZenBanker

Again, we have

- The number of slots scheduled between R and E is **two more than** the number of slots scheduled before T.
- T is not scheduled on Wednesday or Sunday.
- D is not scheduled on Saturday and Sunday.

From the above conditions, we have one more case from case 1.

	Case-1	Case-1A	Case-2
Days	Persons	Persons	Persons
Monday	R	R	T
Tuesday	D/	T	R
Wednesday	H	H	D
Thursday	T	D	H
Friday	D/	E	E
Saturday	Y	Y	
Sunday	E		Y

Again, we have

- E is not scheduled on Sunday and Monday.
- W is not scheduled on Sunday.

From the above conditions, Case-1 gets eliminated because E is not scheduled on Sunday and Monday, which is not satisfied. And also, Case-1A gets eliminated because W is not scheduled on Monday, Tuesday, or Sunday, which is not satisfied.

Hence, case-2 shows the final arrangement.

	Case-1	Case-1A	Case-2
Days	Persons	Persons	Persons
Monday	R	R	T
Tuesday	D/	T	R
Wednesday	H	H	D
Thursday	T	D	H
Friday	D/	E	E
Saturday	Y	Y	W
Sunday	E	W	Y

Answer: A

8. Questions

Final Arrangement:

Days	Persons
Monday	T
Tuesday	R
Wednesday	D
Thursday	H
Friday	E
Saturday	W
Sunday	Y

We have,

- H is scheduled three days before Y.
- R is scheduled two days before H.

@RankZenBanker

From the above conditions, we have two possibilities:

	Case-1	Case-2
Days	Persons	Persons
Monday	R	
Tuesday		R
Wednesday	H	
Thursday		H
Friday		
Saturday	Y	
Sunday		Y

Again, we have

- The number of slots scheduled between R and E is **two more than** the number of slots scheduled before T.
- T is not scheduled on Wednesday or Sunday.
- D is not scheduled on Saturday and Sunday.

From the above conditions, we have one more case from case 1.

	Case-1	Case-1A	Case-2
Days	Persons	Persons	Persons
Monday	R	R	T
Tuesday	D/	T	R
Wednesday	H	H	D
Thursday	T	D	H
Friday	D/	E	E
Saturday	Y	Y	
Sunday	E		Y

@RankZenBanker

Again, we have

- E is not scheduled on Sunday and Monday.
- W is not scheduled on Sunday.

From the above conditions, Case-1 gets eliminated because E is not scheduled on Sunday and Monday, which is not satisfied. And also, Case-1A gets eliminated because W is not scheduled on Monday, Tuesday, or Sunday, which is not satisfied

Hence, case-2 shows the final arrangement.

	Case-1	Case-1A	Case-2
Days	Persons	Persons	Persons
Monday	R	R	T
Tuesday	D/	T	R
Wednesday	H	H	D
Thursday	T	D	H
Friday	D/	E	E
Saturday	Y	Y	W
Sunday	E	W	Y

Answer: E (In all the options, the pair of day and person is correct, except option E)

9. Questions

Final Arrangement:

@RankZenBanker

Days	Persons
Monday	T
Tuesday	R
Wednesday	D
Thursday	H
Friday	E
Saturday	W
Sunday	Y

We have,

- H is scheduled three days before Y.
- R is scheduled two days before H.

From the above conditions, we have two possibilities:

	Case-1	Case-2
Days	Persons	Persons
Monday	R	
Tuesday		R
Wednesday	H	
Thursday		H
Friday		
Saturday	Y	
Sunday		Y

Again, we have

- The number of slots scheduled between R and E is **two more than** the number of slots scheduled before T.
- T is not scheduled on Wednesday or Sunday.
- D is not scheduled on Saturday and Sunday.

@RankZenBanker

From the above conditions, we have one more case from case 1.

	Case-1	Case-1A	Case-2
Days	Persons	Persons	Persons
Monday	R	R	T
Tuesday	D/	T	R
Wednesday	H	H	D
Thursday	T	D	H
Friday	D/	E	E
Saturday	Y	Y	
Sunday	E		Y

Again, we have

- E is not scheduled on Sunday and Monday.
- W is not scheduled on Sunday.

From the above conditions, Case-1 gets eliminated because E is not scheduled on Sunday and Monday, which is not satisfied. And also, Case-1A gets eliminated because W is not scheduled on Monday, Tuesday, or Sunday, which is not satisfied

Hence, case-2 shows the final arrangement.

	Case-1	Case-1A	Case-2
Days	Persons	Persons	Persons
Monday	R	R	T
Tuesday	D/	T	R
Wednesday	H	H	D
Thursday	T	D	H
Friday	D/	E	E
Saturday	Y	Y	W
Sunday	E	W	Y

@RankZenBanker

Answer: A

10. Questions

Final Arrangement:

Days	Persons
Monday	T
Tuesday	R
Wednesday	D
Thursday	H
Friday	E
Saturday	W
Sunday	Y

We have,

- H is scheduled three days before Y.
- R is scheduled two days before H.

From the above conditions, we have two possibilities:

	Case-1	Case-2
Days	Persons	Persons
Monday	R	
Tuesday		R
Wednesday	H	
Thursday		H
Friday		
Saturday	Y	
Sunday		Y

@RankZenBanker

Again, we have

- The number of slots scheduled between R and E is **two more than** the number of slots scheduled before T.
- T is not scheduled on Wednesday or Sunday.
- D is not scheduled on Saturday and Sunday.

From the above conditions, we have one more case from case 1.

	Case-1	Case-1A	Case-2
Days	Persons	Persons	Persons
Monday	R	R	T
Tuesday	D/	T	R
Wednesday	H	H	D
Thursday	T	D	H
Friday	D/	E	E
Saturday	Y	Y	
Sunday	E		Y

Again, we have

- E is not scheduled on Sunday and Monday.
- W is not scheduled on Sunday.

From the above conditions, Case-1 gets eliminated because E is not scheduled on Sunday and Monday, which is not satisfied. And also, Case-1A gets eliminated because W is not scheduled on Monday, Tuesday, or Sunday, which is not satisfied

Hence, case-2 shows the final arrangement.

	Case-1	Case-1A	Case-2
Days	Persons	Persons	Persons
Monday	R	R	T
Tuesday	D/	T	R
Wednesday	H	H	D
Thursday	T	D	H
Friday	D/	E	E
Saturday	Y	Y	W
Sunday	E	W	Y

Answer: D

11. Questions

Final Arrangement:

Persons
A
B
Y
C
D
E
H
T

@RankZenBanker

We have,

- Only one person went between B and C who went immediately before D.
- B went one of the days after A.
- At least three people went between A and E who went immediately before H.
- As many people went before C as after D.

From the above condition, we have two possibilities:

Case-1	Case-2
Persons	Persons
A	A/
B	A/
	A/
C	C
D	D
E	B
E/H	E
H/	H

Again, we have

- The number of people who went between H and T is **one less than** the number of people who went between Y and D.
- T was not the first person to travel.

From the above conditions, Case-2 gets eliminated because the number of people who went between H and T is **one less than** the number of people who went between Y and D, which is not satisfied.

Hence, case 1 shows the final arrangement.

Case-1	Case-2
Persons	Persons
A	
B	
Y	A
C	C
D	D
E	B
H	E
T	H

Answer: E

12. Questions

@RankZenBanker

Final Arrangement:

Persons
A
B
Y
C
D
E
H
T

We have,

- Only one person went between B and C who went immediately before D.

- B went one of the days after A.
- At least three people went between A and E who went immediately before H.
- As many people went before C as after D.

From the above condition, we have two possibilities:

Case-1	Case-2
Persons	Persons
A	A/
B	A/
	A/
C	C
D	D
E	B
E/H	E
H/	H

@RankZenBanker

Again, we have

- The number of people who went between H and T is **one less than** the number of people who went between Y and D.
- T was not the first person to travel.

From the above conditions, Case-2 gets eliminated because the number of people who went between H and T is **one less than** the number of people who went between Y and D, which is not satisfied.

Hence, case 1 shows the final arrangement.

Case-1	Case-2
Persons	Persons
A	
B	
Y	A
C	C
D	D
E	B
H	E
T	H

Answer: C

13. Questions

@RankZenBanker

Final Arrangement:

Persons
A
B
Y
C
D
E
H
T

We have,

- Only one person went between B and C who went immediately before D.

- B went one of the days after A.
- At least three people went between A and E who went immediately before H.
- As many people went before C as after D.

From the above condition, we have two possibilities:

Case-1	Case-2
Persons	Persons
A	A/
B	A/
	A/
C	C
D	D
E	B
E/H	E
H/	H

@RankZenBanker

Again, we have

- The number of people who went between H and T is **one less than** the number of people who went between Y and D.
- T was not the first person to travel.

From the above conditions, Case-2 gets eliminated because the number of people who went between H and T is **one less than** the number of people who went between Y and D, which is not satisfied.

Hence, case 1 shows the final arrangement.

Case-1	Case-2
Persons	Persons
A	
B	
Y	A
C	C
D	D
E	B
H	E
T	H

Answer: B

14. Questions

@RankZenBanker

Final Arrangement:

Persons
A
B
Y
C
D
E
H
T

We have,

- Only one person went between B and C who went immediately before D.

- B went one of the days after A.
- At least three people went between A and E who went immediately before H.
- As many people went before C as after D.

From the above condition, we have two possibilities:

Case-1	Case-2
Persons	Persons
A	A/
B	A/
	A/
C	C
D	D
E	B
E/H	E
H/	H

@RankZenBanker

Again, we have

- The number of people who went between H and T is **one less than** the number of people who went between Y and D.
- T was not the first person to travel.

From the above conditions, Case-2 gets eliminated because the number of people who went between H and T is **one less than** the number of people who went between Y and D, which is not satisfied.

Hence, case 1 shows the final arrangement.

Case-1	Case-2
Persons	Persons
A	
B	
Y	A
C	C
D	D
E	B
H	E
T	H

Answer: A

15. Questions

@RankZenBanker

Final Arrangement:

Persons
A
B
Y
C
D
E
H
T

We have,

- Only one person went between B and C who went immediately before D.

- B went one of the days after A.
- At least three people went between A and E who went immediately before H.
- As many people went before C as after D.

From the above condition, we have two possibilities:

Case-1	Case-2
Persons	Persons
A	A/
B	A/
	A/
C	C
D	D
E	B
E/H	E
H/	H

@RankZenBanker

Again, we have

- The number of people who went between H and T is **one less than** the number of people who went between Y and D.
- T was not the first person to travel.

From the above conditions, Case-2 gets eliminated because the number of people who went between H and T is **one less than** the number of people who went between Y and D, which is not satisfied.

Hence, case 1 shows the final arrangement.

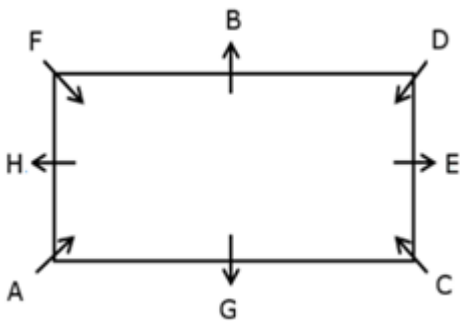

Case-1	Case-2
Persons	Persons
A	
B	
Y	A
C	C
D	D
E	B
H	E
T	H

Answer: D (In all the other options, the first person went for a vacation two days before the second person, except in option d)

@RankZenBanker

16. Questions

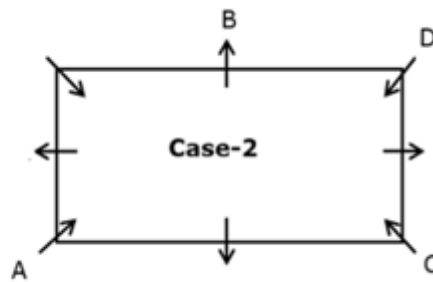

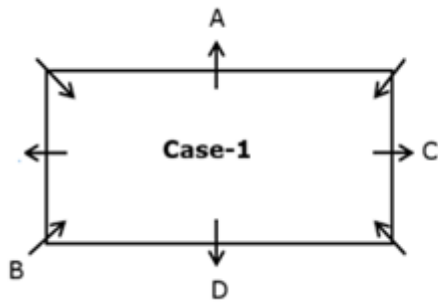

Final Arrangement:

We have,

- A sits third to the left of B.
- Only one person sits between A and C.
- D sits second to the right of C.

From the above conditions, we have two possibilities:

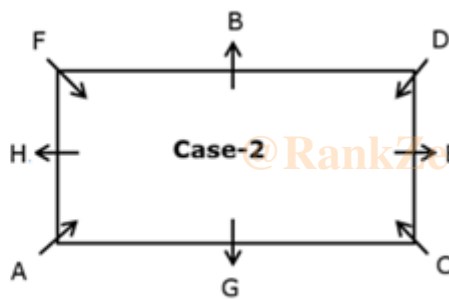

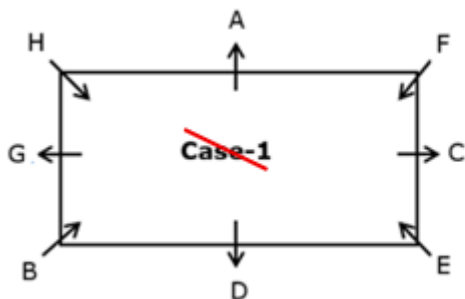

Again, we have

- E sits adjacent to C but does not sit opposite to B.
- F faces the one who sits to the immediate left of G.
- The number of persons who sit between C and F (when counted from the right of C) is **two more than** the number of persons who sit between A and F (when counted from left of A).
- H does not sit at any corner of the table.

From the above conditions, Case-1 gets eliminated because H does not sit at any corner of the table, which is not satisfied.

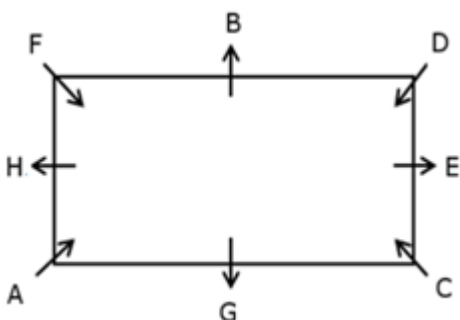

Hence, case 2 shows the final arrangement.

Answer: B

17. Questions

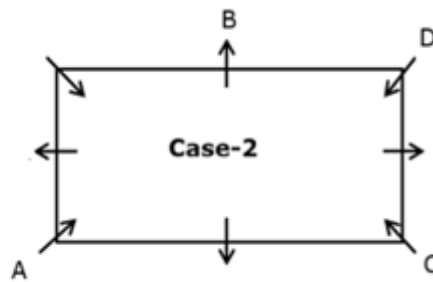

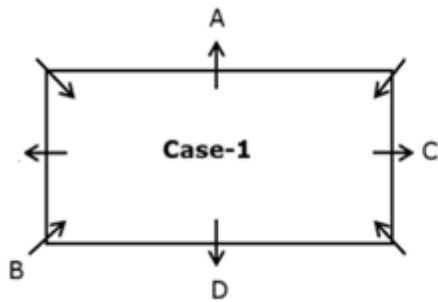

Final Arrangement:

We have,

- A sits third to the left of B.
- Only one person sits between A and C.
- D sits second to the right of C.

From the above conditions, we have two possibilities:

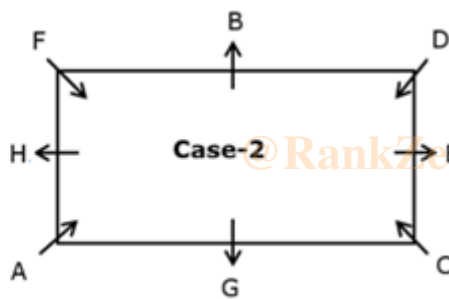

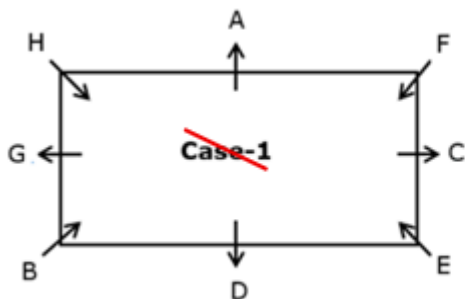

Again, we have

- E sits adjacent to C but does not sit opposite to B.
- F faces the one who sits to the immediate left of G.
- The number of persons who sit between C and F (when counted from the right of C) is **two more than** the number of persons who sit between A and F (when counted from left of A).
- H does not sit at any corner of the table.

From the above conditions, Case-1 gets eliminated because H does not sit at any corner of the table, which is not satisfied.

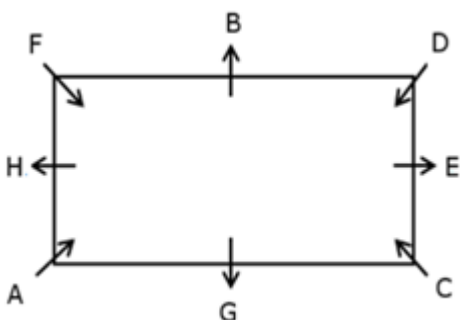

Hence, case 2 shows the final arrangement.

Answer: D

18. Questions

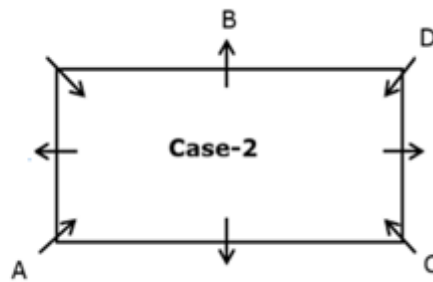

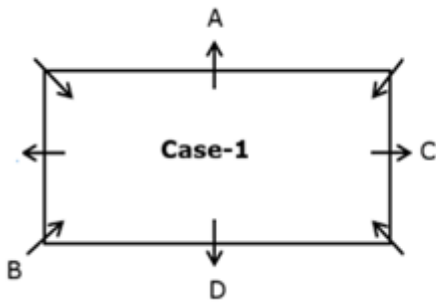

Final Arrangement:

We have,

- A sits third to the left of B.
- Only one person sits between A and C.
- D sits second to the right of C.

From the above conditions, we have two possibilities:

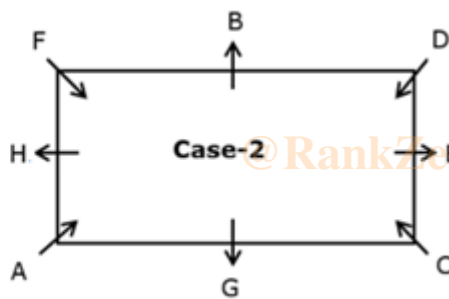

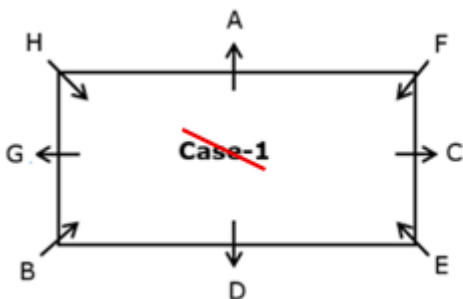

Again, we have

- E sits adjacent to C but does not sit opposite to B.
- F faces the one who sits to the immediate left of G.
- The number of persons who sit between C and F (when counted from the right of C) is **two more than** the number of persons who sit between A and F (when counted from left of A).
- H does not sit at any corner of the table.

From the above conditions, Case-1 gets eliminated because H does not sit at any corner of the table, which is not satisfied.

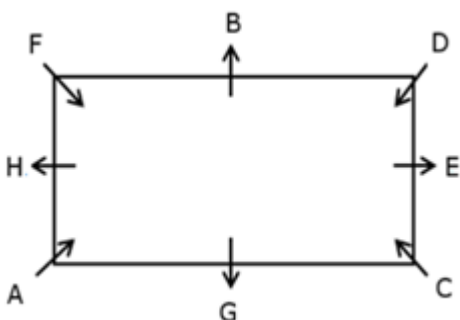

Hence, case 2 shows the final arrangement.

Answer: C (In all the other options, persons are sitting on the corner of the table, except option C)

19. Questions

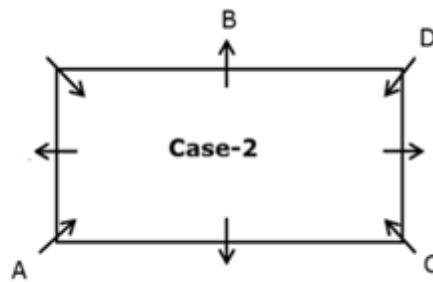

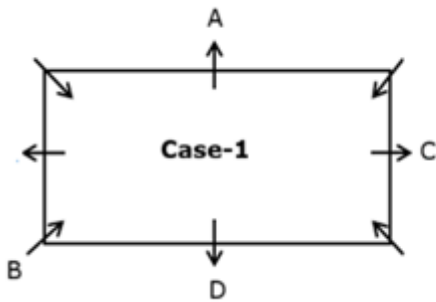

Final Arrangement:

We have,

- A sits third to the left of B.
- Only one person sits between A and C.
- D sits second to the right of C.

From the above conditions, we have two possibilities:

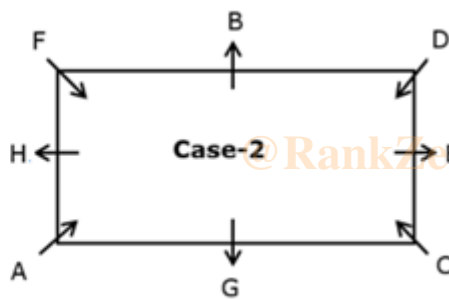

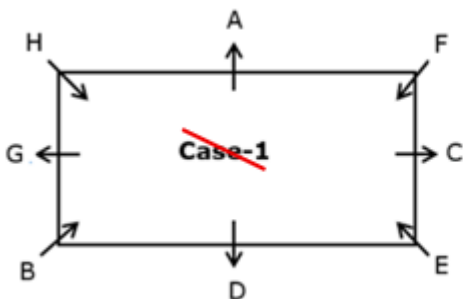

Again, we have

- E sits adjacent to C but does not sit opposite to B.
- F faces the one who sits to the immediate left of G.
- The number of persons who sit between C and F (when counted from the right of C) is **two more than** the number of persons who sit between A and F (when counted from left of A).
- H does not sit at any corner of the table.

From the above conditions, Case-1 gets eliminated because H does not sit at any corner of the table, which is not satisfied.

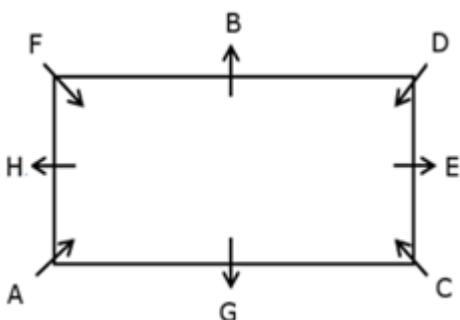

Hence, case 2 shows the final arrangement.

Answer: A

20. Questions

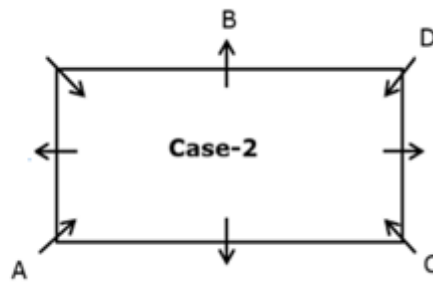

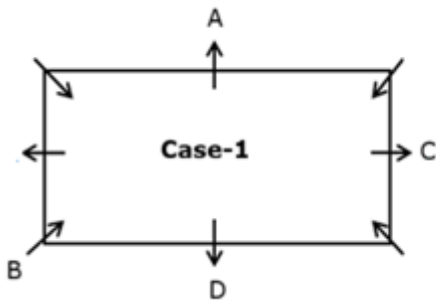

Final Arrangement:

We have,

- A sits third to the left of B.
- Only one person sits between A and C.
- D sits second to the right of C.

From the above conditions, we have two possibilities:

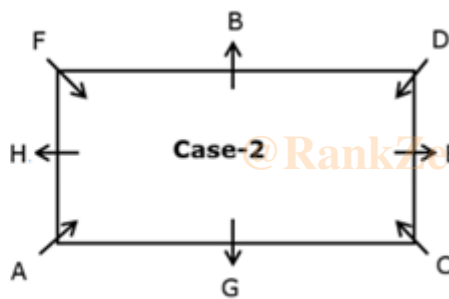

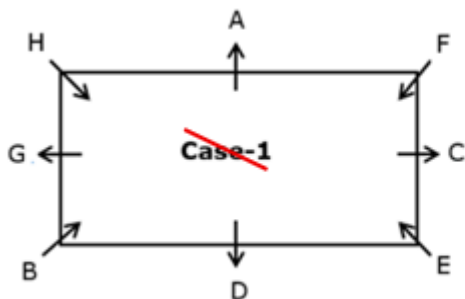

Again, we have

- E sits adjacent to C but does not sit opposite to B.
- F faces the one who sits to the immediate left of G.
- The number of persons who sit between C and F (when counted from the right of C) is **two more than** the number of persons who sit between A and F (when counted from left of A).
- H does not sit at any corner of the table.

From the above conditions, Case-1 gets eliminated because H does not sit at any corner of the table, which is not satisfied.

Hence, case 2 shows the final arrangement.

Answer: E

21. Questions

Final Arrangement:

$Y (55 \text{ kg}) > X (52 \text{ kg}) > D > W (46 \text{ kg}) > H > F$

We have,

- Box D is lighter than only box X and box Y.

$X/Y > D > ___ > ___ > ___$

- Box H is heavier than box F and lighter than box W.

$X/Y > D > W > H > F$

- The weight of box X is 6 kg more than the weight of box W, and the weight of box W is 46 kg.
- The weight of box Y is 55 kg.

$Y (55 \text{ kg}) > X (52 \text{ kg}) > D > W (46 \text{ kg}) > H > F$

Answer: B

$$W + F - 21 = 55$$

$$W + F = 55 + 21$$

$$W + F = 66$$

$$46 + F = 66$$

$$F = 66 - 46 = 30 \text{ kg}$$

22. Questions

Final Arrangement:

$$Y (55 \text{ kg}) > X (52 \text{ kg}) > D > W (46 \text{ kg}) > H > F$$

We have,

- Box D is lighter than only box X and box Y.

$$X/Y > D > ___ > ___ > ___$$

- Box H is heavier than box F and lighter than box W.

$$X/Y > D > W > H > F$$

- The weight of box X is 6 kg more than the weight of box W, and the weight of box W is 46 kg.
- The weight of box Y is 55 kg.

$$Y (55 \text{ kg}) > X (52 \text{ kg}) > D > W (46 \text{ kg}) > H > F$$

@RankZenBanker

Answer: E

23. Questions

Final Arrangement:

$$Y (55 \text{ kg}) > X (52 \text{ kg}) > D > W (46 \text{ kg}) > H > F$$

We have,

- Box D is lighter than only box X and box Y.

$$X/Y > D > ___ > ___ > ___$$

- Box H is heavier than box F and lighter than box W.

$$X/Y > D > W > H > F$$

- The weight of box X is 6 kg more than the weight of box W, and the weight of box W is 46 kg.
- The weight of box Y is 55 kg.

$$Y (55 \text{ kg}) > X (52 \text{ kg}) > D > W (46 \text{ kg}) > H > F$$

Answer: C

24. Questions

Final Arrangement:

$A > E > C > G > B (60) > F (40) > D$

We have,

- C carries more boxes than both B and F.

$C > B / F$

- E carries more boxes than C but does not carry the highest number of boxes.

___ $> E > C > B / F$

- G carries more boxes than B but does not carry more boxes than C.

___ $> E > C > G > B / F$

- D carries less boxes than F.

___ $> E > C > G > B / F > D$

- B carries 60 boxes which is 20 more boxes than F carries.

$A > E > C > G > B (60) > F (40) > D$

Answer: E

25. Questions

Final Arrangement:

$A > E > C > G > B (60) > F (40) > D$

@RankZenBanker

We have,

- C carries more boxes than both B and F.

$C > B / F$

- E carries more boxes than C but does not carry the highest number of boxes.

___ $> E > C > B / F$

- G carries more boxes than B but does not carry more boxes than C.

___ $> E > C > G > B / F$

- D carries less boxes than F.

___ $> E > C > G > B / F > D$

- B carries 60 boxes which is 20 more boxes than F carries.

$A > E > C > G > B (60) > F (40) > D$

Answer: D

$$A + B = 185$$

$$A + 60 = 185$$

$$A = 185 - 60 = 125$$

$$F + G = 105$$

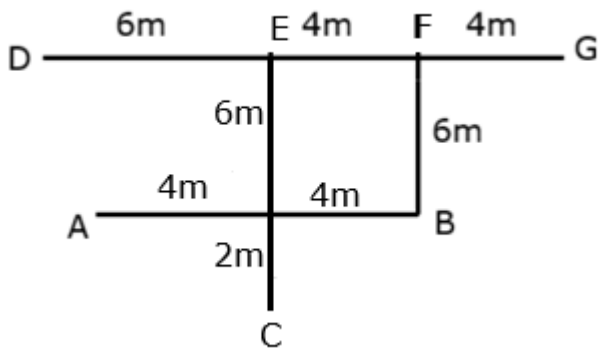

$$40 + G = 105$$

$$G = 105 - 40 = 65$$

$$A - G = 125 - 65 = 60$$

26. Questions

Final Arrangement:

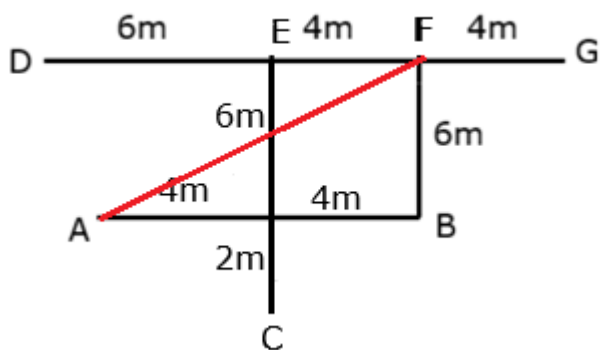

Answer: A

$$AF^2 = 64 + 36$$

$$AF^2 = 100$$

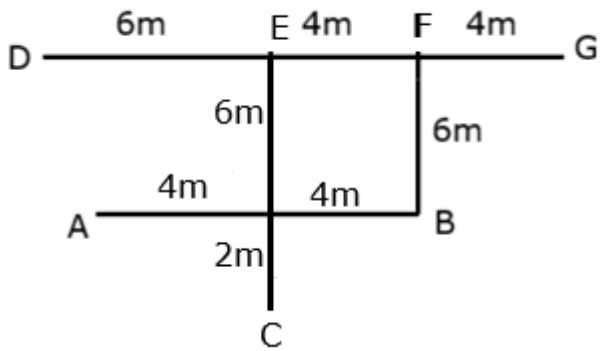

$$AF = \sqrt{100} = 10\text{m}$$

@RankZenBanker

27. Questions

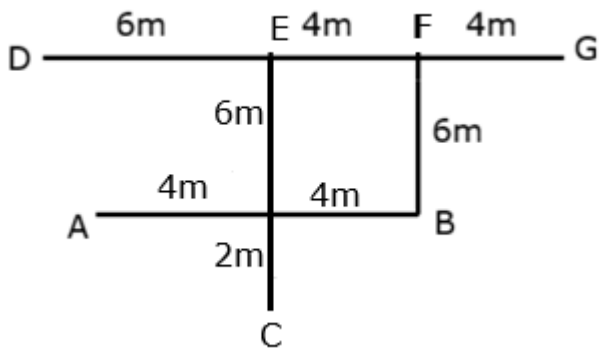

Final Arrangement:

Answer: C

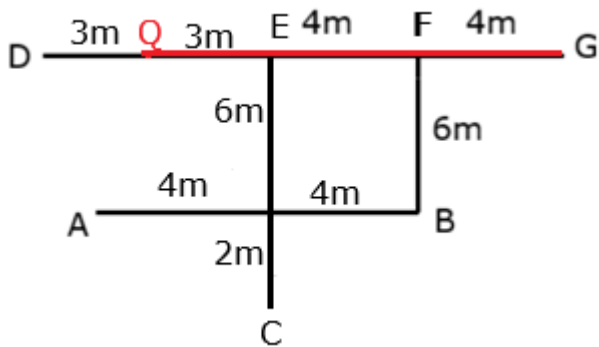

28. Questions

Final Arrangement:

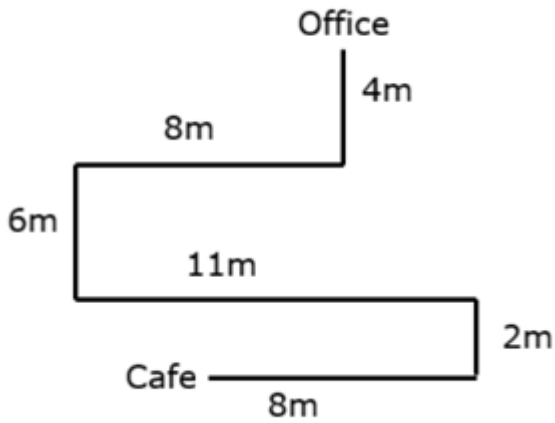

@RankZenBanker

Answer: D

29. Questions

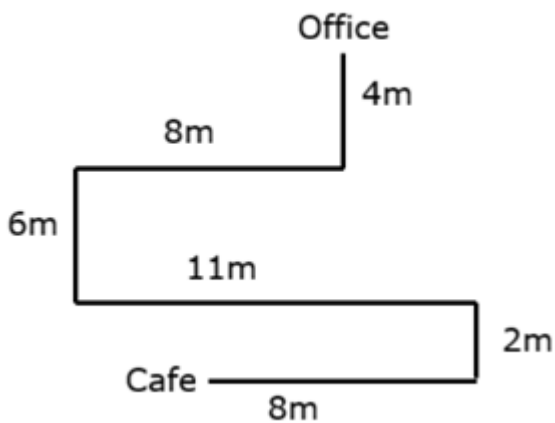

Final Arrangement:

Answer: A

30. Questions

Final Arrangement:

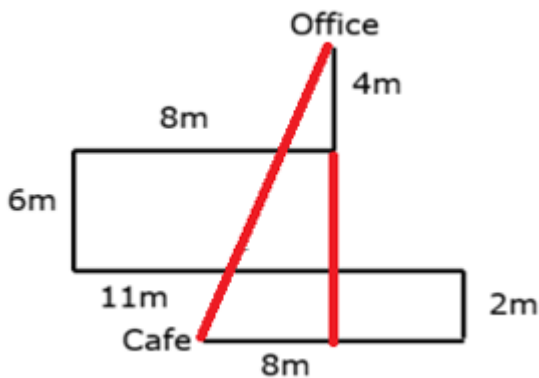

@RankZenBanker

Answer: D

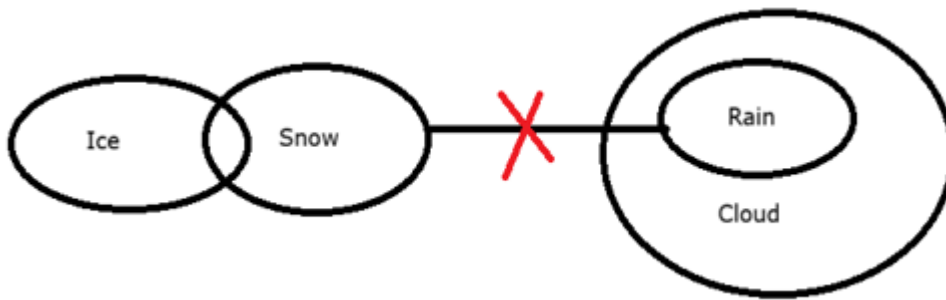

Distance between the office and Cafe = $12^2 + 5^2$

$144 + 25 = 169 = \sqrt{169} = 13\text{m}$

31. Questions

Answer: A

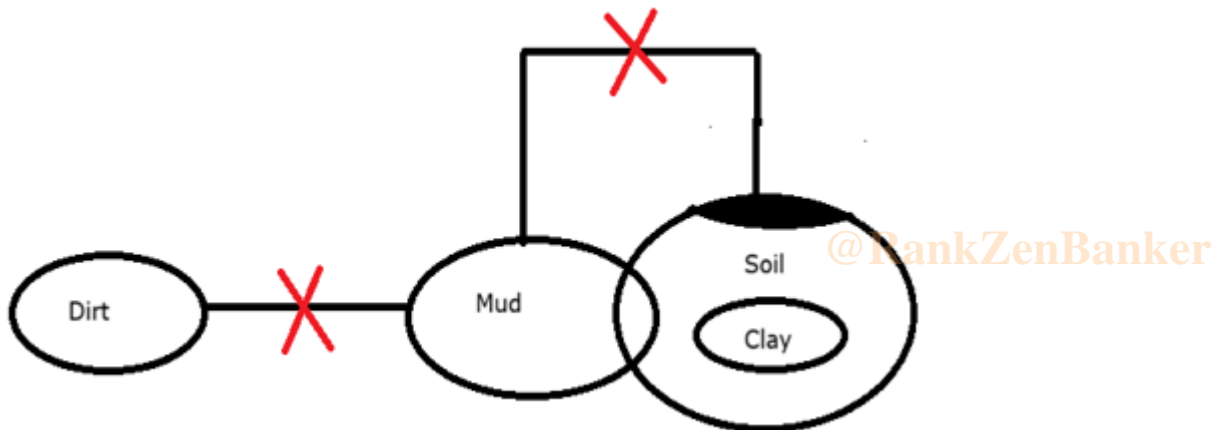

I). Some Ice is not Rain. → True (Here, the part of ice which is snow can never be rain. So, some ice is not rain. Hence, the conclusion I follows)

II). Some Snow is Cloud. → False (Here, snow is not directly connected to cloud. So, all the definite conclusions are false. Hence, conclusion II do not follow)

32. Questions

Answer: E

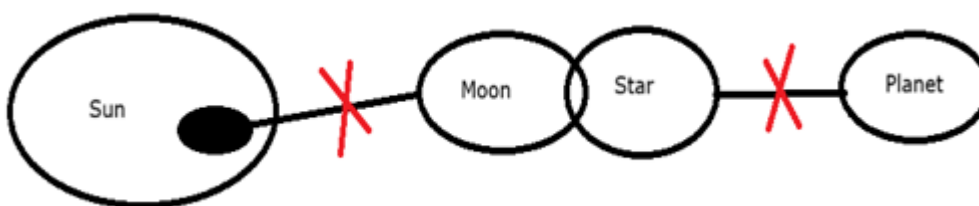

I). Some Dirt can be Clay. → True (Here, there is no direct relation between dirt and clay. So, all the possible relations between them are true. Hence, conclusion I follows)

II). All Clay is not Mud. → False (Here, there is no direct relation between mud and clay. So, all the definite relations between them are false. Hence, conclusion II does not follow)

33. Questions

Answer: C

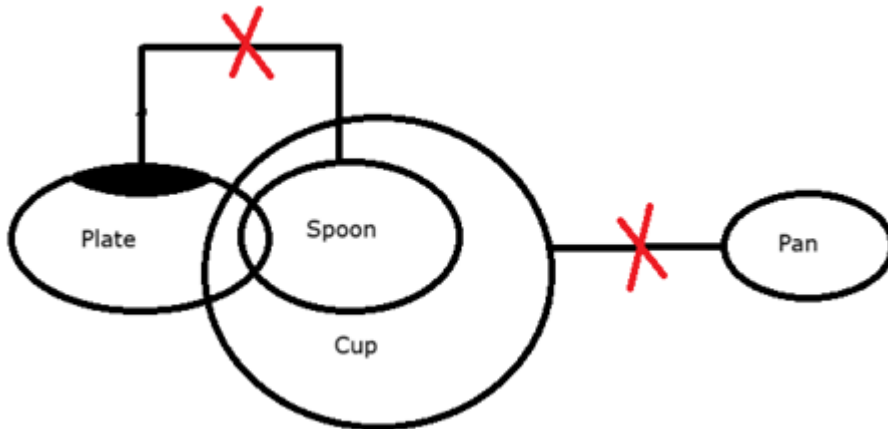

I). Some Planet is Sun. → False (Here, there is no direct relation between the planet and the sun. So, all the definite conclusions between them are false. Hence, conclusion I do not follow)

II). No sun is a planet. → False (Here, there is no direct relation between the planet and the sun. So, all the definite conclusions between them are false. Hence, conclusion II do not follow)

Here, after combining both the conclusions we get that it make a complementary pair.

34. Questions

Answer: A

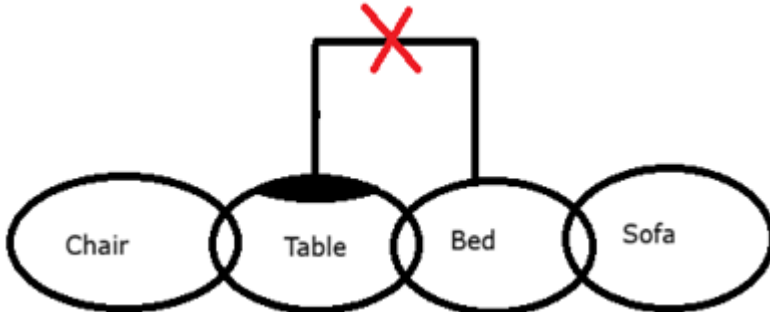

I). Mostly Cup is not Pan → True (Here, cup can never be pan. So, some cup is not pan is false. Hence, case I follows)

II). Some Pan is Plate → False (Here, pan is not directly related to plate. So, all the definite conclusions between them are false. Hence, conclusion II do not follow)

35. Questions

Answer: D

@RankZenBanker

I). Some Sofas are not tables → False (Here, sofa is not directly connected to tables. So, all the definite conclusions between them are false. Hence, conclusion II does not follow)

II). All tables being Beds is a possibility → False (Here, some part of the table can never be a bed. So, all tables being beds can never be a possibility. Hence, case II does not follow)

36. Questions

Answer: E

Given Series: H 4 K O 8 M 3 Z 5 1 P D R A 7 6 I V 9 2 X O 4 7 G E T 9

The required series is Consonant-Number

H 4 K O 8 M 3 Z 5 1 P D R A 7 6 I V 9 2 X O 4 7 G E T 9

The numbers which are there in the series which are immediately preceded by a consonant are **five**.

37. Questions

Answer: A

Given Series: H 4 K O 8 M 3 Z 5 1 P D R A 7 6 I V 9 2 X O 4 7 G E T 9

The element which is 6th to the right of the 14th element from the left end is **2**.

38. Questions

Answer: A

Given Series: H 4 K O 8 M 3 Z 5 1 P D R A 7 6 I V 9 2 X O 4 7 G E T 9

Required Series: H 4 K 8 M 3 Z 5 1 P D **R** 7 6 V 9 2 X 4 7 G T 9

If all the vowels in the series are deleted, which element will be exactly in the middle of the newly formed series "**R**".

39. Questions

Answer: C

Given Series: H 4 K O 8 M 3 Z 5 1 P D R A 7 6 I V 9 2 X O 4 7 G E T 9

Required Series: H 4 K O 8 M 3 Z 5 1 P D R A **7** 6 I V 9 2 X O 4 7 G E T 9

To find the element, which is 4th to the right of the element which is 3rd to the left of the 15th element from the right end "**7**".

40. Questions

Answer: B

@RankZenBanker

Given Series: H 4 K O 8 M 3 Z 5 1 P D R A 7 6 I V 9 2 X O 4 7 G E T 9

Required Series: Consonant-Number-Vowels/Consonant

H 4 K O 8 M 3 Z 5 1 P D R A 7 6 I V 9 2 X O 4 7 G E T 9

The numbers are there in the given series which are immediately preceded by a consonant and immediately followed by either a consonant or a vowel is **Two**.
