

1. Questions

Study the following information carefully and answer the questions given below.

Eight people- M, N, O, P, Q, R, S and T are working in the Supreme Court at different designations. The designations are in decreasing order such as Justice, Judge, Magistrate, Attorney, Advocate, Clerk, Reporter and Secretary. The designations are given in decreasing order where Justice is the senior most and Secretary is the junior most designation.

Only three persons are designated between O and S, where S is senior to O. Q is immediately junior to O. Q is not designated as secretary. Only two persons are designated between P and M where P is senior to M. P is not working as an Advocate. T is senior to M but immediately junior to N.

Who among the following persons is working as Secretary?

- a. M
- b. S
- c. R
- d. P
- e. T

2. Questions

What is the designation of N?

@RankZenBanker

- a. Justice
- b. Magistrate
- c. Advocate
- d. Reporter
- e. Judge

3. Questions

How many people are designated between N and Q?

- a. One
- b. Four
- c. Three
- d. Two
- e. Five

4. Questions

Which among the following statement(s) is/are true?

- a. T is designated as Attorney
- b. N is not senior to P
- c. Q is immediately senior to R
- d. Only two persons are designated between Q and T
- e. M is not junior to O

5. Questions

Who among the following persons is designated between T and Q?

I). P

II). R

III). O

- a. Only I
- b. Both I and II
- c. Both I and III
- d. Both II and III
- e. Only II

@RankZenBanker

6. Questions

Study the following information carefully and answer the given questions.

Eight people, viz., A, B, C, D, E, F, G and H are sitting around a square table in such a way that four of them are sitting at the corners while four of them are sitting in the middle of the sides and all are facing inside the centre.

Note: No two consecutive alphabetically named people sit adjacent to each other.

D sits at one of the corners. A sits second to the left of D. Neither E nor B sits adjacent to D. F sits to the immediate right of B but does not sit adjacent to A. Two people sit between C and G. C sits opposite to D. The number of people who sit between A and F, when counted from the right of A, is **one less than** the number of people who sit between G and H, when counted from the left of G.

Who among the following persons sits to the immediate left of D?

- a. F
- b. H
- c. G
- d. E
- e. None of these

7. Questions

How many persons sit between B and G, when counted from the left of B?

- a. One
- b. Two
- c. Three
- d. Four
- e. More than four

8. Questions

If A is related to H and B is related to E in a certain way, then who among the following is related to C in the same way?

- a. H
- b. B
- c. D
- d. G
- e. F

9. Questions

@RankZenBanker

If all the persons are made to sit in alphabetical order in a clockwise direction with respect to A, then how many persons remain unchanged in their positions (excluding A)?

- a. None
- b. One
- c. Two
- d. Three
- e. Four

10. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one does not belong to the group?

- a. E
- b. A
- c. H
- d. G
- e. F

11. Questions

Study the following information carefully and answer the given questions.

Seven people, viz., A, B, C, D, E, F, and G live on seven different floors of a seven-storeyed building where the lowermost floor is numbered one, the one above that is numbered two and so on till the topmost floor is numbered seven. Only one person lives on each floor.

D lives on an even-numbered floor immediately above A. Only two people live between A and F. The number of people lives above E **is equal to** the number of people lives below C. B and E are not immediate neighbours. Only two people live between E and G. B, neither lives on the topmost floor nor lives below E.

Who among the following persons lives immediately above G?

- a. B
- b. A
- c. C
- d. E
- e. F

12. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one does not belong to the group?

- a. CD
- b. AG
- c. FE
- d. GB
- e. DB

13. Questions

Which of the following statements is/are true as per the final arrangement?

- a. Only one person lives between B and G
- b. C lives immediately above A.
- c. D lives on the topmost floor.
- d. G lives immediately above D.
- e. Two people live between A and F.

14. Questions

How many people lives between D and B?

- a. None
- b. One
- c. Two
- d. Three
- e. Four

15. Questions

What is the position of A's floor with respect to E's floor?

- a. Immediately above
- b. Immediately below
- c. Two floors below
- d. Three floors below
- e. Four floors above

16. Questions

Study the following information carefully and answer the given questions

Nine persons viz., L, M, N, O, P, Q, R, S and T are sitting in a linear row and facing the north, but not necessarily in the same order.

Only one person sits to the right of O, who sits second to the right of L. Only two persons sit between N and L. O and S are immediate neighbours. The number of persons sits to the right of S is **one more** than the number of persons sits to the left of R. T sits immediate right of P, where both of them is not an immediate neighbour of R. More than one person sits between M and Q, who sits to the right of P.

If all the persons are made to sit in the alphabetical order from left to right, then who among the following person remains unchanged in their position?

- a. M
- b. Q
- c. S
- d. N
- e. L

17. Questions

Which of the following pair of persons sit at the extreme ends of the row?

- a. MQ
- b. RL

- c. SN
- d. OM
- e. QT

18. Questions

Who among the following person sits third to the left of P?

- a. T
- b. S
- c. The one who sit at the left end
- d. Q
- e. The one who sits immediate left of S

19. Questions

Who among the following person(s) sits to the left of L?

i). O

ii). P

iii). R

- a. Only i
- b. Only ii
- c. Only iii
- d. Both i and ii
- e. Both ii and iii

@RankZenBanker

20. Questions

How many persons are sitting between P and O?

- a. Two
- b. Three
- c. One
- d. More than three
- e. No one

21. Questions

Study the following information carefully and answer the given questions.

847 593 261 728 415

What is the value obtained by multiplying the middle digit of the highest number with the middle digit of the lowest number?

- a. 6
- b. 8
- c. 10
- d. 12
- e. 24

22. Questions

If all the digits in each number are arranged in ascending order within the number from left to right, then what is the difference between the highest and lowest number thus formed?

- a. 586
- b. 333
- c. 352
- d. 233
- e. 135

@RankZenBanker

23. Questions

How many numbers are there in the given series in which the sum of the first and last digit is greater than the middle digit?

- a. Two
- b. Three
- c. Four
- d. Five
- e. None

24. Questions

If all the numbers are arranged in descending order from left to right, then which number will be the second number from the right end?

- a. 847
- b. 728
- c. 261
- d. 415

e. 593

25. Questions

If we interchange the first and second digit of each number then, what is the difference between the second-highest and fifth- lowest number thus formed (Ignore the negative signs)?

- a. 234
- b. 432
- c. 126
- d. 342
- e. 332

26. Questions

Study the following information carefully and answer the given questions.

If all the letters of the word 'BLUEPRINT' are arranged in alphabetical order from left to right, then how many letters will remain unchanged in their original positions?

- a. None
- b. One
- c. Two
- d. Three
- e. More than three

@RankZenBanker

27. Questions

In the number "391864275183", the positions of the 1st and 2nd digits, 3rd and 4th digits, 5th and 6th digits, and so on are interchanged, then which of the following digits will be exactly in the middle of the number?

- a. 3 and 5
- b. 4 and 6
- c. 6 and 7
- d. 7 and 5
- e. 2 and 4

28. Questions

How many such pairs of letters are there in the word "SANCTUARY" each of which has as many letters between them as there are in the English alphabetical series (in both forward and backward directions)?

- a. None
- b. One
- c. Two
- d. Three
- e. More than three

29. Questions

In the number “472861953”, each even digit which is smaller than 6 is multiplied by 2 and each even digit which is greater than or equal to 6 remains the same, and each odd digit is decreased by 1, then all the digits are arranged in ascending order from left to right. Which of the following digits will be second from the left end of the new number thus formed?

- a. 4
- b. 8
- c. 6
- d. 2
- e. 0

30. Questions

@RankZenBanker

If it is possible to form a four letter meaningful word by using the 3rd, 5th, 7th and 10th letters from the left end of the word "HEADMASTER", then find the third letter from the left end of the newly formed word. If no such word is formed, then mark 'X' as the answer, if more than one such word is formed, then mark 'Y' as the answer.

- a. M
- b. A
- c. Y
- d. X
- e. R

31. Questions

In the given questions, the relationship between different elements is shown in the statements followed by some conclusions. Find the conclusion which is definitely true.

Statements:

$$Q = A < M \geq Z > T = K; R \leq K < F = B$$

Conclusions:

- I). $M > F$

II). $Z > R$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

32. Questions

Statements:

$Y > P = D \leq N < L = U; K > U \geq C$

Conclusions:

I). $P < K$

II). $Y > L$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

@RankZenBanker

33. Questions

Statements:

$A \leq N = J < Q \geq V; J > L = P \leq C$

Conclusions:

I). $A < C$

II). $L > V$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

34. Questions

Statements:

$F \geq R > K = B > O \geq X; M = J < O$

Conclusions:

I). $J < K$

II). $R > M$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

35. Questions

Statements:

$L > W \geq G = S; U < S = Y > P \leq T > M$

Conclusions:

I). $Y = W$

II). $W > S$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

@RankZenBanker

36. Questions

Study the following information carefully and answer the given questions.

M @ R T # K & P Q % B D * L N \$ F G ! H J ^ V W ? U S

Which of the following letters is the sixth element to the left of the fifteenth element from the left end in the above arrangement?

- a. %
- b. B
- c. Q
- d. P
- e. None of these

37. Questions

If all the symbols remain in their original position and in the place of the letters it is arranged in an English alphabetical order from left to right, then which of the following will be the fifteenth element from the left end?

- a. *
- b. N
- c. L
- d. \$
- e. None of these

38. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one does not belong to that group?

- a. R#K
- b. QBD
- c. LN\$
- d. F!H
- e. ^W?

@RankZenBanker

39. Questions

How many such symbols are there in the above arrangement, each of which is immediately preceded by a consonant and immediately followed by a consonant?

- a. Three
- b. Four
- c. Five
- d. Six
- e. More than six

40. Questions

If all the symbols are dropped from the above arrangement, then how many letters are there between K and H as per the given series?

- a. 7
- b. 8
- c. 9

d. 10

e. 11

Explanations:

1. Questions

Final Arrangement:

Designation	Person
Justice	S
Judge	N
Magistrate	T
Attorney	P
Advocate	O
Clerk	Q
Reporter	M
Secretary	R

@RankZenBanker

We have,

- Only three persons are designated between O and S, where S is senior to O.
- Q is immediately junior to O.
- Q is not designated as secretary.

From the above conditions, there are two possibilities:

Designation	Case 1	Case 2
Justice	S	
Judge		S
Magistrate		
Attorney		
Advocate	O	
Clerk	Q	O
Reporter		Q
Secretary		

Again, we have

- Only two persons are designated between P and M where P is senior to M.

- P is not working as an Advocate.

Designation	Case 1	Case 2
Justice	S	P
Judge		S
Magistrate		
Attorney	P	M
Advocate	O	
Clerk	Q	O
Reporter	M	Q
Secretary		

Again, we have

- T is senior to M but immediately junior to N.

After applying the above condition, case 2 gets eliminated because N is not immediately senior to T, hence case 1 shows the final arrangement.

Designation	Case 1	Case 2
Justice	S	P
Judge	N	S
Magistrate	T	T
Attorney	P	M
Advocate	O	
Clerk	Q	O
Reporter	M	Q
Secretary	R	

@RankZenBanker

Answer: C

2. Questions

Final Arrangement:

Designation	Person
Justice	S
Judge	N
Magistrate	T
Attorney	P
Advocate	O
Clerk	Q
Reporter	M
Secretary	R

We have,

- Only three persons are designated between O and S, where S is senior to O.
- Q is immediately junior to O.
- Q is not designated as secretary.

From the above conditions, there are two possibilities:

Designation	Case 1	Case 2
Justice	S	
Judge		S
Magistrate		
Attorney		
Advocate	O	
Clerk	Q	O
Reporter		Q
Secretary		

@RankZenBanker

Again, we have

- Only two persons are designated between P and M where P is senior to M.
- P is not working as an Advocate.

Designation	Case 1	Case 2
Justice	S	P
Judge		S
Magistrate		
Attorney	P	M
Advocate	O	
Clerk	Q	O
Reporter	M	Q
Secretary		

Again, we have

- T is senior to M but immediately junior to N.

After applying the above condition, case 2 gets eliminated because N is not immediately senior to T, hence case 1 shows the final arrangement.

Designation	Case 1	Case 2
Justice	S	P
Judge	N	S
Magistrate	T	T
Attorney	P	M
Advocate	O	
Clerk	Q	O
Reporter	M	Q
Secretary	R	

@RankZenBanker

Answer: E

3. Questions

Final Arrangement:

Designation	Person
Justice	S
Judge	N
Magistrate	T
Attorney	P
Advocate	O
Clerk	Q
Reporter	M
Secretary	R

We have,

- Only three persons are designated between O and S, where S is senior to O.
- Q is immediately junior to O.
- Q is not designated as secretary.

From the above conditions, there are two possibilities:

Designation	Case 1	Case 2
Justice	S	
Judge		S
Magistrate		
Attorney		
Advocate	O	
Clerk	Q	O
Reporter		Q
Secretary		

@RankZenBanker

Again, we have

- Only two persons are designated between P and M where P is senior to M.
- P is not working as an Advocate.

Designation	Case 1	Case 2
Justice	S	P
Judge		S
Magistrate		
Attorney	P	M
Advocate	O	
Clerk	Q	O
Reporter	M	Q
Secretary		

Again, we have

- T is senior to M but immediately junior to N.

After applying the above condition, case 2 gets eliminated because N is not immediately senior to T, hence case 1 shows the final arrangement.

Designation	Case 1	Case 2
Justice	S	P
Judge	N	S
Magistrate	T	T
Attorney	P	M
Advocate	O	
Clerk	Q	O
Reporter	M	Q
Secretary	R	

@RankZenBanker

Answer: C

4. Questions

Final Arrangement:

Designation	Person
Justice	S
Judge	N
Magistrate	T
Attorney	P
Advocate	O
Clerk	Q
Reporter	M
Secretary	R

We have,

- Only three persons are designated between O and S, where S is senior to O.
- Q is immediately junior to O.
- Q is not designated as secretary.

From the above conditions, there are two possibilities:

Designation	Case 1	Case 2
Justice	S	
Judge		S
Magistrate		
Attorney		
Advocate	O	
Clerk	Q	O
Reporter		Q
Secretary		

@RankZenBanker

Again, we have

- Only two persons are designated between P and M where P is senior to M.
- P is not working as an Advocate.

Designation	Case 1	Case 2
Justice	S	P
Judge		S
Magistrate		
Attorney	P	M
Advocate	O	
Clerk	Q	O
Reporter	M	Q
Secretary		

Again, we have

- T is senior to M but immediately junior to N.

After applying the above condition, case 2 gets eliminated because N is not immediately senior to T, hence case 1 shows the final arrangement.

Designation	Case 1	Case 2
Justice	S	P
Judge	N	S
Magistrate	T	T
Attorney	P	M
Advocate	O	
Clerk	Q	O
Reporter	M	Q
Secretary	R	

@RankZenBanker

Answer: D

5. Questions

Final Arrangement:

Designation	Person
Justice	S
Judge	N
Magistrate	T
Attorney	P
Advocate	O
Clerk	Q
Reporter	M
Secretary	R

We have,

- Only three persons are designated between O and S, where S is senior to O.
- Q is immediately junior to O.
- Q is not designated as secretary.

From the above conditions, there are two possibilities:

Designation	Case 1	Case 2
Justice	S	
Judge		S
Magistrate		
Attorney		
Advocate	O	
Clerk	Q	O
Reporter		Q
Secretary		

@RankZenBanker

Again, we have

- Only two persons are designated between P and M where P is senior to M.
- P is not working as an Advocate.

Designation	Case 1	Case 2
Justice	S	P
Judge		S
Magistrate		
Attorney	P	M
Advocate	O	
Clerk	Q	O
Reporter	M	Q
Secretary		

Again, we have

- T is senior to M but immediately junior to N.

After applying the above condition, case 2 gets eliminated because N is not immediately senior to T, hence case 1 shows the final arrangement.

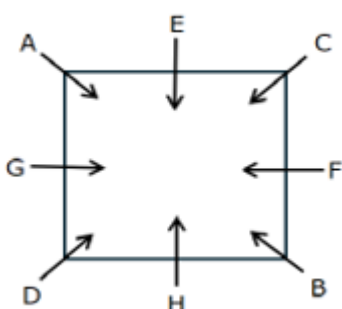

Designation	Case 1	Case 2
Justice	S	P
Judge	N	S
Magistrate	T	T
Attorney	P	M
Advocate	O	
Clerk	Q	O
Reporter	M	Q
Secretary	R	

@RankZenBanker

Answer: C

6. Questions

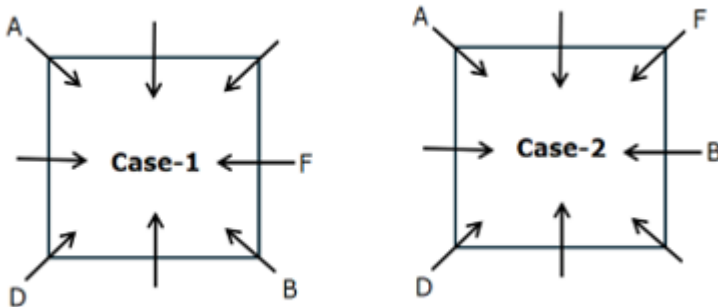

Final Arrangement:

We have,

- D sits at one of the corners.
- A sits second to the left of D.
- Neither E nor B sits adjacent to D.
- F sits to the immediate right of B but does not sit adjacent to A.

From the above conditions, there are two possibilities:

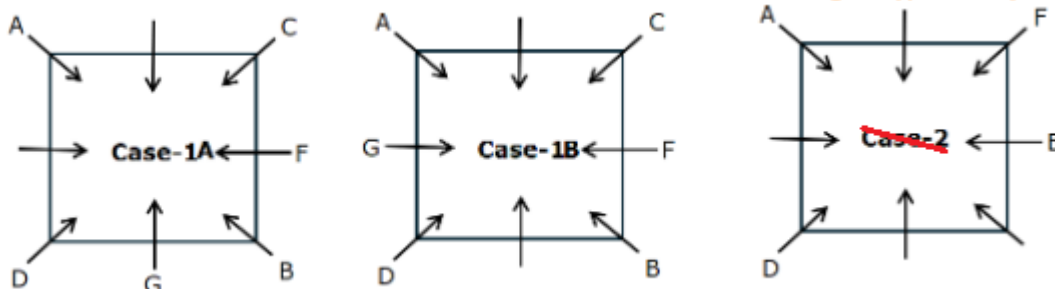

Again, we have

- Two people sit between C and G.
- C sits opposite to D.

From the above condition, there is one more possibility .

From the above conditions Case 2 gets eliminated because C sits opposite to D is not satisfied.

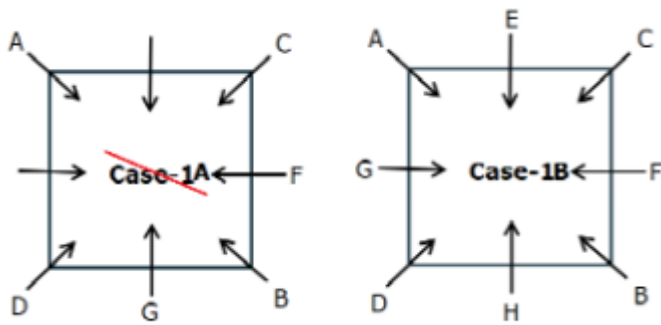

Again, we have,

- The number of people who sit between A and F, when counted from the right of A, **is one less than** the number of people who sit between G and H, when counted from the left of G.

From the above condition, Case-1A get eliminated because the number of people who sit between A and F, when counted from the right of A, **is one less than** the number of people who sit between G and H, when counted from the left of G, which is not satisfied.

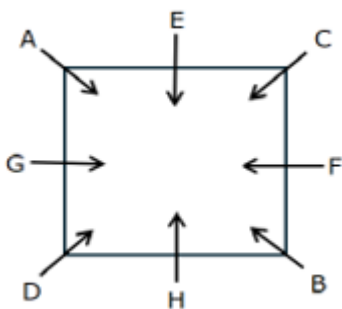

Hence, Case-1B gives the final arrangement.

Answer: C

7. Questions

Final Arrangement:

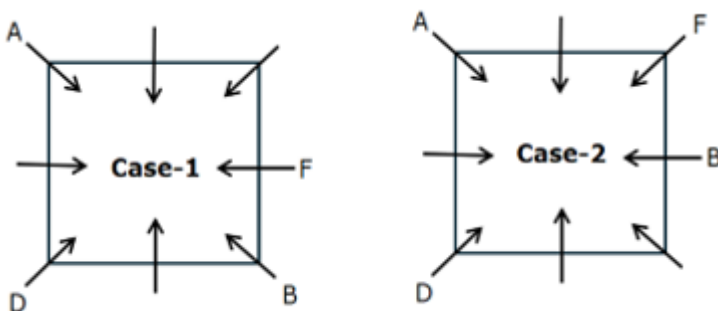

We have,

@RankZenBanker

- D sits at one of the corners.
- A sits second to the left of D.
- Neither E nor B sits adjacent to D.
- F sits to the immediate right of B but does not sit adjacent to A.

From the above conditions, there are two possibilities:

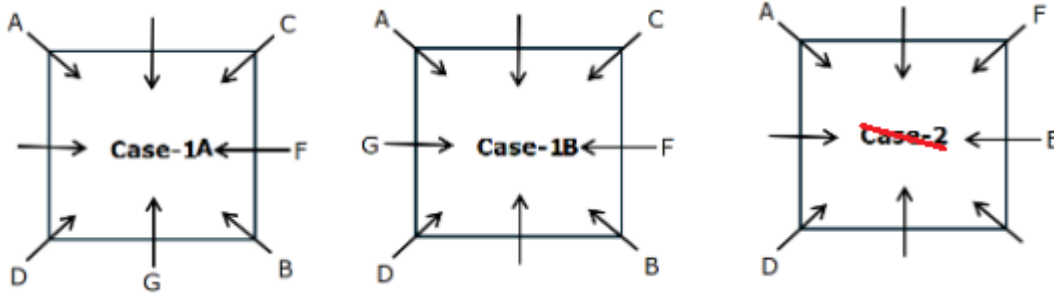

Again, we have

- Two people sit between C and G.
- C sits opposite to D.

From the above condition, there is one more possibility .

From the above conditions Case 2 gets eliminated because C sits opposite to D is not satisfied.

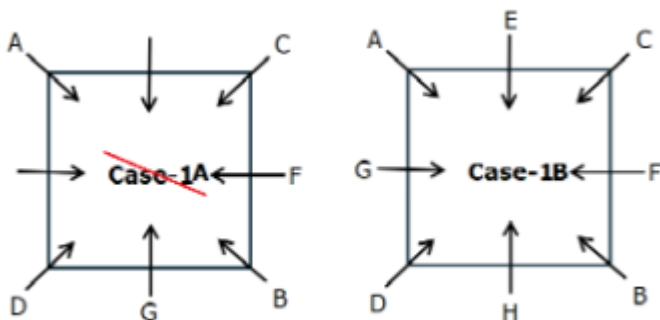

Again, we have,

- The number of people who sit between A and F, when counted from the right of A, **is one less than** the number of people who sit between G and H, when counted from the left of G.

From the above condition, Case-1A get eliminated because the number of people who sit between A and F, when counted from the right of A, **is one less than** the number of people who sit between G and H, when counted from the left of G, which is not satisfied.

Hence, Case-1B gives the final arrangement.

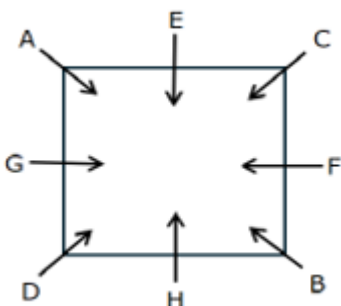

@RankZenBanker

Answer: B

8. Questions

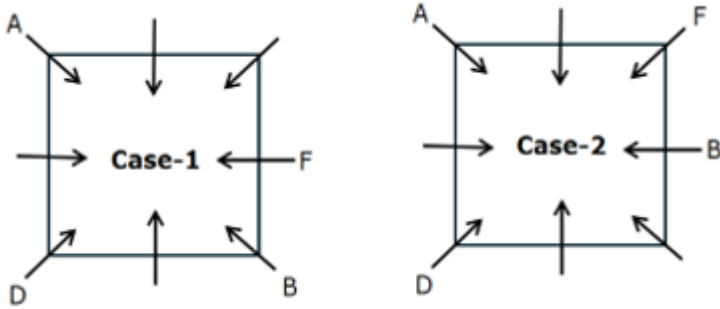

Final Arrangement:

We have,

- D sits at one of the corners.
- A sits second to the left of D.
- Neither E nor B sits adjacent to D.
- F sits to the immediate right of B but does not sit adjacent to A.

From the above conditions, there are two possibilities:

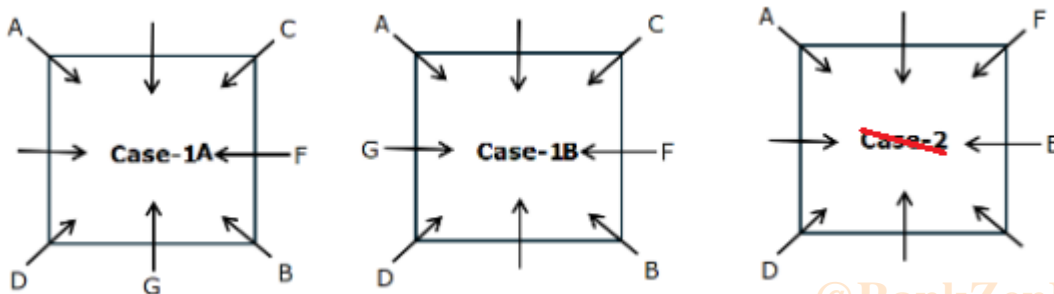

Again, we have

- Two people sit between C and G.
- C sits opposite to D.

From the above condition, there is one more possibility .

From the above conditions Case 2 gets eliminated because C sits opposite to D is not satisfied.

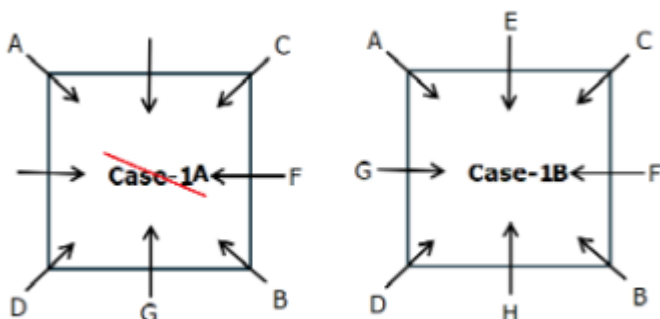

@RankZenBanker

Again, we have,

- The number of people who sit between A and F, when counted from the right of A, **is one less than** the number of people who sit between G and H, when counted from the left of G.

From the above condition, Case-1A get eliminated because the number of people who sit between A and F, when counted from the right of A, **is one less than** the number of people who sit between G and H, when counted from the left of G, which is not satisfied.

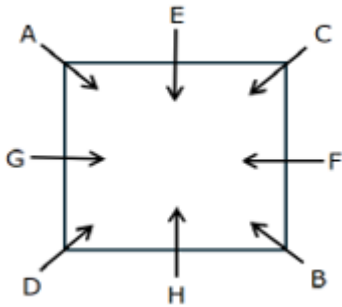

Hence, Case-1B gives the final arrangement.

Answer: A (H sits third to the right of A, and E sits third to the right of B. In the same way, C sits third to the right of H.)

9. Questions

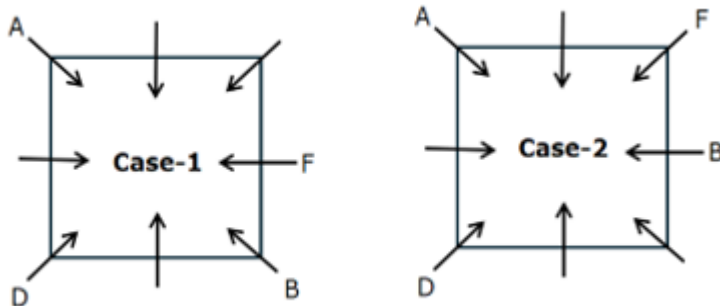

Final Arrangement:

We have,

- D sits at one of the corners.
- A sits second to the left of D.
- Neither E nor B sits adjacent to D.
- F sits to the immediate right of B but does not sit adjacent to A.

From the above conditions, there are two possibilities:

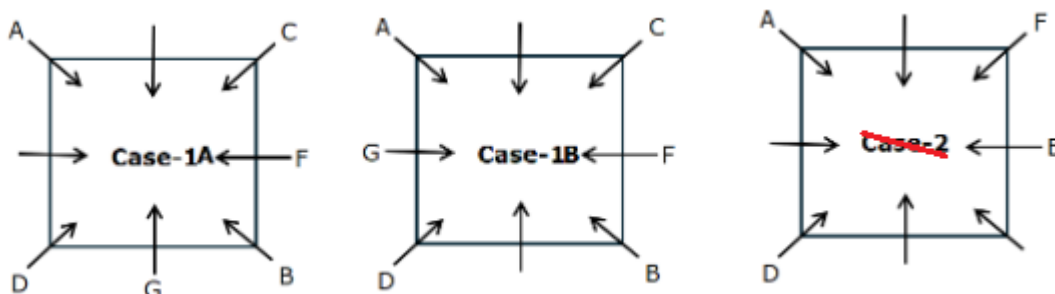

@RankZenBanker

Again, we have

- Two people sit between C and G.
- C sits opposite to D.

From the above condition, there is one more possibility .

From the above conditions Case 2 gets eliminated because C sits opposite to D is not satisfied.

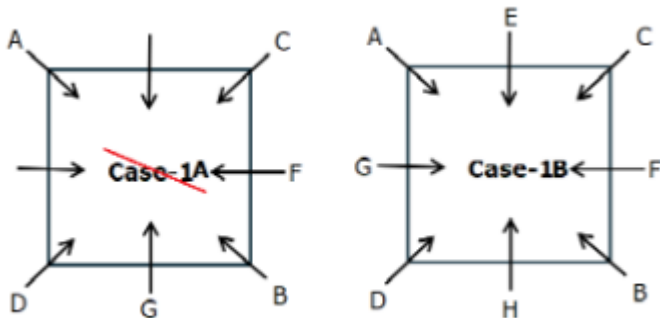

Again, we have,

- The number of people who sit between A and F, when counted from the right of A, **is one less than** the number of people who sit between G and H, when counted from the left of G.

From the above condition, Case-1A get eliminated because the number of people who sit between A and

F, when counted from the right of A, is **one less than** the number of people who sit between G and H, when counted from the left of G, which is not satisfied.

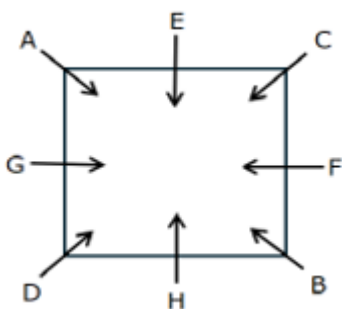

Hence, Case-1B gives the final arrangement.

Answer: B (C remains unchanged)

10. Questions

Final Arrangement:

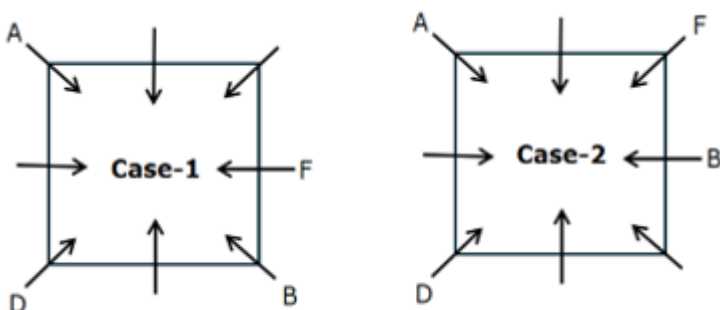

@RankZenBanker

We have,

- D sits at one of the corners.
- A sits second to the left of D.
- Neither E nor B sits adjacent to D.
- F sits to the immediate right of B but does not sit adjacent to A.

From the above conditions, there are two possibilities:

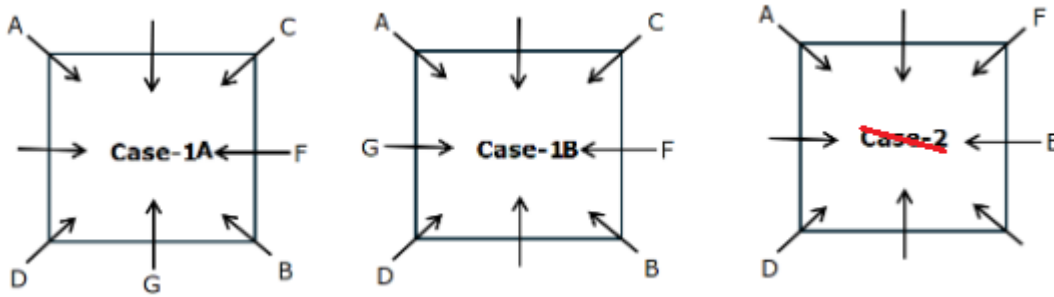

Again, we have

- Two people sit between C and G.
- C sits opposite to D.

From the above condition, there is one more possibility .

From the above conditions Case 2 gets eliminated because C sits opposite to D is not satisfied.

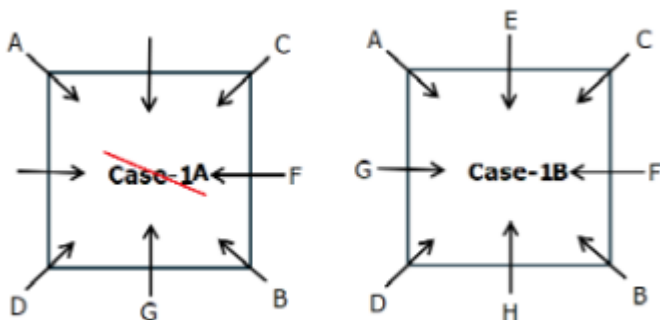

Again, we have,

- The number of people who sit between A and F, when counted from the right of A, **is one less than** the number of people who sit between G and H, when counted from the left of G.

From the above condition, Case-1A get eliminated because the number of people who sit between A and F, when counted from the right of A, **is one less than** the number of people who sit between G and H, when counted from the left of G, which is not satisfied.

Hence, Case-1B gives the final arrangement.

@RankZenBanker

Answer: B (In all the options the persons sit in the middle of the side except in option B)

11. Questions

Final Arrangement:

Floors	Persons
7	C
6	D
5	A
4	G
3	B
2	F
1	E

We have,

- D lives on an even-numbered floor immediately above A.

From the above condition, there are three possibilities

Floors	Case-1	Case-2	Case-3
	Persons	Persons	Persons
7			
6			D
5			A
4		D	
3		A	
2	D		
1	A		

@RankZenBanker

Again, we have

- Only two people live between A and F.
- The number of people lives above E **is equal to** the number of people lives below C.

Floors	Case-1	Case-2	Case-3
	Persons	Persons	Persons
7		E/C	E/C
6		F	D
5	E/C		A
4	F	D	
3	C/E	A	
2	D		F
1	A	C/E	C/E

Again, we have

- B and E are not immediate neighbours.
- Only two people live between E and G.

From the above conditions, Case-2 gets eliminated because only two people live between E and G, which is not satisfied.

Floors	Case-1	Case-2	Case-3
	Persons	Persons	Persons
7		E/C	E/C
6	G	F	D
5	C		A
4	F	D	G
3	E	A	
2	D		F
1	A	C/E	C/E

Again, we have

- B, neither lives on the topmost floor nor lives below E.

From the above condition, Case-1 gets eliminated because B, neither lives on the topmost floor nor lives below E, which is not satisfied. Hence, Case-3 shows the final arrangement.

Floors	Case-1	Case-3
	Persons	Persons
7	B	C
6	G	D
5	C	A
4	F	G
3	E	B
2	D	F
1	A	E

Answer: B

12. Questions

@RankZenBanker

Final Arrangement:

Floors	Persons
7	C
6	D
5	A
4	G
3	B
2	F
1	E

We have,

- D lives on an even-numbered floor immediately above A.

From the above condition, there are three possibilities

Floors	Case-1	Case-2	Case-3
	Persons	Persons	Persons
7			
6			D

4		D	
3		A	
2	D		
1	A		

Again, we have

- Only two people live between A and F.
- The number of people lives above E **is equal to** the number of people lives below C.

Floors	Case-1	Case-2	Case-3
	Persons	Persons	Persons
7		E/C	E/C
6		F	D
5	E/C		A
4	F	D	
3	C/E	A	
2	D		F
1	A	C/E	C/E

Again, we have

- B and E are not immediate neighbours.
- Only two people live between E and G.

From the above conditions, Case-2 gets eliminated because only two people live between E and G, which is not satisfied.

Floors	Case-1	Case-2	Case-3
	Persons	Persons	Persons
7		E/C	E/C
6	G	F	D
5	C		A
4	F	D	G
3	E	A	
2	D		F
1	A	C/E	C/E

Again, we have

- B, neither lives on the topmost floor nor lives below E.

@RankZenBanker

From the above condition, Case-1 gets eliminated because B, neither lives on the topmost floor nor lives below E, which is not satisfied. Hence, Case-3 shows the final arrangement.

Again, we have

- B, neither lives on the topmost floor nor lives below E.

@RankZenBanker

From the above condition, Case-1 gets eliminated because B, neither lives on the topmost floor nor lives below E, which is not satisfied. Hence, Case-3 shows the final arrangement.

Floors	Case-1	Case-3
	Persons	Persons
7	B	C
6	G	D
5	C	A
4	F	G
3	E	B
2	D	F
1	A	E

Answer: E

16. Questions

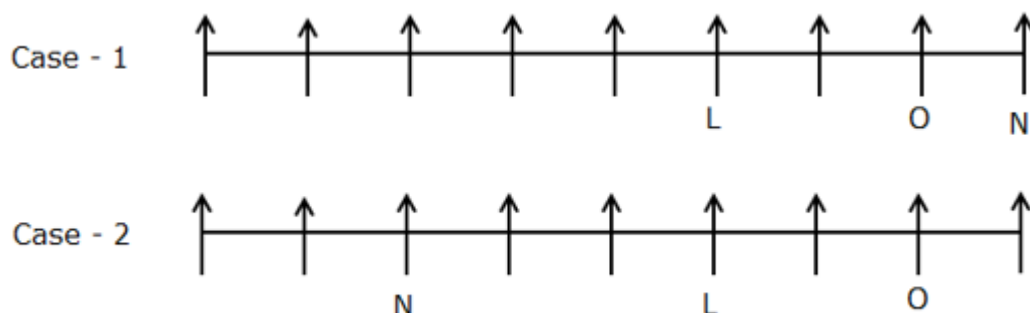

Final arrangement:

We have,

- Only one person sits to the right of O, who sits second to the right of L.
- Only two persons sit between N and L.

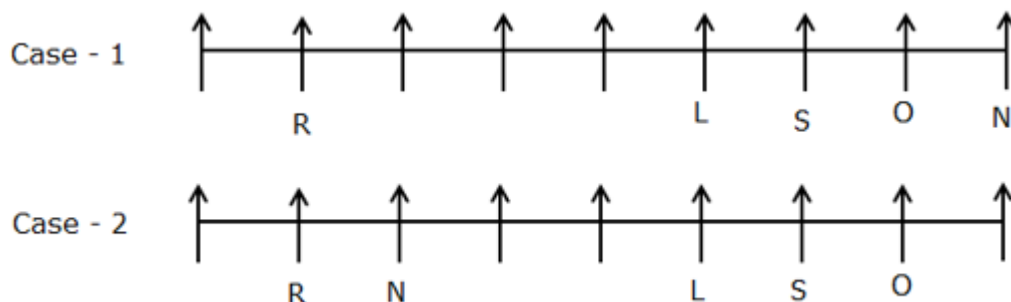

From the above condition, there are two possibilities

Again we have,

@RankZenBanker

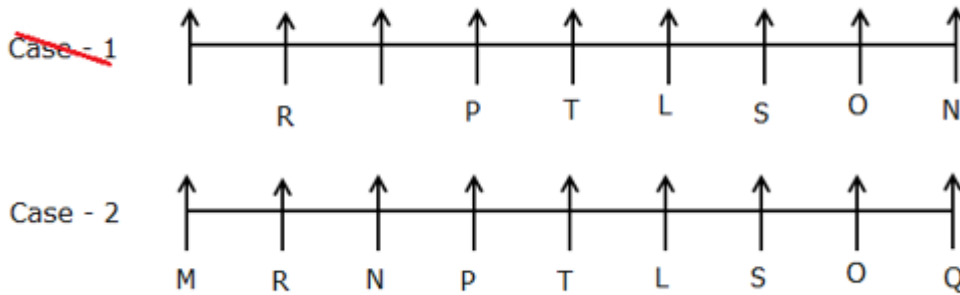

- O and S are immediate neighbours.
- The number of persons sits to the right of S is **one more** than the number of persons sits to the left of R.

Again we have,

- T sits immediate right of P, where both of them is not an immediate neighbour of R.
- More than one person sits between M and Q, who sits to the right of P.

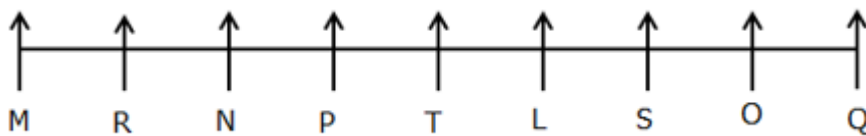

After applying the above conditions case 1 gets eliminated, because there is no possibility to place Q and M. Hence Case 2 shows the final arrangement.

Answer: D

17. Questions

Final arrangement:

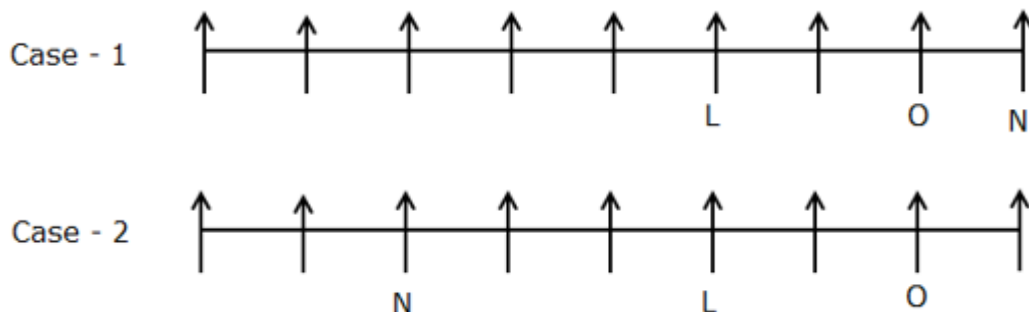

We have,

- Only one person sits to the right of O, who sits second to the right of L.
- Only two persons sit between N and L.

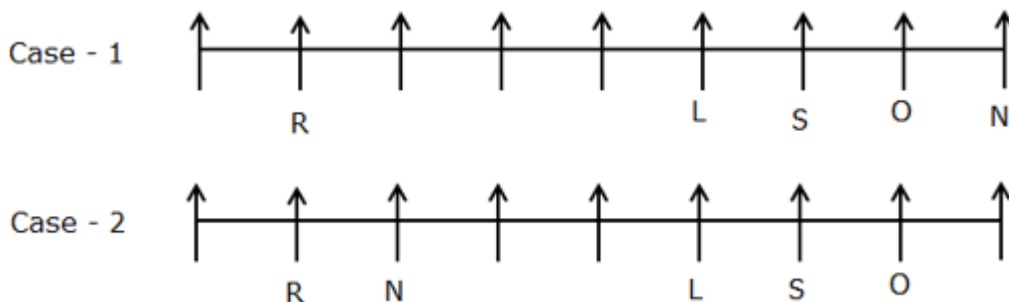

From the above condition, there are two possibilities

@RankZenBanker

Again we have,

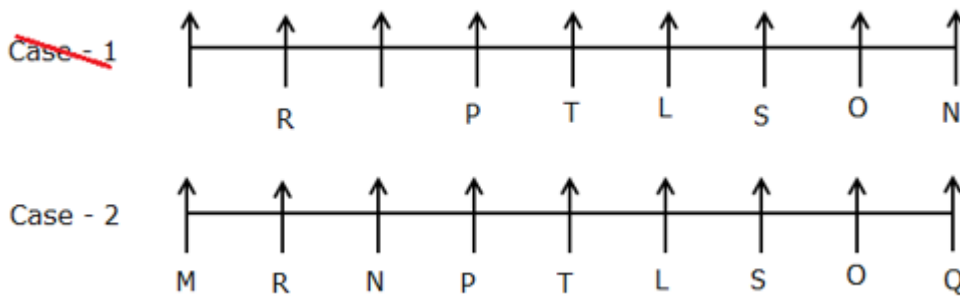

- O and S are immediate neighbours.
- The number of persons sits to the right of S is **one more** than the number of persons sits to the left of R.

Again we have,

- T sits immediate right of P, where both of them is not an immediate neighbour of R.
- More than one person sits between M and Q, who sits to the right of P.

After applying the above conditions case 1 gets eliminated, because there is no possibility to place Q and M. Hence Case 2 shows the final arrangement.

Answer: A

18. Questions

Final arrangement:

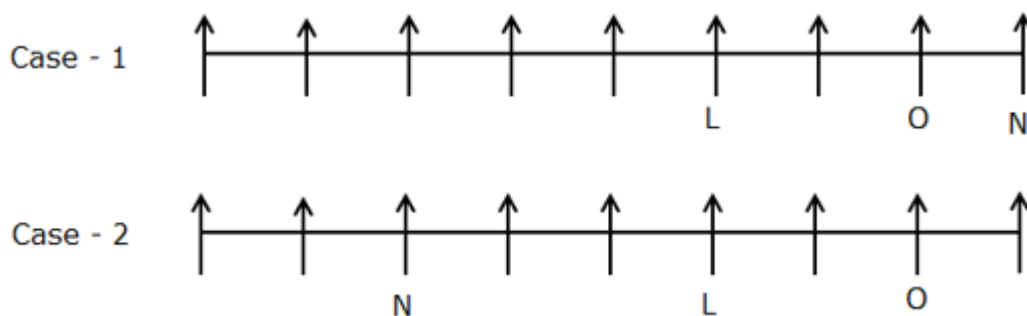

@RankZenBanker

We have,

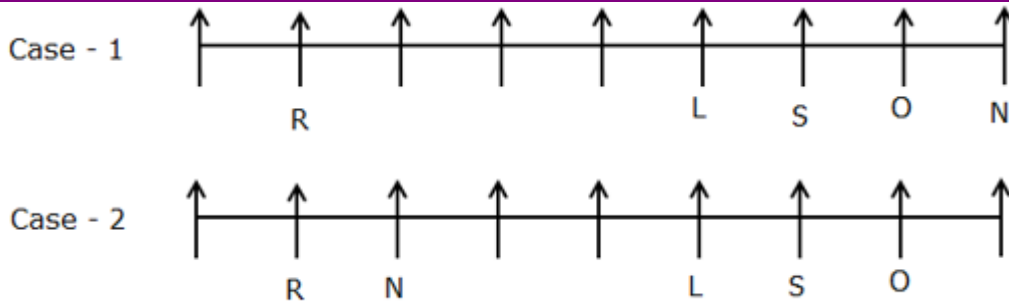

- Only one person sits to the right of O, who sits second to the right of L.
- Only two persons sit between N and L.

From the above condition, there are two possibilities

Again we have,

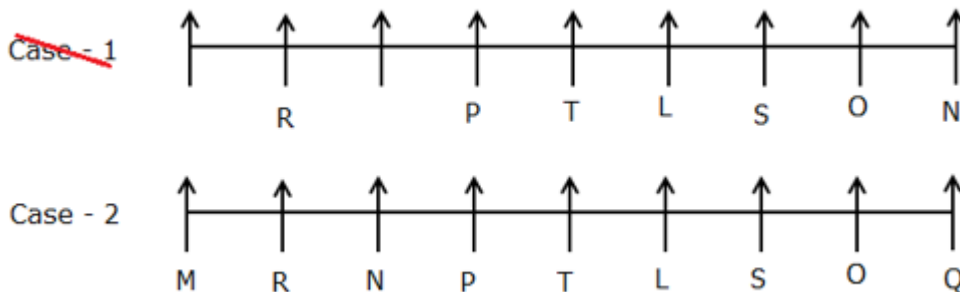

- O and S are immediate neighbours.
- The number of persons sits to the right of S is **one more** than the number of persons sits to the left of R.

Again we have,

- T sits immediate right of P, where both of them is not an immediate neighbour of R.
- More than one person sits between M and Q, who sits to the right of P.

After applying the above conditions case 1 gets eliminated, because there is no possibility to place Q and M. Hence Case 2 shows the final arrangement.

@RankZenBanker

Answer: C

19. Questions

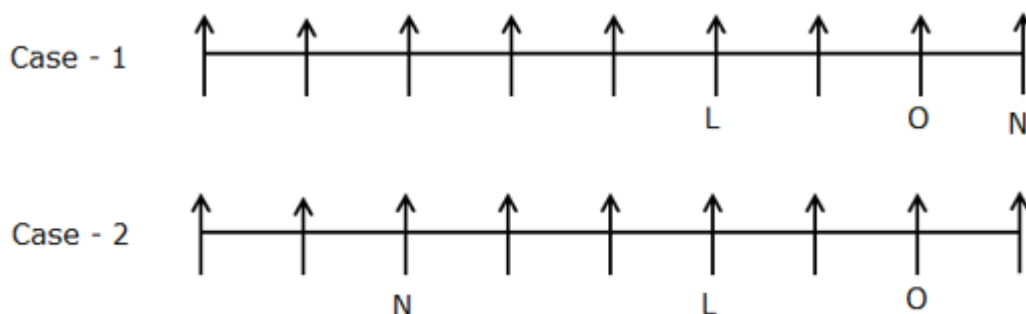

Final arrangement:

We have,

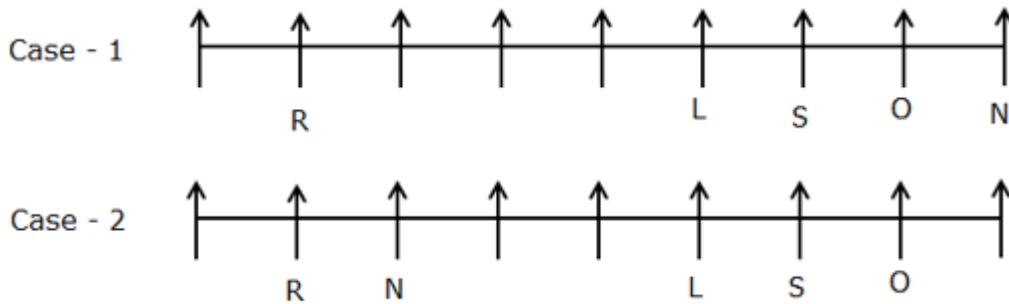

- Only one person sits to the right of O, who sits second to the right of L.
- Only two persons sit between N and L.

From the above condition, there are two possibilities

Again we have,

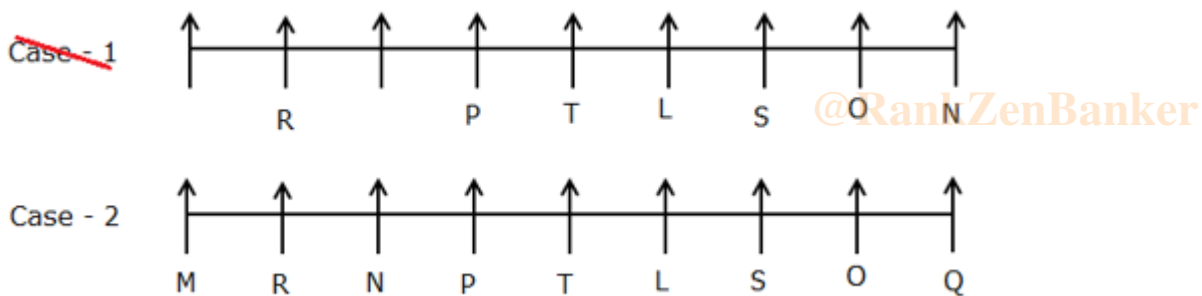

- O and S are immediate neighbours.
- The number of persons sits to the right of S is **one more** than the number of persons sits to the left of R.

Again we have,

- T sits immediate right of P, where both of them is not an immediate neighbour of R.
- More than one person sits between M and Q, who sits to the right of P.

After applying the above conditions case 1 gets eliminated, because there is no possibility to place Q and M. Hence Case 2 shows the final arrangement.

Answer: E

20. Questions

Final arrangement:

We have,

- Only one person sits to the right of O, who sits second to the right of L.
- Only two persons sit between N and L.

From the above condition, there are two possibilities

Again we have,

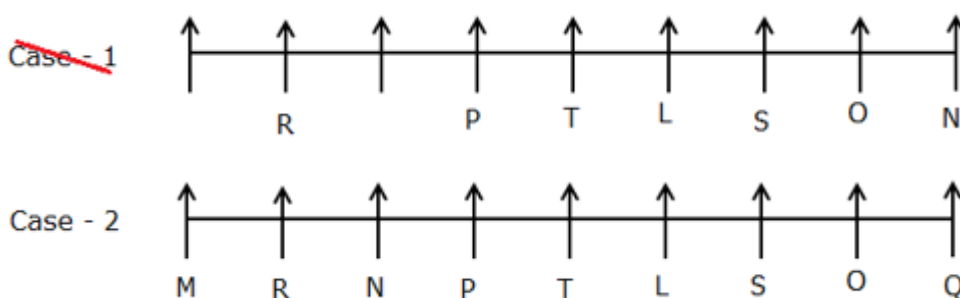

- O and S are immediate neighbours.
- The number of persons sits to the right of S is **one more** than the number of persons sits to the left of R.

Again we have,

- T sits immediate right of P, where both of them is not an immediate neighbour of R.
- More than one person sits between M and Q, who sits to the right of P.

After applying the above conditions case 1 gets eliminated, because there is no possibility to place Q and M. Hence Case 2 shows the final arrangement.

Answer: B

21. Questions

Answer: E

Given series: 847 593 261 728 415

Middle digit of highest number = 4

Middle digit of lowest number = 6

Product = $6 \times 4 = 24$

22. Questions

Answer: C

Series: 847 593 261 728 415

After arrangement: 478 359 126 278 145

Highest number = 478

Lowest number = 126

Difference = $478 - 126 = 352$

23. Questions

Answer: B

Series: 847 593 261 728 415

Sum of first and third digit in 847 = $15 > 4$

Sum of first and third digit in 593 = $8 < 9$

Sum of first and third digit in 261 = $3 < 6$

Sum of first and third digit in 728 = $15 > 2$

Sum of first and third digit in 415 = $9 > 1$

@RankZenBanker

There are 3 numbers in the given series in which the sum of the first and last digit is greater than the middle digit.

24. Questions

Answer: D

Series: 847 593 261 728 415

All the numbers are arranged in descending order from left to right, we get

Required series: 847 728 593 415 261

415 will be the second number from the right end.

25. Questions

Answer: E

Series: 847 593 261 728 415

Applying the condition, after interchanging the first and second digit of each number, we get New Series:
487 953 621 278 145

Then, Second highest number = 621

Fifth lowest number = 953

Difference = $953 - 621 = 332$

26. Questions

Answer: B

All the letters of the word 'BLUEPRINT' are arranged in an alphabetical order from left to right, we get

Given word- B L U E P R I N T
After
arrangement- B E I L N P R T U

Only one letter (B) remains unchanged in the original position

27. Questions

Answer: C

Given number - 391864275183

After the positions of the 1st and 2nd digits, 3rd and 4th digits, 5th and 6th digits, and so on are interchanged, we get a New number - 938146721583

Then, 6 and 7 will be exactly in the middle of the number.

28. Questions

Answer: C

S A N C T U A R Y

@RankZenBanker

There are two such pairs (AC and TU) of letters in the word "SANCTUARY" (in both forward and backward directions).

29. Questions

Answer: D

Given number - 472861953

After applying the condition, each even digit which is smaller than 6 is multiplied by 2, each even digit which is greater than or equal to 6 remains the same, and each odd digit is decreased by 1, we get a Number - 864860842

Then all the digits are arranged in ascending order from left to right, we get a new number -024466888
2 is the second digit from the left end in the new number.

30. Questions

Answer: C

The 3rd, 5th, 7th and 10th letters of the word "HEADMASTER" are A, M, S, R respectively.

Word formed - MARS and ARMS

More than one meaningful word is formed. So, the answer is Y.

31. Questions

Answer: A

$$Q = A < M \geq Z > T = K; R \leq K < F = B$$

Conclusions:

I). $M > F \rightarrow \text{False} (M \geq Z > T = K < F)$

II). $Z > R \rightarrow \text{True} (Z > T = K \geq R)$

32. Questions

Answer: D

$$Y > P = D \leq N < L = U; K > U \geq C$$

Conclusions:

I). $P < K \rightarrow \text{True} (P = D \leq N < L = U < K)$

II). $Y > L \rightarrow \text{False} (Y > P = D \leq N < L)$

33. Questions

Answer: E

$$A \leq N = J < Q \geq V; J > L = P \leq C$$

Conclusions:

I). $A < C \rightarrow \text{False} (A \leq N = J > L = P \leq C)$

II). $L > V \rightarrow \text{False} (L < J = N \geq A)$

34. Questions

Answer: C

$$F \geq R > K = B > O \geq X; M = J < O$$

Conclusions:

I). $J < K \rightarrow \text{True} (J < O < B = K)$

II). $R > M \rightarrow \text{True} (R > K = B > O > J = M)$

35. Questions

Answer: B

$$L > W \geq G = S; U < S = Y > P \leq T > M$$

Conclusions:

I). $Y = W \rightarrow \text{False} (Y = S = G \leq W)$

II). $W > S \rightarrow \text{False} (S = G \leq W)$

@RankZenBanker

But by combining conclusions I and II we can get a complimentary pair

$Y = S = G \leq W$, so either conclusion I or II follows

36. Questions

Answer: C

Given series: M @ R T # K & P Q % B D * L N \$ F G ! H J ^ V W ? U S

Fifteenth element from left = N

Sixth element to the left of N = Q

Q is the sixth element to the left of the fifteenth element from the left end

37. Questions

Answer: B

Given series: M @ R T # K & P Q % B D * L N \$ F G ! H J ^ V W ? U S

All the symbols remain in their original position and all the letters are arranged in an English alphabetical sequence from left to right, we get a New Series: B @ D F # G & H J % K L * M **N** \$ P Q ! R S ^ T U ? V W

N is the fifteenth element from the left end.

38. Questions

Answer: C

@RankZenBanker

Given series: M @ R T # K & P Q % B D * L N \$ F G ! H J ^ V W ? U S

The second element is second to the right of the first element, and the third element is to the immediate right of the second element, except LN\$.

39. Questions

Answer: E

Given series: M @ R T # K & P Q % B D * L N \$ F G ! H J ^ V W ? U S

There are eight (@, #, &, %, *, \$, !, ^) such symbols in the above arrangement, which are immediately preceded and immediately followed by consonants.

40. Questions

Answer: B

Given series: M @ R T # K & P Q % B D * L N \$ F G ! H J ^ V W ? U S

All the symbols are dropped from the above arrangement, then we get a New Series: M R T K **P Q B D L N F G** H J V W U S

In the new series, there are eight letters between K and H.
