

1. Questions

Study the following information carefully and answer the given questions.

Seven items - Pen, Lamp, Chair, Watch, Bottle, Phone and Bag were bought on different days from Monday to Sunday of the same week.

More than four items were bought after the day on which Chair was bought. Only two items were bought between Chair and Bottle. Bottle was bought immediately before Watch. The number of days after the day on which Bottle bought is **two more than** the number of days before the day on which Lamp was bought. Only two items were bought between the Pen and the phone. Bag was bought after Phone but not immediately.

On which of the following days is the Phone bought as per the final arrangement?

- a. Monday
- b. Tuesday
- c. Wednesday
- d. Thursday
- e. Sunday

2. Questions

How many items were bought before Bag as per the final arrangement?

- a. One
- b. Two
- c. Three
- d. More than three
- e. None

3. Questions

Which of the following statement(s) is definitely TRUE as per the final arrangement?

- a. Pen was bought immediately after Lamp
- b. Chair was bought on Tuesday
- c. Watch was bought immediately after Bottle
- d. Lamp was bought not before Bottle
- e. Bag was bought immediately before Pen

4. Questions

Which of the following combination(s) is/are correct as per the final arrangement?

- a. Chair – Monday
- b. Pen – Wednesday
- c. Bottle – Friday
- d. Phone – Sunday
- e. Lamp – Thursday

5. Questions

Four of the following are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

- a. Chair – Bottle
- b. Bottle – Watch
- c. Pen – Phone
- d. Lamp – Watch
- e. Bag - Bottle

6. Questions

Study the following information carefully and answer the given question.

How many such pairs of letters are there in the word “RECOGNITION”, each of which has as many letters between them in the word as in the English alphabetical series (in both forward and backward directions)?

- a. None
- b. One
- c. Two
- d. Three
- e. More than three

7. Questions

Study the following information carefully and answer the questions given below.

Ramu visited eight companies viz.,– Cognizant, HCL, TCS, Infosys, Zoho, Wipro, Oracle and Tech Mahindra for the interview one after another but not necessarily in the same order.

Only one company was visited between Zoho and HCL, which was visited immediately before Infosys. Only two companies were visited between HCL and Wipro, which was visited immediately after Oracle. Cognizant visited two companies after Tech Mahindra, which was visited before TCS.

Which of the following company was visited by Ramu at last?

- a. HCL

- b. The company which was visited immediately after Infosys
- c. Zoho
- d. The company which was visited immediately after Wipro
- e. Cognizant

8. Questions

How many companies were visited before HCL?

- a. None
- b. Two
- c. Three
- d. One
- e. Four

9. Questions

As many companies visited before Oracle as after ____.

- a. Cognizant
- b. HCL
- c. TCS
- d. Wipro
- e. Infosys

@RankZenBanker

10. Questions

Zoho was visited ____ companies before Infosys.

- a. None
- b. One
- c. Two
- d. Four
- e. Three

11. Questions

If Cognizant is related to Infosys and Oracle is related to TCS in a certain way then which of the following company is related to HCL?

- a. Tech Mahindra
- b. Zoho

- c. HCL
- d. Oracle
- e. Infosys

12. Questions

Study the following information carefully and answer the given question.

If in the given number “94872635184”, all the digits are arranged in descending order from left to right, and then the repeated digits are removed, then which digit is the third to the right of the sixth digit from the right end in the number thus formed?

- a. 1
- b. 3
- c. 4
- d. 5
- e. 6

13. Questions

Study the following information carefully and answer the given questions.

Eight people viz., - M, N, O, Q, R, S, T and J are sitting around a square table in such a way that four of them are sitting at the corners and facing the centre while four of them are sitting in the middle of the sides and facing outside (**opposite to the centre**).

S sits third to the right of T. Three people sit between R and S. O sits second to the right of J, who sits adjacent to Q. As many people sit between O and T as between Q and N, when counted from the right of both T and Q. J is not facing M.

Who among the following persons faces away from the centre based on the final arrangement?

- a. S
- b. Q
- c. R
- d. M
- e. N

14. Questions

If all the persons are made to sit in alphabetical order starting from J in the clockwise direction, then how many persons are unchanged in their position (including J)?

- a. One
- b. Two

- c. Three
- d. Four
- e. None

15. Questions

Who among the following persons sits second to the left of M as per the final arrangement?

- a. O
- b. N
- c. S
- d. R
- e. Q

16. Questions

What is the position of S with respect to N based on the final arrangement?

- a. Immediate left
- b. Second to the right
- c. Second to the left
- d. Fourth to the right
- e. Fourth to the left

@RankZenBanker

17. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to that group?

- a. O – S
- b. T – R
- c. R – N
- d. J – Q
- e. M – N

18. Questions

In each of the following questions, assuming the given statements to be true, find which of the two conclusions I and II given below is/are definitely true and give your answer accordingly.

Statements:

$O > V \geq S \leq X; K \geq B = V \leq P$

Conclusions:

I). $S \leq P$

II). $O > K$

- a. If only conclusion I is true
- b. If only conclusion II is true
- c. If either conclusion I or II is true
- d. If neither conclusion I nor II is true
- e. If both conclusions I and II are true

19. Questions

Statements:

$P = Y \geq T > F \leq L < N = C > Q$

Conclusions:

I). $Y \geq N$

II). $P > C$

- a. If only conclusion II is true
- b. If only conclusion I is true
- c. If neither conclusion I nor II is true
- d. If either conclusion I or II is true
- e. If both conclusions I and II are true

@RankZenBanker

20. Questions

Statements:

$S \leq V < Z \geq U > W; P \leq H < Z = M$

Conclusions:

I). $S < M$

II). $H \leq U$

- a. If both conclusions I and II are true
- b. If either conclusion I or II is true
- c. If only conclusion II is true
- d. If neither conclusion I nor II is true
- e. If only conclusion I is true

21. Questions

Study the following information carefully and answer the given question.

In the word “TRIANGLE”, all the consonants are changed to the immediate next letters and all the vowels are changed to the immediate previous letters as per the English alphabetical series. Then, all the letters are arranged in reverse alphabetical order from left to right. Which of the following letters is third to the right of the fourth letter from the left end? (Note: Consider Z as the previous letter of A)

- a. H
- b. F
- c. D
- d. C
- e. B

22. Questions

Study the following information carefully and answer the given questions.

A certain number of persons are sitting in a linear row facing north. P sits 3rd to the right of Z and one of them sits at any end of the row. Three persons sit between P and R. R sits 3rd to the left of G, who is not sitting adjacent to P. Two persons sit between G and U. U is the only neighbour of H. Four persons sit between H and A. A sits exactly between R and K. The number of persons sitting between K and U is the same as the number of persons sitting between R and L.

Who among the following persons sits 2nd to the right of P as per the final arrangement?

- a. G
- b. A
- c. U
- d. H
- e. L

23. Questions

How many persons sit between P and U as per the final arrangement?

- a. Six
- b. Seven
- c. Eight
- d. Five
- e. Nine

24. Questions

As many persons sit to the left of ____ as to the right of ____, respectively.

- a. Z, U
- b. P, R
- c. L, A
- d. K, Z
- e. L, G

25. Questions

If it is possible to form a five-letter meaningful word with the 2nd, 4th, 6th, 8th, and 10th letters from the left end of the word "FANTASTICALLY" (Using each letter once), then what would be the fourth letter of that meaningful word from the left end? If no meaningful word is formed, then mark the answer as X. If more than one meaningful word is formed, then mark the answer as Z.

- a. A
- b. T
- c. I
- d. X
- e. Z

@RankZenBanker

26. Questions

Study the following statements and then decide which of the given conclusions logically follow from the given statements, disregarding the commonly known fact.

Statements:

All Tigers are Carnivores

Some Carnivores are Predators

No Predators are Herbivores

Only a few Animals are Carnivores

Conclusion:

I). Some tigers being herbivores is a possibility

II). Some carnivores are not herbivores

- a. If only conclusion I follows
- b. If only conclusion II follows
- c. If either conclusion I or II follows

- d. If neither conclusion I nor II follows
- e. If both conclusions I and II follow

27. Questions

Statements:

Some Countries are Islands

No Islands are Continents

Some Continents are Oceans

Conclusion:

- I). Some countries are not oceans
 - II). All oceans being islands is a possibility
- a. If both conclusions I and II follow
 - b. If either conclusion I or II follows
 - c. If only conclusion II follows
 - d. If neither conclusion I nor II follows
 - e. If only conclusion I follows

@RankZenBanker

28. Questions

Statements:

Some Vehicles are not Buses

All Cars are Vehicles

Only Buses are Blue

Many Vehicles are colour

Conclusions:

- I). Some Blue are not Cars
 - II). All Buses being Vehicles is a possibility
- a. If neither conclusion I nor II follows
 - b. If either conclusion I or II follows
 - c. If only conclusion I follows
 - d. If both conclusions I and II follow
 - e. If only conclusion II follows

29. Questions

Study the following information carefully and answer the given questions.

7 4 9 2 6 1 8 3 5 1 4 7 2 9 1 6 8 5 3 7 2 7 4 1 9 6 5 8

How many even digits are immediately preceded by an odd digit but not immediately followed by an odd digit?

- a. One
- b. Two
- c. Three
- d. Four
- e. More than four

30. Questions

What is the sum of the digits which are immediately followed by a perfect square digit?

- a. 37
- b. 27
- c. 44
- d. 46
- e. 74

@RankZenBanker

31. Questions

How many digits are there between the 6th digit from the left end and the 8th digit from the right end?

- a. 11
- b. 12
- c. 13
- d. 14
- e. 15

32. Questions

If the first half of the arrangement is reversed, and the second half remains the same, then which digit will be third to the right of the tenth digit from the left end?

- a. 5
- b. 6
- c. 4
- d. 8

e. 9

33. Questions

Study the following information carefully and answer the given questions.

Seven students – A, B, C, D, E, F and G get different marks in an exam. At least three students get more marks than D. F gets more marks than D but less than B. B does not get the highest marks and D does not get the lowest marks. The number of students who get more marks than B is **one less than** the number of students who get less marks than A. C gets more marks than B but not immediately. As many person got more marks than C as less than E. A does not get the third highest marks.

Who among the following person has the third highest marks as per the final arrangement?

- a. G
- b. A
- c. C
- d. B
- e. F

34. Questions

Who among the following person gets just less marks than G based on the final arrangement?

- a. C
- b. A
- c. B
- d. E
- e. F

35. Questions

Which of the following persons got more marks than F but less than B based on the final arrangement?

- a. F
- b. E
- c. B
- d. A
- e. C

Explanations:

1. Questions

Final arrangement:

Days	Items
Monday	Chair
Tuesday	Lamp
Wednesday	Phone
Thursday	Bottle
Friday	Watch
Saturday	Pen
Sunday	Bag

We have,

@RankZenBanker

- More than four items were bought after the day on which Chair was bought.
- Only two items were bought between Chair and Bottle.
- Bottle was bought immediately before Watch.

From the above conditions, there are two possibilities:

Days	Case 1	Case 2
	Items	Items
Monday		Chair
Tuesday	Chair	
Wednesday		
Thursday		Bottle
Friday	Bottle	Watch
Saturday	Watch	
Sunday		

Again, we have,

- The number of days after the day on which Bottle bought was **two more than** the number of days before the day on which Lamp was bought.
- Only two items were bought between the Pen and the phone.
- Bag was bought after Phone but not immediately.

From the above conditions, case 1 gets eliminated because Bag was bought after Phone but not immediately, which is not satisfied.

Hence, Case 2 shows the final arrangement:

Days	Case 1	Case 2
	Items	Items
Monday	Lamp	Chair
Tuesday	Chair	Lamp
Wednesday		Phone
Thursday	Pen/Phone	Bottle
Friday	Bottle	Watch
Saturday	Watch	Pen
Sunday	Pen/Phone	Bag

@RankZenBanker

Answer: C

2. Questions

Final arrangement:

Days	Items
Monday	Chair
Tuesday	Lamp
Wednesday	Phone
Thursday	Bottle
Friday	Watch
Saturday	Pen
Sunday	Bag

We have,

- More than four items were bought after the day on which Chair was bought.
- Only two items were bought between Chair and Bottle.
- Bottle was bought immediately before Watch.

From the above conditions, there are two possibilities:

@RankZenBanker

Days	Case 1	Case 2
	Items	Items
Monday		Chair
Tuesday	Chair	
Wednesday		
Thursday		Bottle
Friday	Bottle	Watch
Saturday	Watch	
Sunday		

Again, we have,

- The number of days after the day on which Bottle bought was **two more than** the number of days before the day on which Lamp was bought.
- Only two items were bought between the Pen and the phone.

- Bag was bought after Phone but not immediately.

From the above conditions, case 1 gets eliminated because Bag was bought after Phone but not immediately, which is not satisfied.

Hence, Case 2 shows the final arrangement:

Days	Case 1	Case 2
	Items	Items
Monday	Lamp	Chair
Tuesday	Chair	Lamp
Wednesday		Phone
Thursday	Pen/Phone	Bottle
Friday	Bottle	Watch
Saturday	Watch	Pen
Sunday	Pen/Phone	Bag

@RankZenBanker

Answer: D

3. Questions

Final arrangement:

Days	Items
Monday	Chair
Tuesday	Lamp
Wednesday	Phone
Thursday	Bottle
Friday	Watch
Saturday	Pen
Sunday	Bag

We have,

- More than four items were bought after the day on which Chair was bought.
- Only two items were bought between Chair and Bottle.
- Bottle was bought immediately before Watch.

From the above conditions, there are two possibilities:

Days	Case 1	Case 2
	Items	Items
Monday		Chair
Tuesday	Chair	
Wednesday		
Thursday		Bottle
Friday	Bottle	Watch
Saturday	Watch	
Sunday		

@RankZenBanker

Again, we have,

- The number of days after the day on which Bottle bought was **two more than** the number of days before the day on which Lamp was bought.
- Only two items were bought between the Pen and the phone.
- Bag was bought after Phone but not immediately.

From the above conditions, case 1 gets eliminated because Bag was bought after Phone but not immediately, which is not satisfied.

Hence, Case 2 shows the final arrangement:

Days	Case 1	Case 2
	Items	Items
Monday	Lamp	Chair
Tuesday	Chair	Lamp
Wednesday		Phone
Thursday	Pen/Phone	Bottle
Friday	Bottle	Watch
Saturday	Watch	Pen
Sunday	Pen/Phone	Bag

Answer: C

4. Questions

Final arrangement:

@RankZenBanker

Days	Items
Monday	Chair
Tuesday	Lamp
Wednesday	Phone
Thursday	Bottle
Friday	Watch
Saturday	Pen
Sunday	Bag

We have,

- More than four items were bought after the day on which Chair was bought.
- Only two items were bought between Chair and Bottle.
- Bottle was bought immediately before Watch.

From the above conditions, there are two possibilities:

Days	Case 1	Case 2
	Items	Items
Monday		Chair
Tuesday	Chair	
Wednesday		
Thursday		Bottle
Friday	Bottle	Watch
Saturday	Watch	
Sunday		

Again, we have,

- The number of days after the day on which Bottle bought was **two more than** the number of days before the day on which Lamp was bought.
- Only two items were bought between the Pen and the phone.
- Bag was bought after Phone but not immediately.

From the above conditions, case 1 gets eliminated because Bag was bought after Phone but not immediately, which is not satisfied.

Hence, Case 2 shows the final arrangement:

Days	Case 1	Case 2
	Items	Items
Monday	Lamp	Chair
Tuesday	Chair	Lamp
Wednesday		Phone
Thursday	Pen/Phone	Bottle
Friday	Bottle	Watch
Saturday	Watch	Pen
Sunday	Pen/Phone	Bag

Answer: A

5. Questions

Final arrangement:

@RankZenBanker

Days	Items
Monday	Chair
Tuesday	Lamp
Wednesday	Phone
Thursday	Bottle
Friday	Watch
Saturday	Pen
Sunday	Bag

We have,

- More than four items were bought after the day on which Chair was bought.
- Only two items were bought between Chair and Bottle.
- Bottle was bought immediately before Watch.

From the above conditions, there are two possibilities:

Days	Case 1	Case 2
	Items	Items
Monday		Chair
Tuesday	Chair	
Wednesday		
Thursday		Bottle
Friday	Bottle	Watch
Saturday	Watch	
Sunday		

Again, we have,

- The number of days after the day on which Bottle bought was **two more than** the number of days before the day on which Lamp was bought.
- Only two items were bought between the Pen and the phone.
- Bag was bought after Phone but not immediately.

From the above conditions, case 1 gets eliminated because Bag was bought after Phone but not immediately, which is not satisfied.

Hence, Case 2 shows the final arrangement:

Days	Case 1	Case 2
	Items	Items
Monday	Lamp	Chair
Tuesday	Chair	Lamp
Wednesday		Phone
Thursday	Pen/Phone	Bottle
Friday	Bottle	Watch
Saturday	Watch	Pen
Sunday	Pen/Phone	Bag

Answer: B (In all the other options, two items were bought between the given items, except in option b)

6. Questions

Answer: E

@RankZenBanker

There are five such pairs.

7. Questions

Final arrangement:

Companies
Tech Mahindra
Zoho
Cognizant
HCL
Infosys
Oracle
Wipro
TCS

We have,

- Only one company was visited between Zoho and HCL, which was visited immediately before Infosys.

From the above condition, there are two possibilities

Case 1	Case 2
HCL	Zoho
Infosys	
Zoho	HCL
	Infosys

@RankZenBanker

Again we have,

- Only two companies were visited between HCL and Wipro, which is visited immediately after Oracle.

From the above condition, there are three possibilities

Case 1	Case 2	Case 2a
Oracle	Oracle	Zoho
Wipro	Wipro	
	Zoho	HCL
		Infosys
HCL	HCL	Oracle
Infosys	Infosys	Wipro
Zoho		

Again we have,

- Cognizant visited two companies after Tech Mahindra, which was before TCS.

From the above condition, case 1 and case 2 gets eliminated, because cognizant visited two companies after Tech Mahindra. Hence Case-2a shows the final arrangement.

Case 1	Case 2	Case 2a
Oracle	Oracle	Tech Mahindra
Wipro	Wipro	Zoho
	Zoho	Cognizant
		HCL
HCL	HCL	Infosys
Infosys	Infosys	Oracle
Zoho		Wipro
		TCS

Answer: D

8. Questions

Final arrangement:

Companies
Tech Mahindra
Zoho
Cognizant
HCL
Infosys
Oracle
Wipro
TCS

@RankZenBanker

We have,

- Only one company was visited between Zoho and HCL, which was visited immediately before Infosys.

From the above condition, there are two possibilities

Case 1	Case 2
HCL	Zoho
Infosys	
Zoho	HCL
	Infosys

Again we have,

- Only two companies were visited between HCL and Wipro, which is visited immediately after Oracle.

From the above condition, there are three possibilities

Case 1	Case 2	Case 2a
Oracle	Oracle	Zoho
Wipro	Wipro	
	Zoho	HCL
		Infosys
HCL	HCL	Oracle
Infosys	Infosys	Wipro
Zoho		

Again we have,

- Cognizant visited two companies after Tech Mahindra, which was before TCS.

From the above condition, case 1 and case 2 gets eliminated, because cognizant visited two companies after Tech Mahindra. Hence Case-2a shows the final arrangement.

Case 1	Case 2	Case 2a
Oracle	Oracle	Tech Mahindra
Wipro	Wipro	Zoho
	Zoho	Cognizant
		HCL
HCL	HCL	Infosys
Infosys	Infosys	Oracle
Zoho		Wipro
		TCS

@RankZenBanker

Answer: C

9. Questions

Final arrangement:

Companies
Tech Mahindra
Zoho
Cognizant
HCL
Infosys
Oracle
Wipro
TCS

We have,

- Only one company was visited between Zoho and HCL, which was visited immediately before Infosys.

From the above condition, there are two possibilities

Case 1	Case 2
HCL	Zoho
Infosys	
Zoho	HCL
	Infosys

@RankZenBanker

Again we have,

- Only two companies were visited between HCL and Wipro, which is visited immediately after Oracle.

From the above condition, there are three possibilities

Case 1	Case 2	Case 2a
Oracle	Oracle	Zoho
Wipro	Wipro	
	Zoho	HCL
		Infosys
HCL	HCL	Oracle
Infosys	Infosys	Wipro
Zoho		

Again we have,

- Cognizant visited two companies after Tech Mahindra, which was before TCS.

From the above condition, case 1 and case 2 gets eliminated, because cognizant visited two companies after Tech Mahindra. Hence Case-2a shows the final arrangement.

Case 1	Case 2	Case 2a
Oracle	Oracle	Tech Mahindra
Wipro	Wipro	Zoho
	Zoho	Cognizant
		HCL
HCL	HCL	Infosys
Infosys	Infosys	Oracle
Zoho		Wipro
		TCS

Answer: A

10. Questions

Final arrangement:

Companies
Tech Mahindra
Zoho
Cognizant
HCL
Infosys
Oracle
Wipro
TCS

@RankZenBanker

We have,

- Only one company was visited between Zoho and HCL, which was visited immediately before Infosys.

From the above condition, there are two possibilities

Case 1	Case 2
HCL	Zoho
Infosys	
Zoho	HCL
	Infosys

Again we have,

- Only two companies were visited between HCL and Wipro, which is visited immediately after Oracle.

From the above condition, there are three possibilities

Case 1	Case 2	Case 2a
Oracle	Oracle	Zoho
Wipro	Wipro	
	Zoho	HCL
		Infosys
HCL	HCL	Oracle
Infosys	Infosys	Wipro
Zoho		

Again we have,

- Cognizant visited two companies after Tech Mahindra, which was before TCS.

From the above condition, case 1 and case 2 gets eliminated, because cognizant visited two companies after Tech Mahindra. Hence Case-2a shows the final arrangement.

Case 1	Case 2	Case 2a
Oracle	Oracle	Tech Mahindra
Wipro	Wipro	Zoho
	Zoho	Cognizant
		HCL
HCL	HCL	Infosys
Infosys	Infosys	Oracle
Zoho		Wipro
		TCS

@RankZenBanker

Answer: E

11. Questions

Final arrangement:

Companies
Tech Mahindra
Zoho
Cognizant
HCL
Infosys
Oracle
Wipro
TCS

We have,

- Only one company was visited between Zoho and HCL, which was visited immediately before Infosys.

From the above condition, there are two possibilities

Case 1	Case 2
HCL	Zoho
Infosys	
Zoho	HCL
	Infosys

@RankZenBanker

Again we have,

- Only two companies were visited between HCL and Wipro, which is visited immediately after Oracle.

From the above condition, there are three possibilities

Case 1	Case 2	Case 2a
Oracle	Oracle	Zoho
Wipro	Wipro	
	Zoho	HCL
		Infosys
HCL	HCL	Oracle
Infosys	Infosys	Wipro
Zoho		

Again we have,

- Cognizant visited two companies after Tech Mahindra, which was before TCS.

From the above condition, case 1 and case 2 gets eliminated, because cognizant visited two companies after Tech Mahindra. Hence Case-2a shows the final arrangement.

Case 1	Case 2	Case 2a
Oracle	Oracle	Tech Mahindra
Wipro	Wipro	Zoho
	Zoho	Cognizant
		HCL
HCL	HCL	Infosys
Infosys	Infosys	Oracle
Zoho		Wipro
		TCS

Answer: B (First company is visited two companies before second company)

12. Questions

Answer: B

The given number = 94872635184

After arranging the digits in descending order from left end: 98876544321

After removing repeated digits: 9765321

Now, 6th digit from the right end = 7

So, 3rd to the right of 7 = 3.

13. Questions

Final arrangement:

We have,

- S sits third to the right of T.
- Three people sit between R and S.

From the above conditions, there are two possibilities:

Again, we have,

- O sits second to the right of J who sits adjacent to Q.
- As many people sit between O and T as between Q and N, when counted from the right of both T and Q.

@RankZenBanker

Again, we have,

- J is not facing M.

From the above condition, case 2 gets eliminated because J is not facing M, which is not satisfied.

Hence, Case 1 shows the final arrangement:

Answer: D

14. Questions

Final arrangement:

We have,

- S sits third to the right of T.
- Three people sit between R and S.

From the above conditions, there are two possibilities:

Again, we have,

@RankZenBanker

- O sits second to the right of J who sits adjacent to Q.
- As many people sit between O and T as between Q and N, when counted from the right of both T and Q.

Again, we have,

- J is not facing M.

From the above condition, case 2 gets eliminated because J is not facing M, which is not satisfied.

Hence, Case 1 shows the final arrangement:

Answer: B (Only two people J and R remains at the same position)

15. Questions

Final arrangement:

We have,

- S sits third to the right of T.
- Three people sit between R and S.

@RankZenBanker

From the above conditions, there are two possibilities:

Again, we have,

- O sits second to the right of J who sits adjacent to Q.
- As many people sit between O and T as between Q and N, when counted from the right of both T and Q.

Again, we have,

- J is not facing M.

From the above condition, case 2 gets eliminated because J is not facing M, which is not satisfied.

Hence, Case 1 shows the final arrangement:

@RankZenBanker

Answer: A

16. Questions

Final arrangement:

We have,

- S sits third to the right of T.
- Three people sit between R and S.

From the above conditions, there are two possibilities:

Again, we have,

- O sits second to the right of J who sits adjacent to Q.
- As many people sit between O and T as between Q and N, when counted from the right of both T and Q.

@RankZenBanker

Again, we have,

- J is not facing M.

From the above condition, case 2 gets eliminated because J is not facing M, which is not satisfied.

Hence, Case 1 shows the final arrangement:

Answer: B

17. Questions

Final arrangement:

We have,

- S sits third to the right of T.
- Three people sit between R and S.

From the above conditions, there are two possibilities:

Again, we have,

@RankZenBanker

- O sits second to the right of J who sits adjacent to Q.
- As many people sit between O and T as between Q and N, when counted from the right of both T and Q.

Again, we have,

- J is not facing M.

From the above condition, case 2 gets eliminated because J is not facing M, which is not satisfied.

Hence, Case 1 shows the final arrangement:

Answer: C (In all the other options, the second person sits immediate left of the first person, except in option c)

18. Questions

Answer: A

Given: $O > V \geq S \leq X$; $K \geq B = V \leq P$

I). $S \leq P$ - ($S \leq V \leq P$) - **True**

II). $O > K$ - ($O > V = B \leq K$) - **False**

19. Questions

Answer: C

Given: $P = Y \geq T > F \leq L < N = C > Q$

I). $Y \geq N$ - ($Y \geq T > F \leq L < N$) - **False**

II). $P > C$ - ($P = Y \geq T > F \leq L < N = C$) - **False**

20. Questions

Answer: E

Given: $S \leq V < Z \geq U > W$; $P \leq H < Z = M$

I). $S < M$ - ($S \leq V < Z = M$) - **True**

II). $H \leq U$ - ($H < Z \geq U$) - **False**

21. Questions

Answer: A

Given word = TRIANGLE

After changing the letters: All the consonants are changed to the immediate next letters, and all the vowels are changed to the immediate previous letters as per the English alphabetical series.

$T \rightarrow U$

$R \rightarrow S$

$I \rightarrow H$

$A \rightarrow Z$

@RankZenBanker

$N \rightarrow O$

$G \rightarrow H$

$L \rightarrow M$

$E \rightarrow D$

New word thus formed = U S H Z O H M D

After arranging in reverse alphabetical order: Z U S O M H H D

4th letter from the left end = O

3rd to the right of O = H.

22. Questions

Final arrangement:

We have,

- P sits 3rd to the right of Z and one of them sits at any end of the row.
- Three persons sit between P and R.

From the above conditions, we get two possibilities:

Case 1

Case 2

Again, we have,

- R sits 3rd to the left of G who is not adjacent to P.
- Two persons sit between G and U.
- U is the only neighbour of H.

From the above conditions, case 2 gets eliminated because R sits 3rd to the left of G who is not adjacent to P, which is not satisfied.

@RankZenBanker

Again, we have,

- Four persons sit between H and A.
- A sits exactly between R and K.
- The number of persons sitting between K and U is **the same as** the number of persons sitting between R and L.

Hence, case 1 shows the final arrangement:

Answer: E

@RankZenBanker

23. Questions

Final arrangement:

We have,

- P sits 3rd to the right of Z and one of them sits at any end of the row.
- Three persons sit between P and R.

From the above conditions, we get two possibilities:

Again, we have,

- R sits 3rd to the left of G who is not adjacent to P.
- Two persons sit between G and U.
- U is the only neighbour of H.

From the above conditions, case 2 gets eliminated because R sits 3rd to the left of G who is not adjacent to P, which is not satisfied.

Again, we have,

- Four persons sit between H and A.
- A sits exactly between R and K.
- The number of persons sitting between K and U is **the same as** the number of persons sitting between R and L.

@RankZenBanker

Hence, case 1 shows the final arrangement:

Answer: E

24. Questions

Final arrangement:

We have,

- P sits 3rd to the right of Z and one of them sits at any end of the row.
- Three persons sit between P and R.

From the above conditions, we get two possibilities:

Again, we have,

- R sits 3rd to the left of G who is not adjacent to P.
- Two persons sit between G and U.
- U is the only neighbour of H.

From the above conditions, case 2 gets eliminated because R sits 3rd to the left of G who is not adjacent to P, which is not satisfied.

@RankZenBanker

Again, we have,

- Four persons sit between H and A.
- A sits exactly between R and K.
- The number of persons sitting between K and U is **the same as** the number of persons sitting between R and L.

Hence, case 1 shows the final arrangement:

Answer: C

25. Questions

Answer: D

Given Word: FANTASTICALLY

2nd, 4th, 6th, 8th, and 10th letters – A, T, S, I and A respectively

Thus, no meaningful word is formed.

26. Questions

Answer: E

I). Some tigers being herbivores is a possibility - **Follows**, because there is no direct relation between tigers and herbivores, so their relation will follow in possibility. Hence the conclusion follows.

II). Some carnivores are not herbivores - **Follows**, because the part of carnivores which are predators cannot be herbivores. Hence, the conclusion follows.

27. Questions

Answer: D

I). Some countries are not oceans - **Doesn't follow**, because there is no direct relation between countries and oceans. so any definite relation between them will not follow. Hence, the conclusion doesn't follow.

II). All oceans being islands is a possibility - **Doesn't follow**, because some oceans are continents and no continents are islands. Thus, all oceans can never be islands. Hence, the conclusion doesn't follow.

28. Questions

Answer: C

I). Some Blue are not Cars - **Follows**, because Blue is only related to Buses. The relation of Blue with any

other element is not possible. Hence, the conclusion follow.

II). All Buses being Vehicles is a possibility - **Doesn't follow**, because the part of Buses which are Blue can never be related to any other element. Hence, the conclusion doesn't follow.

29. Questions

Answer: C

Given Series: 7 4 9 2 6 1 8 3 5 1 4 7 2 9 1 6 8 5 3 7 2 7 4 1 9 6 5 8

Even digits which are immediately preceded by an odd digit but not immediately followed by an odd digit:

Required series: 7 4 9 **2** 6 1 8 3 5 1 4 7 2 9 1 **6** 8 5 3 7 2 7 4 1 9 6 5 **8**

Thus, there are three such even digits.

30. Questions

Answer: D

Given Series: 7 4 9 2 6 1 8 3 5 1 4 7 2 9 1 6 8 5 3 7 2 7 4 1 9 6 5 8

Digits which are immediately followed by a perfect square digit:

7 4 9 2 6 1 8 3 5 1 4 7 2 9 1 6 8 5 3 7 2 7 4 1 9 6 5 8

So, the sum = $7 + 4 + 6 + 5 + 1 + 2 + 9 + 7 + 4 + 1 = 46$

31. Questions

Answer: D

Given Series: 7 4 9 2 6 1 8 3 5 1 4 7 2 9 1 6 8 5 3 7 2 7 4 1 9 6 5 8

6th digit from the left end: 1

8th digit from the right end: 2

Thus, there are 14 digits between 1 and 2.

32. Questions

Answer: C

Given Series: 7 4 9 2 6 1 8 3 5 1 4 7 2 9 1 6 8 5 3 7 2 7 4 1 9 6 5 8

If the first half of the arrangement is reversed: 9 2 7 4 1 5 3 8 1 6 2 9 4 7

New series: 9 2 7 4 1 5 3 8 1 6 2 9 **4** 7 1 6 8 5 3 7 2 7 4 1 9 6 5 8

Tenth digit from the left end: 6

Third to the right of 6: **4**

33. Questions

Final Arrangement:

C > G > B > A > F > D > E

@RankZenBanker

We have,

- At least three students get more marks than D.
- F gets more marks than D but less than B.
- B does not get the highest marks and D does not get the lowest marks.

From the above conditions, we get three possibilities:

____ > B > F > D > ____ > ____ > ____ (Case 1)

____ > B / > B/F > F > D > ____ > ____ (Case 2)

____ > B > B/F > B/F > F > D > ____ (Case 3)

Again, we have,

- The number of students who get more marks than B is **one less than** the number of students who get less marks than A.
- C gets more marks than B but not immediately.

From the above conditions, case 2 gets eliminated because the number of students who get more marks than B is **one less than** the number of students who get less marks than A and also, case 1 gets eliminated because C gets more marks than B but not immediately, which is not satisfied.

Also, case 3 splits into one more case as case 3a.

~~__C_ > B > F > D > A > ____ > ____ (Case 1)~~

~~____ > B / > B/F > F > D > ____ > ____ (Case 2)~~

C > > B > A > F > D > ____ (Case 3)

C / > C / > A > B > F > D > ____ (Case 3a)

Again, we have,

- As many person got more marks than C as less than E.
- A does not get the third highest marks.

From the above condition, case 3a gets eliminated because A does not get the third highest marks which is not satisfied.

Hence, case 3 shows the final arrangement:

C > G > B > A > F > D > E (Case 3)

~~C / > C / > A > B > F > D > ____ (Case 3a)~~

Answer: D

@RankZenBanker

34. Questions

Final Arrangement:

C > G > B > A > F > D > E

We have,

- At least three students get more marks than D.
- F gets more marks than D but less than B.
- B does not get the highest marks and D does not get the lowest marks.

From the above conditions, we get three possibilities:

_____ > B > F > D > _____ > _____ > _____ (Case 1)

_____ > B/ > B/F > F > D > _____ > _____ (Case 2)

_____ > B > B/F > B/F > F > D > _____ (Case 3)

Again, we have,

- The number of students who get more marks than B is **one less than** the number of students who get less marks than A.
- C gets more marks than B but not immediately.

From the above conditions, case 2 gets eliminated because the number of students who get more marks than B is **one less than** the number of students who get less marks than A and also, case 1 gets eliminated because C gets more marks than B but not immediately, which is not satisfied.

Also, case 3 splits into one more case as case 3a.

C > B > F > D > A > ____ > ____ (Case 1)

___ > B/ > B/F > F > D > ___ > ___ (Case 2)

C > > B > A > F > D > ____ (Case 3)

C/ > C/ > A > B > F > D > ____ (Case 3a)

Again, we have,

- As many person got more marks than C as less than E.
- A does not get the third highest marks.

From the above condition, case 3a gets eliminated because A does not get the third highest marks which is not satisfied.

Hence, case 3 shows the final arrangement:

$C > G > B > A > F > D > E$ (Case 3)

$C / > C / > A > B > F > D > ___$ (Case 3a)

Answer: C

35. Questions

Final Arrangement:

$C > G > B > A > F > D > E$

We have,

- At least three students get more marks than D.
- F gets more marks than D but less than B.
- B does not get the highest marks and D does not get the lowest marks.

From the above conditions, we get three possibilities:

$___ > B > F > D > ___ > ___ > ___$ (Case 1)

$___ > B / > B / F > F > D > ___ > ___$ (Case 2)

$___ > B > B / F > B / F > F > D > ___$ (Case 3)

Again, we have,

@RankZenBanker

- The number of students who get more marks than B is **one less than** the number of students who get less marks than A.
- C gets more marks than B but not immediately.

From the above conditions, case 2 gets eliminated because the number of students who get more marks than B is **one less than** the number of students who get less marks than A and also, case 1 gets eliminated because C gets more marks than B but not immediately, which is not satisfied.

Also, case 3 splits into one more case as case 3a.

$___ C ___ > B > F > D > A > ___ > ___$ (Case 1)

$___ > B / > B / F > F > D > ___ > ___$ (Case 2)

$C > ___ > B > A > F > D > ___$ (Case 3)

$C / > C / > A > B > F > D > ___$ (Case 3a)

Again, we have,

- As many person got more marks than C as less than E.
- A does not get the third highest marks.

From the above condition, case 3a gets eliminated because A does not get the third highest marks which is not satisfied.

Hence, case 3 shows the final arrangement:

$C > G > B > A > F > D > E$ (Case 3)

$C / > C / > A > B > F > D > \text{---}$ (Case 3a)

Answer: D

@RankZenBanker
